ZDTA Practice Exam Online | ZDTA Latest Dumps Sheet

Get the test ZDTA certification requires the user to have extremely high concentration will all test sites in mind, and this is definitely a very difficult. Our ZDTA learning questions can successfully solve this question for you for the content are exactly close to the changes of the ZDTA Real Exam. When you grasp the key points, nothing will be difficult for you anymore. Our professional experts are good at compiling the ZDTA training guide with the most important information. Believe in us, and your success is 100% guaranteed!

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 2	• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 3	• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 4	• Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response.| Data Protection Services
Topic 5	• Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.
Topic 6	• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.

Zscaler Digital Transformation Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50
An organization has more than one ZIA instance, each on different clouds. The organization is using the same login domain for both and upon login users are given this menu in ZCC asking which cloud they would like to join. What steps could an Administrator take to avoid having this menu appear?

- A. Customize an MSI version of the ZCC file specifying the USERDOMAIN variable.
- B. Customize an MSI version of the ZCC file specifying the CLOUDNAME variable.
- C. Create only one SAML integration with the desired ZIA instance.
- D. Federate the login domain between two different IDP instances.

Answer: B

Explanation:
To avoid prompting users with a cloud selection menu in the Zscaler Client Connector (ZCC), administrators should customize the MSI installation package with the CLOUDNAME parameter. This setting ensures the ZCC automatically connects to the correct ZIA cloud instance without user intervention. The CLOUDNAME corresponds to the designated cloud name for the organization's ZIA tenant, effectively bypassing the prompt.
This is outlined under Zscaler's deployment and configuration instructions for ZCC.

NEW QUESTION # 51
What is the preferred method for authentication to access oneAPI?

- A. Security Assertion Markup Language (SAML)
- B. System for Cross-domain Identity Management (SCIM)
- C. OpenID Connect (OIDC)
- D. Transport Layer Security (TLS)

Answer: C

Explanation:
The preferred method for authentication to access Zscaler's oneAPI isOpenID Connect (OIDC). OIDC is an identity layer on top of the OAuth 2.0 protocol and provides a modern, secure, and scalable way to authenticate users and services interacting with the API.
The study guide notes that OIDC supports flexible and secure authentication, making it the recommended choice for API access management within Zscaler's platform.

NEW QUESTION # 52
The Zscaler platform can protect against malicious files, URLs and content based on a number of criteria including reputation type. What type of checking is virus scanning?

- A. Site reputation
- B. Malware protection
- C. SHA-256 hashing
- D. File reputation

Answer: B

Explanation:
Virus scanning in the Zscaler platform is part of its Malware Protection capability, which inspects file content against known virus signatures and behaviors.

NEW QUESTION # 53
What does TLS Inspection for Zscaler Internet Access secure public internet browsing with?

- A. Intermediate certificates are created for each client connection.
- B. Storing connection streams for future customer review.
- C. Removing certificates and reconnecting client connection using HTTP.
- D. Logging which clients receive the original webserver certificate.

Answer: A

Explanation:
TLS Inspection in Zscaler Internet Access secures public internet browsing bycreating intermediate certificates for each client connection. This Man-In-The-Middle approach enables Zscaler to decrypt and inspect encrypted traffic for threats and policy compliance while still maintaining secure connections with the client. The intermediate certificate acts as a trusted entity between the client and the real server during inspection.

NEW QUESTION # 54
An administrator wants to allow users to access a wide variety of untrusted URLs. Which of the following would allow users to access these URLs in a safe manner?

- A. Zscaler Client Connector
- B. App Connector
- C. Zscaler Private Access
- D. Browser Isolation

Answer: D

Explanation:
Browser Isolationenables secure access to potentially malicious or untrusted websites by rendering web pages in a remote

containerized environment. This isolates any harmful content away from the user's device, ensuring safe browsing without compromising endpoint security. This approach is especially effective for unknown or risky URLs where traditional content filtering might be insufficient.
