

HPE7-J02 Practice Exam Fee - HPE7-J02 Study Material

BTW, DOWNLOAD part of ExamBoosts HPE7-J02 dumps from Cloud Storage: https://drive.google.com/open?id=1q7kY2bioEETEzdrgrxVySSmOpCtR5cO_

It may be a contradiction of the problem, we hope to be able to spend less time and energy to take into account the test HPE7-J02 certification, but the qualification examination of the learning process is very wasted energy, so how to achieve the balance? The HPE7-J02 Exam Prep can help you make it. With the high-effective HPE7-J02 exam questions, we can claim that you can attend the exam and pass it after you focus on them for 20 to 30 hours.

The best investment for the future is improving your professional ability and obtaining HPE7-J02 certification exam will bring you great benefits for you. For most IT candidates, passing HPE7-J02 actual test will make you stand out from the other people in the interview and offer you more opportunity. The matter now is how to prepare the HPE7-J02 Questions and answers in a short time, our HPE7-J02 study guide is the best effective way to get through the exam and obtain the certification.

100% Pass Quiz 2026 HP HPE7-J02: Advanced HPE Storage Integrator Solutions Written Exam Newest Practice Exam Fee

Before we decide to develop the HPE7-J02 preparation questions, we have make a careful and through investigation to the customers. We have taken all your requirements into account. Firstly, the revision process is long if you prepare by yourself. If you collect the keypoints of the HPE7-J02 exam one by one, it will be a long time to work on them. Secondly, the accuracy of the HPE7-J02 Exam Questions And Answers is hard to master. Because the content of the exam is changing from time to time. But our HPE7-J02 practice guide can help you solve all of these problems.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

Refer to the exhibit.

A junior engineer is expanding a StoreOnce deployment for a law firm with a hybrid environment. The customer already has Veeam backing up to StoreOnce 3660 Gen 4 at both primary and secondary sites. They want to add Cloud Bank Storage (CBS) to archive into AWS Glacier tier for compliance. The junior engineer has added Cloud Bank licenses for the 80TB onsite capacity at the primary office.

Question: What does the junior engineer need to add to enable this scenario?

- A. Federated Management
- B. Catalyst License for StoreOnce-B
- C. **Detach License on StoreOnce-A**
- D. Cloud Bank Storage for AWS Glacier

Answer: C

NEW QUESTION # 27

Two HPE Alletra 6000 arrays are configured for peer persistence between datacenters A and B, which have a fiber distance of 50km (31mi). The datacenter B hardware will be relocated to a new location that will increase the fiber distance to 150km (93mi). Which condition is valid once the relocation is finished?

- A. The fiber distance exceeds the distance supported for peer persistence setup.
- B. The peer persistence replication links need to be changed to RC transport.
- C. The peer persistence setup needs to be changed to active peer persistence.
- D. **The peer persistence configuration is supported, when latency remains <10ms.**

Answer: D

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Peer Persistence is supported over distances of up to 150-200 km, as long as the round-trip latency is $<10\text{ms}$. Therefore, even after relocation to 150km, Peer Persistence remains supported provided latency requirements are met.

Distractors:

B: RC (Remote Copy) transport is already the underlying technology, but no change is required.

C: Peer Persistence is already an active-active design; no change to "active" mode is needed.

D: Distance does not exceed the supported range; only latency matters.

Key Concept: Latency $<10\text{ms}$ is the critical requirement for Peer Persistence.

Reference: HPE Alletra 6000/Primera Peer Persistence Best Practices.

NEW QUESTION # 28

You are migrating your customer's virtualization platform from an old third-party storage array to a newly installed HPE Alletra MP B10000 array. You are using HPE Zerto Move for the migration.

Which statement is correct when using HPE Zerto Move compared to the typical Failover feature?

- A. **You can keep the source VMs after the migration**
- B. The migration results in an RPO and RTO of seconds
- C. The Zerto Checkpoint (and RPO) is user-selectable during the move
- D. The source VMs are deleted automatically after the migration

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

When using Zerto Move, unlike a typical disaster recovery failover, the migration process allows the source VMs to be retained after cutover. This is useful when testing or validating the migration. In contrast, failover scenarios typically assume the source environment has failed or is decommissioned. Therefore, keeping source VMs is a differentiator for Move.

Distractors:

A: Checkpoints and RPO are controlled by Zerto replication but are not selectable per migration cutover in this way.

B: Source VMs are not deleted automatically; this is intentionally avoided to allow rollback.

D: While Zerto does provide low RPO/RTO (seconds to minutes), this applies mainly to DR failover, not migration cutovers.

Key Concept: Zerto Move vs Zerto Failover semantics.

Reference: HPE Zerto Move Technical Overview, HPE Zerto Replication & Migration Best Practices.

NEW QUESTION # 29

A customer is replacing their HPE 3PAR 8200 Peer Persistence setup with Alletra 6000. In a recent audit, they were warned that the Quorum Witness VM was missing security updates.

How would you respond regarding the new setup?

- A. Quorum witness appliance security patch updates follow the array release train updates.
- B. Quorum witness appliance can be set to automatically download and apply available updates.
- **C. Quorum witness is deployed as a SaaS option, and security updates are applied automatically.**
- D. Quorum witness is installed as a service on a supported Linux server, which can be updated as needed.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

With Alletra and Primera Peer Persistence, the Quorum Witness is no longer a self-hosted VM. It is delivered as a cloud-based SaaS service managed by HPE. This eliminates customer responsibility for patching and ensures HPE automatically applies updates and security fixes. This resolves the audit concern.

Distractors:

A: Applies to older 3PAR environments, not Alletra/Primera.

C/D: Quorum Witness is no longer an appliance - it is SaaS managed, so these don't apply.

Key Concept: Alletra Quorum Witness is SaaS-managed, removing patching responsibility.

Reference: HPE Alletra Peer Persistence and Cloud Quorum Witness Guide.

NEW QUESTION # 30

A local startup company has grown rapidly and now needs block storage for enterprise workloads. They are virtualized with VMware and have a small IT staff. They are evaluating an HPE Alletra MP and a Pure FlashArray //X90R4.

Environment:

VMware 8.0

Cisco switches

Dell servers

HPE servers

What statement about HPE should you point out as a differentiator?

- **A. HPE provides full-stack visibility up to the app layer with prescriptive, actionable recommendations.**
- B. HPE can natively tier data on a software-only deployment.
- C. HPE has live workload migration via the ActiveWorkload feature, based on a stretch cluster.
- D. HPE has the ability to disable garbage collection and overhead to meet workload requirements.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra with InfoSight provides end-to-end visibility from infrastructure through to virtual machines and applications. It offers prescriptive, AI-driven recommendations to simplify management - a key differentiator for startups with small IT staff. Pure arrays do not offer the same level of integrated, cross-stack predictive analytics.

Distractors:

B: "ActiveWorkload" is not an HPE feature - HPE uses Peer Persistence for stretch clusters.

C: Garbage collection is managed automatically in HPE arrays; disabling it is not supported.

D: Data tiering is not natively provided as "software-only" - HPE uses GreenLake and Alletra services.

Key Concept: InfoSight = predictive analytics and app-to-infra visibility differentiator.

Reference: HPE InfoSight for Alletra Datasheet.

NEW QUESTION # 31

.....

ExamBoosts HP HPE7-J02 Exam Training materials can help you to come true your dreams. Because it contains all the questions of HP HPE7-J02 examination. With ExamBoosts, you could throw yourself into the exam preparation completely. With high quality training materials by ExamBoosts provided, you will certainly pass the exam. ExamBoosts can give you a brighter future.
