

# FCP\_FSA\_AD-5.0 Official Study Guide | Exam FCP\_FSA\_AD-5.0 Simulator Online

It is worth mentioning that, the simulation test is available in our software version. With the simulation test, all of our customers will get accustomed to the FCP\_FSA\_AD-5.0 exam easily, and get rid of bad habits, which may influence your performance in the real FCP\_FSA\_AD-5.0 exam. In addition, the mode of FCP\_FSA\_AD-5.0 learning guide questions and answers is the most effective for you to remember the key points. During your practice process, the FCP\_FSA\_AD-5.0 test questions would be absorbed, which is time-saving and high-efficient.

## Fortinet FCP\_FSA\_AD-5.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Integration: This domain explains how to integrate FortiSandbox within the Fortinet Security Fabric and with third-party tools, as well as identifying ATP deployments and resolving integration-related issues.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deployment and system settings: This domain covers understanding FortiSandbox deployment within different stages of the Cyber Kill Chain, along with configuring system settings, high availability (HA) clusters, and troubleshooting system-related issues.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Results analysis: This section involves understanding common attack vectors, analyzing malware behavior, and interpreting scan job reports to assess threats and make informed security decisions.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Scanning and rating components: This section focuses on FortiSandbox scanning mechanisms, including scanning components, managing guest virtual machines, and configuring scan options to properly analyze and rate suspicious files.</li></ul>

## Exam FCP\_FSA\_AD-5.0 Simulator Online - Exam FCP\_FSA\_AD-5.0 Simulator Fee

There is no such excellent exam material like our PassReview FCP\_FSA\_AD-5.0 exam materials. We not only provide all candidates with most reliable guarantee, but also have best customer support. Our FCP\_FSA\_AD-5.0 exam material's efficient staff is always prompt to respond you. If you have any doubts about our exam materials and need detailed answer, you can send emails to our customers' care department. If you are in hurry, you can consult our FCP\_FSA\_AD-5.0 exam material's online customer service. We will solve your problem as soon as possible. Our customer support is available for you 24/7. 365 days a Year. Our PassReview FCP\_FSA\_AD-5.0 Exam Materials have managed to build an excellent relationship with our users through the mutual respect and attention we provide to everyone. We believed that you will pass the FCP\_FSA\_AD-5.0 exam in the first attempt without any obstacles, and will get your ideal job.

## Fortinet FCP - FortiSandbox 5.0 Administrator Sample Questions (Q17-Q22):

### NEW QUESTION # 17

You are asked to create an 802.3ad interface on FortiSandbox with port 2 and port 4. However, when attempting to make the configuration change, you discover that you cannot select port 4 for the aggregate bonding. What are two reasons for this issue? (Choose two answers)

- A. Port 4 is a sniffer interface.
- B. Port 4 is an administration interface.
- C. Port 4 does not have an IP address.
- D. Port 4 is an api interface.

**Answer: B,D**

Explanation:

From the Deployment and System Settings lesson, the Study Guide states:

"Other ports, with the exception of port3, can also be configured as management ports from CLI."

"You can set additional ports as management port using the CLI command shown on this slide." From the Lab Guide (Exercise 4 - Using Inline Scanning):

"FortiGate and FortiSandbox communicate through port 4443. Management or API ports grant access through port 4443."

"Enter the following command to enable API access on port2: set api-port port2" Ports that are designated as either administration interfaces or API interfaces cannot be selected for 802.3ad aggregate bonding because:

Option A - Port 4 configured as an administration interface is reserved for management traffic and cannot be repurposed for link aggregation

Option C - Port 4 configured as an API interface is dedicated for API communication (port 4443) and is similarly restricted from being used in aggregate bonding configurations

Port 4 in the Lab Guide is specifically referenced as the HA communication and management port, confirming these restrictions apply when special roles are assigned to interfaces.

### NEW QUESTION # 18

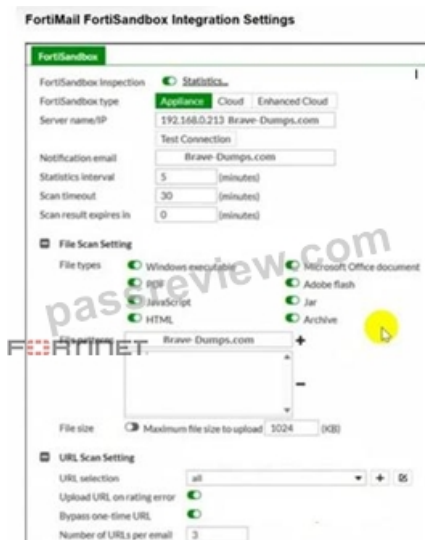

A security analyst is reviewing a scan job report that indicates a true positive match. The job report displays that the malware attempts to replace vital system executables. Which type of malware is the analyst observing? (Choose one answer)

- A. Rootkit
- B. Dropper
- C. Exploit
- D. Trojan

**Answer: A**

### NEW QUESTION # 19

Review the exhibits.

A FortiMail device is integrated with a FortiSandbox device. What is the expected behavior on FortiMail for emails that require FortiSandbox inspection? (Choose one answer)

- A. FortiMail will queue emails for up to 5 minutes during URL rating errors before submitting URLs to FortiSandbox
- B. FortiMail will deliver all emails to the destination after the emails pass all local security checks.
- **C. FortiMail will queue emails for up to 30 minutes to allow FortiSandbox to finish scanning all attachments and URLs.**
- D. FortiMail will not send attachments and URLs to FortiSandbox if their rating exists in the local cache.

**Answer: C**

Explanation:

From the FortiMail Integration lesson, the Study Guide explicitly states:

"The Scan timeout value determines how long FortiMail will wait for a response from FortiSandbox. The default is 30 minutes. So, if after 30 minutes FortiSandbox is unable to generate a verdict, FortiMail will release the email to the end user."

"SMTP is a store-and-forward protocol. This allows FortiMail to queue the email while FortiSandbox inspects all submitted samples. FortiMail will release the email only if there is a scan timeout event, or FortiSandbox returns a clean verdict." The Integration Settings exhibit clearly confirms Scan timeout = 30 minutes, and the AV Profile shows both Attachment analysis and URL analysis are enabled - meaning FortiMail will hold/queue emails for up to 30 minutes while FortiSandbox completes inspection of all attachments and URLs before taking action.

#### NEW QUESTION # 20

You notice a recent file downloaded by some end stations is exhibiting malware behavior, however, on the sandbox the file is rated clean. After further investigation you determine that only end stations using the Opera browser are being affected. What must you do to prevent these infections? (Choose one answer)

- A. Modify the scan profile to include the malware file type.
- **B. Configure a custom VM to use the same browser as the exploited end stations.**
- C. Enable the STIX/TAXII Integration setting on FortiSandbox.
- D. Change the job queue priority to process web-based files first.

**Answer: B**

Explanation:

The best answer is B. The Study Guide explains that under VM settings, "FortiSandbox has a Browser selection that allows you to choose which internet browser the VM instance will use. This helps to customize the test using an internet browser that more closely resembles the user's environment or just monitor if the test delivers different results." It also states that the default browser choices are Internet Explorer, Firefox, Chrome, and Edge. In addition, the guide says that "The VM images provided by Fortinet might not suit your needs... You can generate a custom VM that fits your organization's needs and upload it to FortiSandbox." Because only endpoints using Opera are affected, the clean verdict likely occurred because the sandbox environment does not accurately reproduce the exploited browser environment. The most effective fix is to make the sandbox environment match the real target environment more closely by using a custom VM with the same browser behavior as the affected endpoints. The other answers do not address the root cause. STIX/TAXII is unrelated, changing the scan profile file type does not solve a browser-specific exploit path, and job queue priority affects order, not analysis fidelity. Therefore, the required action is to configure a custom VM to use the

same browser as the exploited end stations.

### NEW QUESTION # 21

A FortiSandbox HA cluster is configured with the MTA adapter. What does the primary node do when it receives MTA jobs? (Choose one answer)

- A. It assigns the MTA jobs to itself
- B. It assigns the MTA jobs only to worker members.
- C. It distributes the MTA jobs to secondary members.
- **D. It distributes the MTA jobs to itself or to worker nodes.**

**Answer: D**

Explanation:

The Study Guide states that in an HA cluster, "As well as normal scanning duties, the primary node also manages the cluster, distributes jobs, and gathers the verdicts." It also says that "The worker nodes provide load balancing. The primary node distributes scan jobs to the worker nodes." From those official statements, the primary node is not just a coordinator. It also performs normal scanning duties itself, while distributing scan jobs across worker nodes for load balancing. That rules out A, because the secondary node is for failover, not normal job distribution. It rules out C, because the primary is not restricted to itself only. It also rules out D, because the primary can still perform scanning duties and is not limited to sending all jobs only to workers. Therefore, when the primary receives MTA jobs, the correct behavior is that it distributes the MTA jobs to itself or to worker nodes.

### NEW QUESTION # 22

.....

Customizable Fortinet FCP\_FSA\_AD-5.0 practice exams (desktop and web-based) of PassReview are designed to give you the best learning experience. You can attempt these FCP\_FSA\_AD-5.0 practice tests multiple times till the best preparation for the FCP - FortiSandbox 5.0 Administrator (FCP\_FSA\_AD-5.0) test. On every take, our Fortinet FCP\_FSA\_AD-5.0 practice tests save your progress so you can view it to see and strengthen your weak concepts easily.
