### NEW QUESTION # 140

Counselors who follow a universal approach in which all clients, regardless of personal attributes, are treated the same are

- A. lacking cultural value boundaries.
- **B. engaging in unethical behavior.**
- C. providing equal opportunities.

**Answer: B**

Explanation:

Treating all clients exactly the same, without consideration for their unique cultural backgrounds, is not culturally competent and is considered unethical according to professional codes of ethics. Counselors are ethically bound to provide culturally responsive services. "A universal or color-blind approach fails to recognize individual and cultural differences, and such practice is considered unethical." Reference: Helwig, A. A. (2020). CPCE Study Guide and Review; American Counseling Association (ACA) Code of Ethics.

### NEW QUESTION # 141

In addition to the validity and reliability of a test, appropriateness is another important consideration in the evaluation of a test. The most common limiting factor in appropriateness is the test's

- **A. reading level.**
- B. instructions.
- C. time limit.

**Answer: A**

Explanation:

Reading level is often the most common limiting factor in the appropriateness of a test. Even a test that is valid and reliable may not be appropriate if the test-taker cannot read or comprehend the questions due to an advanced or inappropriate reading level. Appropriateness ensures that test content is accessible and understandable to the intended test population. "A test's appropriateness is frequently compromised by the reading level required, which can limit accurate assessment for some examinees." Reference: Helwig, A. A. (2020). CPCE Study Guide and Review; Cohen, R. J., & Swerdlik, M. E. (2018). Psychological Testing and Assessment.

- A. the Global Assessment of Functioning
- B. the Vanderbilt Assessment Scale
- **C. the initial interview**

**Answer: C**

Explanation:

The initial interview is considered the cornerstone of clinical assessment. It provides essential context for understanding and interpreting the results of other assessment tools, allowing the counselor to gather background information, clarify presenting problems, and build rapport. "The initial interview forms the basis for case conceptualization and the integration of subsequent assessment data." Reference: Helwig, A. A. (2020). CPCE Study Guide and Review; Gladding, S. T. (2018). Counseling: A Comprehensive Profession (8th Edition).
