Install required mail currency code to save hours.

IIA Business Knowledge for Internal Auditing Sample Questions (Q58-Q63):

NEW QUESTION # 58

Antitrust laws are intended to:

- **A. Ensure a free and competitive market in which consumer demand dictates prices.**
- B. Prohibit entities in the same industry from engaging in joint ventures.
- C. Establish set profit percentages for entities in regulated industries.
- D. Require entities in regulated industries to share any patent rights with other entities in that industry.

Answer: A

Explanation:

Antitrust laws are designed to promote more efficient allocation of resources, greater choice for consumers, greater business opportunities, fairness in economic behavior, and avoidance of concentrated political power resulting from economic power. Competition results in greater output and lower prices than other market structures.

NEW QUESTION # 59

An entity has a foreign-currency-denominated trade payable, due in 60 days. To eliminate the foreign currency exchange-rate risk associated with the payable, the entity could:

- A. Wait 60 days and pay the invoice by purchasing foreign currency in the spot market at that time.
- **B. Buy foreign currency forward today.**
- C. Borrow foreign currency today, convert it to domestic currency on the spot market, and invest the funds in a domestic bank deposit until the invoice payment date.
- D. Sell foreign currency forward today.

Answer: B

Explanation:

The entity can arrange to purchase the foreign currency today rather than in 60 days by buying the currency in the forward market. This hedging transaction will eliminate the exchange-rate risk associated with the trade payable.

NEW QUESTION # 60

Because of a defect discovered in its seat belts in December Year 1, an automobile manufacturer believes it is probable that it will be required to recall its products. The final decision on the recall is expected to be made in March Year 2. The cost of the recall is reliably estimated to be US \$2.5 million. How should this information be reported in the December 31, Year 1, financial statements?

- A. As an adjustment of the opening balance of retained earnings equal to US \$25 million
- B. As an appropriation of retained earnings of US \$25 million.
- **C. As a loss of US \$2.5 million and a provision of US \$2.5 million.**
- D. It should not be disclosed because it has not yet happened.

Answer: C

Explanation:

A provision is a liability of uncertain timing or amount. Recognition of provisions is appropriate when the entity has a legal or

constructive present obligation resulting from a past event called an obligating event), it is probable that an outflow of economic benefits will be necessary to settle the obligation, and its amount can be reliably estimated. Consequently, the company must recognize a loss and a liability for US \$2.5 million.

NEW QUESTION # 61

In which of the following organizational structures does total quality management (TQM) work best?

- A. Teams of people from the same specialty.
- B. Specialists working individually.
- C. Teams of people from different specialties.
- D. Hierarchical.

Answer: C

Explanation:

TQM advocates replacement of the traditional hierarchical structure with teams of people from different specialties. This change follows from TQM's emphasis on empowering employees and teamwork. Employees should have proper training, necessary information, and the best tools; be fully engaged in the decision process; and receive fair compensation. If such empowered employees are assembled in teams of individuals with the required skills, TQM theorists believe they will be more effective than people performing their tasks separately in a rigid structure.

NEW QUESTION # 62

The company has learned that a new direct material is available that will increase the quality of its product. The new material will increase the direct materials costs by US \$3 per unit. The company will increase the selling price of the product to US \$50 per unit and increase its marketing costs by US \$1,575,000 to advertise the higher-quality product. The number of units the company has to sell to earn a 10% before-tax return on sales is:

- A. 425,000 units
- B. 478,125 units
- C. 346,875 units
- D. 337,500 units

Answer: B

Explanation:

Pretax profit (10% of dollar sales) equals dollar sales minus total fixed costs increased by US \$1,575,000 of marketing costs, minus total variable costs increased by US \$3 per unit. Unit sales S therefore equal 478,125 units.

NEW QUESTION # 63
