NEW QUESTION # 12

Cloud Kicks asked the app builder to insert a list of 25,000 records using deduplication for the Race_Track__c customobject. Which tool should be used?

- A. Lightning Object Creator
- B. Data Loader
- C. Import Wizard
- D. Schema Builder

Answer: B

Explanation:

Explanation

To insert a list of 25,000 records using deduplication for the Race_Track__c custom object, an app builder should use Data Loader. Data Loader is a tool that allows users to insert, update, delete, or export large amounts of data in Salesforce. Data Loader can also perform deduplication by matching records based on external ID fields or Salesforce record IDs. [Source]

NEW QUESTION # 13

What is the process to upgrade an unmanaged package that is currently installed in production?

- A. Install the new version to a Developer org then deploy to production.
- B. Uninstall the current version and install the new version.
- C. Click the update link on the Installed Packages page.
- D. Use the Install Wizard to install the upgrade to production.

Answer: C

Explanation:

The correct method to upgrade an unmanaged package that is installed in a production environment is to use the update link provided on the Installed Packages page. This process ensures that any modifications or additions in the package are properly integrated without the need to uninstall the previous version, thus preserving existing customizations and data.

* A: Uninstalling removes all associated data and customizations, which is not advisable.

* B: The Install Wizard is used for initial installations, not upgrades.

NEW QUESTION # 15

Sales reps want the ability to see who can view their account records and how the people have access.

Which button should the app builder add to the Account page layout to enable this?

- A. Sharing Hierarchy
- B. Fait
- C. New Task
- D. Sharing

Answer: D

Explanation:

The "Sharing" button should be added to the Account page layout to allow sales reps to view the sharing details of an account record. This button enables users to see how access to the record is granted via roles, groups, and manual sharing.

A: Sharing Hierarchy provides a view of the role hierarchy but does not specifically detail record access.

B: New Task is unrelated to sharing visibility.

D: "Fait" is not recognized in Salesforce context as a valid component or feature. Reference: Sharing an Account in Salesforce Help Documentation
