COBIT-Design-and-Implementation学習範囲、COBIT-Design-and-Implementation合格問題

COBIT-Design-and-Implementation試験ガイドのバージョンは、学習レベルと条件が異なるすべての学習者に適合するように継続的に改善されています。クライアントは、携帯電話、ラップトップ、タブレットコンピューターなどの電子機器で、COBIT-Design-and-Implementation試験ガイドのAPP/オンラインテストエンジンを使用できます。アフターサービスは非常に配慮されており、クライアントはCOBIT-Design-and-Implementationクイズ教材の価格と機能についてオンラインカスタマーサービスに相談できます。そのため、COBIT-Design-and-Implementation認定ファイルは完璧に近いものであり、クライアントが使用した後の大きな驚きです。

ISACA COBIT Design and Implementation Certificate 認定 COBIT-Design-and-Implementation 試験問題 (Q84-Q89):

質問 # 84

Which of the following is the MOST likely trigger event for an EGIT improvement or implementation program?

- A. An enterprise's marketing department has implemented its own IT solutions independent from the IT function.
- **B. The enterprise has failed to meet new privacy regulations and is heavily fined.**
- C. An enterprise is announcing a merger with one of its major competitors.
- D. The enterprise is faced with a shortage of qualified IT staff.

正解: B

解説:

According to COBIT 2019 Implementation Guide:

"Trigger events for initiating or improving EGIT include regulatory noncompliance, significant operational failures, or events that expose governance weaknesses." Being fined for failing privacy regulations clearly exposes governance and compliance gaps-prompting the need to implement or improve EGIT to avoid future regulatory or reputational damage.

Reference:COBIT 2019 Implementation Guide, Section 2.1

質問 # 85

Which of the following is an example of a specific focus area to which COBIT could be customized?

- A. Capability levels
- B. Enterprise goals
- **C. Cybersecurity**
- D. Information items

正解: C

解説:

An example of a specific focus area to which COBIT could be customized is "cybersecurity." COBIT 2019 allows for customization to address specific governance and management needs, and cybersecurity is a critical area that often requires tailored governance practices.

COBIT 2019 includes the concept of focus areas, which are specific governance topics that require a tailored approach.

Cybersecurity is a prime example of a focus area because it encompasses a range of activities and controls that need to be integrated into the overall governance framework.

Cybersecurity Focus Area in COBIT 2019:

* Tailoring Governance Practices:COBIT 2019 can be adapted to address specific cybersecurity needs, ensuring that the enterprise has robust policies, processes, and controls in place to protect its information assets.

* Aligning with Industry Standards:Customizing COBIT for cybersecurity helps align IT governance with industry standards such as ISO/IEC 27001, NIST Cybersecurity Framework, and others.

* Risk Management:Focused cybersecurity governance ensures that risks are identified, assessed, and mitigated effectively.

* Compliance:Helps ensure compliance with regulatory requirements related to cybersecurity, such as GDPR, CCPA, and others.

COBIT 2019 Framework References:

* COBIT 2019 Framework: Introduction and Methodology, Chapter 5:Discusses the concept of focus areas and how COBIT can be customized to address specific governance topics, including cybersecurity.

* COBIT 2019 Design Guide, Chapter 4:Provides guidance on how to tailor COBIT to specific focus areas, ensuring relevant and effective governance practices.

Customizing COBIT to focus on cybersecurity ensures that the enterprise can address specific security challenges, align with best practices, and maintain robust governance over its cybersecurity initiatives, making it the best choice among the given options.

質問 # 86

Which of the following needs to be resolved when finalizing the initial governance design?

- A. Misaligned enterprise and IT goals
- B. Budgeted versus actual resources
- **C. Conflicting inputs and priorities**
- D. Objectives exceeding enterprise appetite

正解: C

解説:

The initial governance design process involves gathering inputs from various stakeholders, including business units, IT, and external partners. These inputs can sometimes conflict, and it is crucial to resolve these conflicts to create a unified governance system that supports enterprise objectives.

Key Steps:

* Stakeholder Alignment: Ensuring that all stakeholders are on the same page regarding priorities and objectives.

* Conflict Resolution: Addressing and resolving any discrepancies or conflicts in inputs to ensure a consistent and aligned governance system.

* Prioritization: Establishing clear priorities to guide decision-making and resource allocation.

COBIT 2019 Framework References:

* COBIT 2019 Design Guide, Chapter 4: Discusses the importance of resolving conflicting inputs and establishing a cohesive governance framework that aligns with enterprise priorities.

* COBIT 2019 Framework: Governance and Management Objectives: Emphasizes the need for alignment between IT and enterprise goals, requiring the resolution of any conflicting priorities.

Resolving conflicting inputs and priorities ensures that the governance system is well-aligned and effective in achieving enterprise goals.

質問 # 87

When considering the technology adoption strategy design factor, and the design factor value is first mover, which of the following should be a governance objective priority?

- A. Ensured risk optimization (EDM03)
- B. Ensured resource optimization (EDM04)
- C. Ensured benefits delivery (EDM02)
- D. Ensured stakeholder engagement (EDM05)

正解: C

解説:

According to the COBIT 2019 Design Guide:

"A first mover in technology adoption will prioritize benefits realization, ensuring that the value from early adoption is achieved effectively." Thus, Ensured benefits delivery (EDM02) aligns best with a first-mover approach.

質問 # 88

After a bank experienced cyber attacks that severely impacted operations and raised questions from regulators, the board mandated the newly hired CIO to implement global best practices to mitigate this risk. The CIO is using COBIT 2019 to tailor the governance system and has identified high threat landscape as a critical design factor. Which of the following should the CIO identify NEXT?

- A. Security-related processes
- B. Risk management practices
- C. Technology personnel
- D. IT security solutions

正解: A

解説:

After identifying a high threat landscape as a critical design factor, the CIO should next identify security-related processes. This step ensures that the governance system includes robust processes to manage and mitigate security risks.

In a high-threat landscape, focusing on security-related processes is essential to protect the enterprise's information assets and mitigate potential risks. These processes include incident management, vulnerability management, and access control, among others.
