問題 #87

Your system uses parallel currencies.

What is the posting indicator of the depreciation area for the parallel currency?

- A. Does not post to G/L
- B. Posts to G/L periodically
- C. Posts to G/L in real time
- D. Posts APC real time and depreciation periodically

答案： C

解題說明：

Comprehensive Detailed Explanation with all SAP S/4HANA Cloud References In SAP S/4HANA, when using parallel currencies, the system ensures that all financial transactions, including depreciation postings, are updated in real time in the General Ledger (G/L). This is made possible by the Universal Journal (ACDOCA), which integrates Asset Accounting (FI-AA) and Financial Accounting (FI-GL). Let's analyze each option to determine the correct answer.

Explanation of Each Option:

B. Posts to G/L in real time

* Correct : In SAP S/4HANA, the depreciation area for parallel currencies posts to the G/L in real time.

This is because the Universal Journal ensures that all asset-related postings, including those in parallel currencies, are immediately reflected in the General Ledger. There is no delay or need for periodic updates.

* Reference : According to SAP documentation, the Universal Journal integrates FI-AA and FI-GL, ensuring that all postings, including those for parallel currencies, occur in real time.

A. Does not post to G/L

* Incorrect : This option suggests that the depreciation area for parallel currencies does not update the G/L. However, in SAP S/4HANA, all depreciation areas, including those for parallel currencies, must post to the G/L to ensure accurate financial reporting.

* Reference : The Universal Journal mandates real-time posting for all financial transactions, eliminating the possibility of non-posting scenarios.

C. Posts APC real time and depreciation periodically

* Incorrect : This option describes a scenario from older SAP systems (e.g., SAP ECC) where periodic batch jobs were required to update depreciation postings. However, in SAP S/4HANA, both Acquisition and Production Costs (APC) and depreciation are posted to the G/L in real time due to the Universal Journal.

* Reference : SAP S/4HANA's real-time architecture ensures that all asset-related postings, including APC and depreciation, are updated instantly.

D. Posts to G/L periodically

* Incorrect : This option assumes that periodic batch processing is required to update the G/L for parallel currency depreciation. In SAP S/4HANA, all postings, including those for parallel currencies, occur in real time. Periodic processing is no longer necessary due to the Universal Journal.

* Reference : The Universal Journal eliminates the need for periodic batch jobs by ensuring real-time integration between FI-AA and FI-GL.

Key References to SAP S/4HANA Documentation:

* SAP S/4HANA Finance for Asset Accounting (FI-AA) : Explains how parallel currencies are handled in depreciation areas and their integration with the Universal Journal.

* SAP Help Portal - Universal Journal (ACDOCA) : Provides detailed guidance on how the Universal Journal ensures real-time updates across FI-AA and FI-GL.

* Depreciation Processes in SAP S/4HANA : Highlights the real-time nature of depreciation postings, including those for parallel currencies.

* Integration of FI-AA and FI-GL : Describes how the Universal Journal eliminates the need for periodic batch processing in SAP S/4HANA.
