Scrum Professional Scrum Product Owner I Sample Questions (Q21-Q26):

NEW QUESTION # 21

What may be included in the Sprint Backlog?

(choose the best answer)

- A. Tasks.
- B. Use Cases.
- C. Tests.
- D. User Stories.
- E. Any of the above (or others) which are a decomposition of the selected Product

Answer: E

Explanation:

Backlog items.

Explanation:

The Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal. The Sprint Backlog is a forecast by the Developers about what functionality will be in the next Increment and the work needed to deliver that functionality into a "Done" Increment. The Sprint Backlog makes visible all the work that the Developers identify as necessary to meet the Sprint Goal. The Sprint Backlog can include any items that the Developers deem necessary to achieve the Sprint Goal, such as user stories, tasks, use cases, tests, or others. The Sprint Backlog is a plan with enough detail that changes in progress can be understood in the Daily Scrum.

The Scrum Guide, section 3.3. Sprint Backlog

Professional Scrum Product Owner I (PSPO I) Learning Path, section 2.2. The Product Owner and the Sprint Professional Scrum Product Owner I (PSPO I) Sample Questions, question 11

NEW QUESTION # 22

When the Developers determine that they will not be able to finish the complete forecast, who has to be present when reviewing and adjusting the Sprint work selected?

(Choose the best answer)

- A. The Product Owner and all stakeholders.
- **B. The Product Owner and the Developers.**
- C. The Scrum Master, project manager and the Developers.
- D. The Scrum Master and the Developers.

Answer: B

Explanation:

The correct answer is D.

During the Sprint, if the work turns out to be different from what the Developers expected, the Developers collaborate with the Product Owner to negotiate the scope of the Sprint Backlog within the Sprint without affecting the Sprint Goal. This means the Product Owner and Developers are the key people involved when reviewing and adjusting the selected Sprint work.

Why the other options are incorrect:

A). The Product Owner and all stakeholders- stakeholders are not required for this adjustment.

B). The Scrum Master and the Developers- the Scrum Master may help if needed, but the Product Owner is the required partner for scope negotiation.

C). The Scrum Master, project manager and the Developers- Scrum does not define a project manager role here, and this is not the required group.

The Scrum Guide supports this by stating that as more is learned, the Developers and the Product Owner may renegotiate the scope of the Sprint Backlog.

NEW QUESTION # 23

Which best describes the Product Backlog?

(choose the best answer)

- A. It is baselined to follow change management processes.
- B. It provides just enough information to enable a Scrum Team to start the design phase of a product.
- **C. It is allowed to grow and change as more is learned about the product and its customers.**
- D. It contains all foreseeable tasks and requirements from which the Scrum Team can develop and maintain a complete project plan.

Answer: C

Explanation:

Explanation

The Product Backlog is an emergent, ordered list of what is needed to improve the product. It is the single source of work undertaken by the Scrum Team. The Product Backlog is dynamic; it constantly changes to identify what the product needs to be appropriate, competitive, and useful. The other options are not accurate descriptions of the Product Backlog, as it does not contain all foreseeable tasks and requirements, it does not provide just enough information to start the design phase, and it is not baselined to follow change management processes.

NEW QUESTION # 24

What is the perfect number of hours a Developer should work in a week?

- A. Between 40 and 60 hours per week.
- **B. It is required to work at a constant pace.**
- C. A maximum of 40 hours per week.
- D. As long as it is needed.

Answer: B

NEW QUESTION # 25

The Product Owner is the person who will be held accountable if a product does not achieve its goals or deliver value. Does this mean that the Product Owner has the final say over the Definition of Done?

(choose the best answer)

- A. Yes, the Product Owner decides the Definition of Done. The Developers may be consulted.
- **B. No, the Scrum Team decides the Definition of Done, if it is not a standard of the organization. The Product Owner is just one member of the Scrum Team.**

Answer: B

Explanation:

The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The Definition of Done is used to assess when work is complete on the product Increment.

The Definition of Done is defined by the Scrum Team, not by the Product Owner alone. The Scrum Team consists of one Product Owner, one Scrum Master, and Developers. They are all accountable for creating a valuable, useful, and potentially releasable product Increment each Sprint.

The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for managing and refining the Product Backlog, collaborating with the stakeholders and the Developers, and ordering the items in a way that best achieves goals and missions. The Product Owner represents the interests of everyone with a stake in the product and ensures that the Scrum Team works on the right things at the right time.

The Developers are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. The Scrum Master does this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization.

The Definition of Done may vary from one Scrum Team to another, depending on the context and domain of work. However, it must be consistent within one team. If there are multiple Scrum Teams working on one product, they must share a common Definition of Done. If there is an organizational standard for a Definition of Done, all Scrum Teams must follow it as a minimum.
