## Salesforce Consumer-Goods-Cloud-Accredited-Professional Exam Practice Test Questions Updated on a Regular Basis

Up to now, there are three versions of Consumer-Goods-Cloud-Accredited-Professional exam materials for your choice. So high-quality contents and flexible choices of Consumer-Goods-Cloud-Accredited-Professional learning mode will bring about the excellent learning experience for you. Though the content of these three versions of our Consumer-Goods-Cloud-Accredited-Professional study questions is the same, their displays are totally different. And you can be surprised to find that our Consumer-Goods-Cloud-Accredited-Professional learning quiz is developed with the latest technologies as well.

## Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q49-Q54):

### NEW QUESTION # 49

Which two of the following allows a Consumer Goods Cloud user to review the vision detection accuracy?

- A. Object Metrics
- **B. Shelf Metrics**
- C. Planogram Metrics
- D. Goods Metrics
- **E. Model Metrics**

**Answer: B,E**

Explanation:

Shelf Metrics allow a user to review the vision detection accuracy by comparing the actual shelf image with the expected planogram image. Model Metrics allow a user to review the vision detection accuracy by showing the confidence score and the number of detections for each object in the shelf image. QUES

#### NEW QUESTION # 50

Northern Trail Outfitters(NTO) places a high value on understanding how their end capes are performing. What should be recommended to NTO to ensure they can capture this data?

- A. Make In-Store locations as a record type on the Retail Store Object to capture the KPIs
- B. Make a Custom object for In-Store location on the Retail Store Object to capture KPIs
- C. Make In-Store Locations as a record page on the In-Store Location Object to capture the KPIs
- D. Make a separate set of KPIs specifically for capturing the endcap In-Store Location

Answer: A

#### NEW QUESTION # 51

A Field Sales Manager to trying to determine which stores have a decline in Retail Execution KPIs and therefore need attention. Which Tableau CRM for Consumer Goods Cloud dashboard can provide the required data?

- A. Lost Visit Store Performance Dashboard
- B. Team Performance Dashboard
- C. Product Performance Dashboard
- D. Store Performance Dashboard

Answer: D

Explanation:

The Tableau CRM for Consumer Goods Cloud dashboard that can provide the required data for a Field Sales Manager to determine which stores have a decline in Retail Execution KPIs and therefore need attention is the Store Performance Dashboard. The Store Performance Dashboard shows the performance and compliance of the retail stores in relation to their KPIs and promotions. The dashboard allows users to filter and analyze the data by various dimensions, such as store group, store location, product category, or visit date. The dashboard also displays metrics such as store compliance score, store revenue, store visits, and promotion compliance score. By using this dashboard, a Field Sales Manager can identify which stores are underperforming or non-compliant and take appropriate actions to improve their performance. #### NEW QUESTION # 52

A communications company wants to improve their quote-to-order journey experience. The journey has several steps, which include selecting products and services, and integration with the inventory system for device reservation. They want to create a modern, multi-channel experience.

What approach should a Consultant take during planning to ensure optimal development and time to market?

- A. Plan for three user stories running sequentially: UX Design first, Device Reservation API second, and Inventory System Integration last.
- B. Plan for three user stories running in parallel: UX Design, Device Reservation API, and Inventory System Integration. UX only requires the API information to be complete.
- C. UX experience is the most important. Fully design and validate the UX before designing the integration step.
- D. Knowing the exact data exchanged in integration is an input to the UX design. Detailed design of the integration step is required before UX design can start.

Answer: B

Explanation:

In Salesforce Industries (Vlocity) project methodology, an optimal quote-to-order implementation requires parallel workstreams, especially when designing multi-channel digital experiences that rely on backend APIs such as inventory reservation or device

allocation. Public Salesforce implementation practices emphasize that UX design should begin early and only needs high-level API contracts, not full backend development, to progress. This is because modern telecom journeys-product selection, service configuration, device reservation, and inventory validation-depend on microservices exposed through TMF-style APIs or custom integration layers.

Salesforce recommends decomposing work into parallel user stories to accelerate time to market:

UX Design → Driven by user flows, wireframes, and component behavior

Device Reservation API → Defines the interface and payload shapes

Inventory System Integration → Implements backend orchestration

This approach enables the UX team to build using mocked or stubbed APIs, ensuring that design decisions aren't delayed while backend services are still being implemented. This directly aligns with option D, which reflects Salesforce's agile implementation strategy.

Options A and B incorrectly assume UX must wait for full integration design, which slows delivery. Option C suggests sequential workstreams, which Salesforce explicitly discourages due to increased cycle time.

Thus, D is the best match.

### NEW QUESTION # 53

Northern Trail Outfitters (NTO) has a 7-tier product hierarchy that they use to track products in their Enterprise Resource Planning (ERP) platform. Assuming this functionality is available in the Consumer Goods Cloud, what should a consultant at NTO determine which tier of data contains the information required to set up products in Consumer Goods Cloud INTO wishes to measure share-of-shelf?

- A. There is no need to ask a question choose level 7
- B. What tier has data describing the product with?
- C. Which tier has the data you trust most?
- D. Which tier describes stock keeping units (SKL)?

**Answer: D**

Explanation:

A consultant at NTO should determine which tier of data contains the information required to set up products in Consumer Goods Cloud by asking which tier describes stock keeping units (SKU). A SKU is a unique identifier for a product that can be scanned and tracked in inventory systems. SKU is the level of data that is needed to measure share of shelf, which is the percentage of space occupied by a product or brand on a shelf.
