But it is true. After you use our dumps, you will believe what I am saying.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI• CD pipelines.
Topic 2	<ul style="list-style-type: none">• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.

Topic 3	<ul style="list-style-type: none">• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.

In our study materials, you can find the right one for you. At the same time, the GH-100 Exam Prep is constantly updated. After you have finished learning a part, you can choose a new method according to your own situation. Our study materials are so easy to understand that no matter who you are, you can find what you want here.

Microsoft GitHub Administration Sample Questions (Q18-Q23):

NEW QUESTION # 18

What is the potential consequence of enabling multiple rulesets that apply to the same branch in a repository?

- A. Rulesets will override each other, leading to unpredictable behavior
- B. Only the most recently created ruleset will be enforced
- C. Only organization-level rulesets are enforced over repository-level ones
- D. All applicable rulesets will be evaluated, and their combined rules enforced

Answer: D

Explanation:

If you enable multiple rulesets that target the same branch, GitHub will evaluate every matching ruleset and enforce the aggregate of their rules - so all constraints from all applicable rulesets apply.

NEW QUESTION # 19

An organization wants to share a single API key required for their Actions workflows. They need to restrict its use to only a subset of repositories. Where should they configure the secrets to minimize maintenance?

- A. Repository secrets
- B. Development environment secrets
- C. Environment secrets
- D. Organization secrets

Answer: D

Explanation:

By defining the API key as an organization secret, you centralize management and can grant access only to the subset of repositories you choose - eliminating per-repo duplication while enforcing the desired scope.

NEW QUESTION # 20

You need to contact GitHub Premium Support. What are valid reasons for submitting a support ticket? (Each answer presents a complete solution. Choose two.)

- A. outages on GitHub.com affecting core Git functionality
- B. business impact from security issues within your organization

- C. license renewal
- D. hardware setup issues or errors

Answer: A,B

Explanation:

Business-impact security issues (for example, a critical vulnerability affecting your organization) are classified as High-priority tickets and are covered under your Premium Support SLA.

Outages on GitHub.com that disrupt core Git or web application functionality trigger Urgent-priority responses under Premium Support's SLA.

NEW QUESTION # 21

Which of the following is a key benefit of using GitHub Marketplace Apps in an enterprise?

- A. They guarantee no downtime during enterprise GitHub maintenance windows
- **B. They often include integrations with external services, reducing the need for custom code**
- C. Apps eliminate the need for GitHub Actions entirely
- D. All apps come pre-approved by GitHub's internal security team

Answer: B

Explanation:

GitHub Marketplace Apps come with built-in integrations to external services - so you can plug in things like CI servers, code-quality scanners, or deployment tools without writing and maintaining custom connectors.

NEW QUESTION # 22

When a token is used to perform actions across different GitHub resources, how is this reflected in audit logs?

- A. The audit log stores only the token name and not its actions
- **B. Each API action made with the token generates a separate audit log entry**
- C. Only the first repository accessed is recorded
- D. GitHub creates a ZIP archive of all token activity

Answer: B

Explanation:

Each API call authenticated with a token generates its own audit-log event, so you'll see a distinct entry for every action performed across different resources, each annotated with the token's hashed ID, actor, and source IP.

NEW QUESTION # 23

.....

No matter you are exam candidates of high caliber or newbies, our Microsoft GH-100 exam quiz will be your propulsion to gain the best results with least time and reasonable money.
