Oracle Realistic 1Z0-1109-25 Exam Learning Free PDF Quiz

P.S. Free & New 1Z0-1109-25 dumps are available on Google Drive shared by Prep4sureExam: https://drive.google.com/open?id=1QRG2d7hh172yRN4Ak8_k_CSzaaGSLoOr

We provide you the free download and tryout of our 1Z0-1109-25 study tool before your purchase our product and we provide the demo of the product to let the client know our product fully. We provide free update to the client within one year and after one year the client can enjoy 50% discount. If clients are old client, they can enjoy some certain discount. Our experts update the Oracle Cloud Infrastructure 2025 DevOps Professional guide torrent each day and provide the latest update to the client. We provide discounts to the client and make them spend less money. If you are the old client you can enjoy the special discounts thus you can save money. So it is very worthy for you to buy our 1Z0-1109-25 Test Torrent.

Oracle 1Z0-1109-25 Exam Syllabus Topics:

Topic	Details
Topic 1	- Configuring and Managing Continuous Integration and Continuous Delivery (CI - CD): This section tests the knowledge of CI - CD Engineers and Automation Specialists in automating the software lifecycle using OCI DevOps Service. It includes managing source code repositories, configuring build - deployment pipelines, and creating artifacts for automated deployments across environments.
Topic 2	Understand DevOps Principles and Effectively Work with Containerization Services: This section of the exam measures the skills of DevOps Engineers and Cloud Architects in applying DevOps methodologies and containerization practices. It covers implementing a microservices architecture, creating Docker containers, and managing Oracle Cloud Infrastructure Registry (OCIR) and Container Instances to streamline application deployment and scalability.
Topic 3	- Enabling DevSecOps: This domain measures the skills of Security Engineers and DevSecOps Practitioners in integrating security into DevOps workflows. It includes managing encryption keys with OCI Vault, securing CI - CD pipelines, and ensuring container image security to align with DevSecOps best practices.

1Z0-1109-25 Questions [2026] - Oracle 1Z0-1109-25 Exam Dumps

Prep4sureExam releases 100% pass-rate Oracle 1Z0-1109-25 study guide files which guarantee candidates 100% pass exam in the first attempt. It is time for you to choose a valid Oracle 1Z0-1109-25 study guide, this will be your best method for clearing exam and obtain a certification. Good 1Z0-1109-25 Study Guide will be a shortcut for you to well-directed prepare and practice efficiently, you will avoid do much useless efforts and do something interesting.

Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q36-Q41):

NEW QUESTION # 36
You are a DevOps project administrator. You are creating Oracle Cloud Infrastructure (OCI) Identity and Access Management (IAM) policies that will be used in a DevOps CI/CD pipeline for deployment to an Oracle Container Engine for Kubernetes (OKE) environment.
Which OCI IAM policy can be used?

- A. Allow group <deployment pipeline> to manage devops-family in compartment <compartment name>
- B. Allow dynamic-group <deployment pipeline> to manage all-resources in compartment <compartment name>
- C. Allow dynamic-group <code repository> to manage devops-family in compartment <compartment name>
- D. Allow group <build pipeline> to manage all-resources in compartment <compartment name>

Answer: A

Explanation:
Choosen policy specifies an IAM policy allowing the group (in this case, the deployment pipeline) to manage devops-family resources within a specific compartment. The devops-family is a group of services that includes the OCI DevOps service, which is suitable for managing CI/CD pipelines, deployments, and related operations for an OKE environment.

NEW QUESTION # 37
A DevOps engineer is asked to access an Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) cluster to deploy new applications and manage existing ones.
Which two statements are true? (Choose two.)

- A. To access the cluster using kubectl, you have to set up a Kubernetes manifest file for the cluster. The kubeconfig file by default is named config and stored in the $HOME/.manifest directory.
- B. To access the cluster using kubectl, you have to set up a Kubernetes configuration file for the cluster. The kubeconfig file by default is named config and stored in the $HOME/.kube directory.
- C. Generating an API signing key pair is not required while setting up cluster access using local machine if the public key is not already uploaded in the console.
- D. When a cluster's Kubernetes API endpoint has a public IP address, you can access the cluster in Cloud Shell by setting up a kubeconfig file.
- E. The only available option when a cluster's Kubernetes API endpoint has a public IP address is to control the cluster locally using kubectl and the Kubernetes Dashboard.

Answer: B,D

Explanation:
To access an OKE cluster using kubectl, you need to set up a Kubernetes configuration file (kubeconfig). By default, the kubeconfig file is named config and stored in the $HOME/.kube directory.
When a cluster's Kubernetes API endpoint has a public IP address, you can use Cloud Shell to access the cluster. Setting up a kubeconfig file is required to authenticate and manage the cluster.

NEW QUESTION # 38

As a DevOps Engineer, you are tasked with explaining the key concepts of Terraform to a new team member. You want to ensure they understand the fundamental concepts of Terraform.
Which of the following best describes the purpose of Terraform variables?

- A. Terraform variables are used to define the structure and organization of Terraform configuration files.
- B. Terraform variables are used to define input values for Terraform configurations, allowing for customization and reuse of infrastructure code.
- C. Terraform variables are used to manage the life cycle of Terraform resources.
- D. Terraform variables are used to output the final state of the infrastructure after deployment.

Answer: B

Explanation:
Terraform variables are used to define input values for Terraform configurations. They allow users to customize infrastructure deployments by providing different values without modifying the configuration files themselves. Variables help in creating reusable infrastructure code, making it easy to maintain and adjust the infrastructure setup according to different environments or needs.

NEW QUESTION # 39
A team wants to deploy artificial intelligence and machine learning workloads in their OCI Container Engine for Kubernetes (OKE) cluster. They prioritize strong isolation, cost-efficiency, and the ability to leverage serverless capabilities.
Which solution is best suited for their requirements?

- A. Container Instances in OCI
- B. Self-Managed Nodes in OKE
- C. Virtual nodes in OKE
- D. Managed nodes in OKE

Answer: C

Explanation:
Virtual nodes in OKE provide a serverless experience for deploying Kubernetes workloads, which means you do not have to manage or scale the underlying infrastructure. This solution is particularly cost-efficient because you only pay for the resources used by the pods, and it provides strong isolation for workloads.
Virtual nodes are well suited for AI/ML workloads as they allow users to easily scale compute resources without being constrained by the limits of individual worker nodes.

NEW QUESTION # 40
As a DevOps engineer at XYZ Corp, you have been assigned the task of setting up a new OKE (Oracle Kubernetes Engine) cluster to manage the organization's Kubernetes applications hosted on Oracle Cloud Infrastructure (OCI). Your goal is to ensure a smooth and efficient process while preparing for the cluster creation.
Which of the following statements is false regarding the preparation process for setting up a new OKE cluster?

- A. Container Engine for Kubernetes automatically creates and configures new network resources for the new cluster.
- B. It is necessary to ensure sufficient quota on different resource types in your OCI tenancy for the cluster setup.
- C. Access to an Oracle Cloud Infrastructure tenancy is required to set up the new OKE cluster.
- D. Container Engine for Kubernetes cannot utilize existing network resources for the creation of the new cluster.

Answer: D

Explanation:
This statement is false because Container Engine for Kubernetes (OKE) can utilize existing network resources such as Virtual Cloud Networks (VCNs), subnets, security lists, and route tables for the creation of a new cluster. You can either use pre-existing network resources or let OKE create new network resources automatically.

NEW QUESTION # 41
......

In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply

believe that our 1Z0-1109-25 question torrent will help you pass the exam and get your certification successfully in a short time. Maybe you cannot wait to understand our 1Z0-1109-25 Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment I am willing to show our 1Z0-1109-25 guide torrents to you, and I can make a bet that you will be fond of our products if you understand it.
