If you want to choose reliable and efficient Latest PDII Questions and answers, we will be your best choice as we have 100% pass rate for PDII exams. Many candidates prefer simulator function of our PDII training materials. And our PDII exam questions won't let you down.

Salesforce Platform Developer II Sample Questions (Q85-Q90):

NEW QUESTION # 85

A developer is tasked by Universal Containers to build out a system to track the container repair process. Containers should be tracked as they move through the repair process, starting when a customer reports an issue and ending when the container is returned to the customer.

Which solution meets these business requirements while following best practices?

- A. Build an automated Lightning Application using Application Events to ensure data integrity.
- B. involve a Salesforce administrator and build out a declarative solution that works in Salesforce desktop and mobile.
- C. Use Flow Builder to develop a Sites page for customers to submit repair requests and track the status of their request.
- D. Use Platform Events with Workflow Rules and RFID integration to ensure proper tracking of the containers.

Answer: C

NEW QUESTION # 86

Get Cloudy Consulting (GCC) has a multitude of servers that host its customers' websites. GCC wants to provide a servers status page that is always on display in its call center. It should update in real time with any changes made to any servers. To accommodate this on the server side, a developer created a Server Update platform event.

The developer is working on a Lightning web component to display the information.

What should be added to the Lightning web component to allow the developer to interact with the Server Update platform event?

- A. import { subscribe, unsubscribe, onError } from 'lightning/empApi';
- B. import { subscribe, unsubscribe, onError } from 'lightning/pubsub'
- C. import { subscribe, unsubscribe, onError } from 'lightning/MessageChannel'
- D. import { subscribe, unsubscribe, onError } from 'lightning/ServerUpdate'

Answer: A

NEW QUESTION # 87

A Lightning Component functions in preview mode and needs to be used inside a Lightning App Builder page, but it is not available. What change should be applied to the component?

- A. Look for errors in the logic in the JavaScript controller.
- B. Delete the component, metadata, and Apex controller and recreate them.
- C. Refresh the sandbox and upgrade it to the latest API version.
- D. Expose it in the markup using the implements and access attributes.

Answer: D

NEW QUESTION # 88

Exhibit:

```

Line 1: @isTest
Line 2: static void testMyTrigger()
Line 3: {
Line 4:     //Do a bunch of data setup
Line 5:     DataFactory.setupDataForMyTriggerTest();
Line 6:
Line 7:     List<Account> acctsBefore = [SELECT Is_Customer__c FROM Account WHERE Id IN :Datafactory.accounts];
Line 8:
Line 9:     //Utility to assert all accounts are not customers before the update
Line 10:    AssertUtil.assertNotCustomers(acctsBefore);
Line 11:
Line 12:    //Set accounts to be customers
Line 13:    for(Account a : DataFactory.accounts)
Line 14:    {
Line 15:        a.Is_Customer__c = true;
Line 16:    }
Line 17:
Line 18:    update DataFactory.accounts;
Line 19:
Line 20:    List<Account> acctsAfter = [SELECT Number_of_Transfers__c FROM Account WHERE Id IN
:Datafactory.accounts];
Line 21:
Line 22:    //Utility to assert Number_of_Transfers__c is correct based on test data
Line 23:    AssertUtil.assertNumberOfTransfers(acctsAfter);
Line 24: }

```

The test method above tests an Apex trigger that the developer knows will make a lot of queries when a lot of Account are simultaneously updated to be customer.

The test method fails at the Line 20 because of too many SOQL queries

What is the correct way to fix this?

```

Line 17:
Line 18:     update DataFactory.accounts;
Line 19:
Line 20:     List<Account> acctsAfter = [SELECT Number_of_Transfers__c FROM Account WHERE Id IN
:Datafactory.accounts];
Line 21:
Line 22:     //Utility to assert Number_of_Transfers__c is correct based on test data
Line 23:     AssertUtil.assertNumberOfTransfers(acctsAfter);
Line 24: }

```

The test method above tests an Apex trigger that the developer knows will make a lot of queries when a lot of Accounts are simultaneously updated to be customers.

The test method fails at the Line 20 because of too many SOQL queries.

What is the correct way to fix this?

- A. Replace most of the Apex Trigger with Process Builder processes to reduce the number of queries in the trigger.
- B. Change the DataFactory class to create fewer Accounts so that the number of queries in the trigger is reduced.
- **C. Add Test.startTest() before and Test.stopTest() after both Line 7 of the code and Line 20 of the code.**
- D. Add Test.startTest() before Line 18 of the code and add Test.stopTest() after line 18 of the code.

Answer: C

NEW QUESTION # 89

A Visualforce page loads slowly due to the large amount of data it displays.

Which strategy can a developer use to improve the performance?

- A. Use an <apex:actionPoller> in the page to load all of the data asynchronously.
- **B. Use lazy loading to load the data on demand, instead of in the controller's constructor.**
- C. Use Javascript to move data processing to the browser instead of the controller.
- D. Use the transient keyword for the List variables used in the custom controller.

Answer: B

Explanation:

Lazy loading is a strategy to improve the performance of a Visualforce page that loads a large amount of data.

By loading the data on demand, rather than in the controller's constructor, the initial page load is faster, and additional data is only loaded when necessary. References: Visualforce Developer Guide - Improving Performance

NEW QUESTION # 90

.....

One of the great features of our PDII training material is our PDII pdf questions. PDII exam questions allow you to prepare for the

real PDII exam and will help you with the self-assessment. You can easily pass the Salesforce PDII exam by using PDII dumps pdf. Moreover, you will get all the updated PDII Questions with verified answers. If you want to prepare yourself for the real Platform Developer II exam, then it is one of the most important ways to improve your PDII preparation level. We provide 100% money back guarantee on all PDII braindumps products.
