## Free PDF Professional HITRUST - CCSFP Test Cram Review

Hundreds of applicants who register themselves for the Certified CSF Practitioner 2025 Exam (CCSFP) certification exam, lack updated practice test questions to prepare successfully in a short time. As a result of which, they don't crack the Certified CSF Practitioner 2025 Exam (CCSFP) examination which causes a loss of time and money and sometimes loss of the encouragement to take the test for the second time. Test4Engine can save you from facing these issues with its real HITRUST CCSFP Exam Questions.

### HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q13-Q18):

#### NEW QUESTION # 13

An r2 Requirement Statement that scores at a 37 would yield which result?

- A. No Gap
- B. Function Gap
- C. HITRUST Certification
- D. Gap with possible required CAP
- E. Risk Acceptance

**Answer: D**

Explanation:

HITRUST uses a scoring scale from 0 to 100, with categories for Fully Compliant, Mostly Compliant, Partially Compliant, Somewhat Compliant, and Non-Compliant. A score of 37 falls into the "Somewhat Compliant" category. This reflects significant weaknesses in Policy, Procedure, or Implementation maturity levels. Such a low score indicates a gap that must be addressed. Depending on whether the control is required for certification, HITRUST may require a Corrective Action Plan (CAP). CAPs are required when certification-critical controls score below thresholds (e.g., Implementation not at 100% where required). Therefore, a Requirement Statement score of 37 would be treated as a gap with a possible required CAP, depending on its criticality within the certification process.

#### NEW QUESTION # 14

An organization can have multiple assessment objects. [0090]

- A. False
- B. True

**Answer: B**

Explanation:

In the HITRUST MyCSF environment, organizations may define multiple assessment objects. An assessment object refers to the specific environment, business unit, or system being evaluated under a HITRUST assessment. This allows organizations with diverse operations or multiple systems to scope and manage assessments separately, ensuring accurate applicability of requirement statements.

Extract Reference (CCSFP Study Guide & HITRUST CSF Guidance, [0090]):

Organizations may establish multiple assessment objects in MyCSF to represent different systems, applications, or environments subject to CSF assessment.

Thus, the correct response is True

#### **NEW QUESTION # 15**

The HITRUST QA reservation must be made by the External Assessor at least six months in advance of the submission date.

- A. True
- B. False

**Answer: B**

Explanation:

HITRUST requires External Assessors to reserve QA slots prior to submitting validated assessments. This ensures QA capacity is available and assessments are reviewed in a timely manner. However, the guidance does not specify a strict six-month minimum reservation period. Instead, HITRUST recommends assessors reserve QA slots well in advance of their submission target date, based on the anticipated complexity and workload. In practice, reservations may often be made months in advance, but there is no formal rule mandating six months. The flexibility allows assessors to adjust their schedules while ensuring HITRUST can properly plan QA resources. As such, the statement that reservations must always be made six months ahead is False.

References: HITRUST CSF Assurance Program Guide - "QA Reservation and Scheduling"; CCSFP Training - "Assessment Submission & QA."

#### **NEW QUESTION # 16**

Is additional work required by the assessor to generate the NIST Cybersecurity Framework Report?

- A. No
- B. Yes

**Answer: A**

Explanation:

The NIST Cybersecurity Framework (CSF) Report in HITRUST is a derivative output that is automatically generated within the MyCSF platform. When an entity completes a HITRUST assessment (e1, i1, or r2), MyCSF uses the mapping of HITRUST control requirements to the NIST CSF categories and subcategories to produce the report. Because these mappings are embedded into the framework, assessors do not need to perform additional testing, create mappings manually, or provide separate evidence. The effort invested in validating HITRUST requirement statements is sufficient, and MyCSF generates the NIST CSF alignment report as an output. This provides organizations with the ability to demonstrate NIST CSF alignment to stakeholders without duplicating work. Therefore, additional work is not required from assessors-making the correct answer No.

References: HITRUST MyCSF User Guide - "Available Reports"; CCSFP Study Guide - "Leveraging HITRUST for NIST CSF Reporting."

#### **NEW QUESTION # 17**

The AI Risk Assessment compliance factor is used to obtain the HITRUST AI Security Certification. [0007]

- A. True

- B. False

**Answer: B**

Explanation:

The AI Risk Assessment compliance factor is used to scope AI-related controls in assessments.

However, the HITRUST AI Security Certification requires assessment of AI Security requirements, not just the AI Risk Assessment factor.

Thus, the statement is incorrect.

Extract Reference (HITRUST AI Security Factor Guidance [0007]):

The AI Risk Assessment factor scopes AI-related controls but does not by itself equate to AI Security Certification.

**NEW QUESTION # 18**

.....

Our company has spent more than 10 years on compiling CCSFP study materials for the exam in this field, and now we are delighted to be here to share our study materials with all of the candidates for the exam in this field. There are so many striking points of our CCSFP Preparation exam. If you just free download the demos of the CCSFP learning guide, then you can have a better understanding of our products. The demos are a little part of the exam questions and answers for you to check the quality and validity.
