### PRINCE2 Agile Foundation Sample Questions (Q32-Q37):

#### NEW QUESTION # 32

Which workshop focuses on team growth and improvements in working practices?

- A. Progress review workshop
- B. Project kickoff workshop
- C. Team retrospective workshop
- D. Team planning workshop

**Answer: C**

Explanation:

The Team Retrospective Workshop is explicitly designed to facilitate team growth and continuous improvement in working practices. It is a fundamental agile practice where the team reflects on the recently completed work or sprint to identify what went well, what didn't, and what could be improved. The goal is to foster an environment of trust and openness, enabling teams to discuss challenges and successes honestly.

Retrospectives promote inspect and adapt principles by encouraging teams to continuously evaluate their processes, collaboration, and tools. They help uncover systemic issues, process bottlenecks, or interpersonal challenges that may be impeding productivity or quality. Teams use this feedback to implement actionable improvements, which can range from adjusting communication methods to refining definitions of done or ready.

This workshop supports a key agile mindset-continuous learning and improvement-which directly contributes to team maturity, performance, and morale. Importantly, retrospectives are not about assigning blame but rather about fostering a growth mindset that accepts change as an opportunity to evolve.

While Project Kickoff Workshops (A) initiate project alignment and Progress Review Workshops (C) monitor project status, they do not primarily focus on team process improvements. The Team Planning Workshop (D) is concerned with planning upcoming work, not retrospection.

In PRINCE2 Agile, retrospectives are a critical tool to blend traditional project management with agile principles by promoting regular reflection and incremental enhancements.

#### NEW QUESTION # 33

How should team working agreements be created?

- A. By team members agreeing on what should be included
- B. By the customer representative deciding what should be included
- C. By the supplier subject matter expert agreeing what should be included
- D. By the project manager deciding what should be included

**Answer: A**

### NEW QUESTION # 34

Which statement explains the setting of the cost tolerance for a project in an agile context?

- A. Cost tolerance can be fixed and flexed
- B. Cost tolerance is fixed
- C. Cost tolerance can be fixed or flexed
- **D. Cost tolerance is flexed**

### NEW QUESTION # 35

What is the purpose of the 'agile enablement' workshop?

- A. To identify, assess, and plan for risks associated with transitioning products into operations
- B. To identify, assess, and plan for risks associated with business as usual
- C. To identify, assess, and plan for risks associated with project delivery
- **D. To identify, assess, and plan for risks associated with agile adoption**

**Answer: D**

Explanation:

The Agile Enablement Workshop is specifically designed to support the transition of teams and organizations into agile ways of working. Its primary purpose is to identify, assess, and plan for risks related to agile adoption. This includes challenges like cultural resistance, skills gaps, tooling needs, and process adaptations.

The workshop ensures that these risks are proactively managed to smooth the agile transformation and increase the chances of successful agile delivery.

By focusing on agile adoption risks rather than project delivery or business as usual, the workshop addresses the foundational changes required for agility at team and organizational levels. Effective enablement workshops facilitate buy-in, identify training needs, and help tailor agile frameworks to the organization's context.

Reference: PRINCE2 Agile Foundation Version 2, Section 4.4 "Agile Enablement," and PRINCE2 Agile Study Guide, Chapter 4.

### NEW QUESTION # 36

What should the business case state about the minimum viable product (MVP)?

- **A. That the MVP must go into operational use**
- B. When the MVP will be defined
- C. That the MVP is the same as project viability
- D. What the MVP is
