

# 100% C-CPI-2506 Exam Coverage - 100% Realistic Questions Pool

C\_CPI\_2506 AUG UPDATED 90%

1. WHAT ARE SOME ADVANTAGES OF CREATING AN ODATA INTERFACE THROUGH AN API PROVIDER?  
A. AUTOMATIC CREATION OF AN OPENAPI SPECIFICATION  
B. AUTOMATIC CREATION OF A RAML SPECIFICATION  
C. AUTOMATIC CREATION OF A SWAGGER UI  
D. AUTOMATIC CREATION OF A WSDL SPECIFICATION  
ANSWER: A AND C
2. WHAT AUTHENTICATION METHOD DOES THE SERVICE KEY USE TO GRANT ACCESS WHEN YOU GENERATE A SERVICE KEY FOR AN SAP INTEGRATION SUITE EVENT MESSAGE CLIENT?  
A. X.509 CLIENT CERTIFICATES  
B. API KEY AUTHENTICATION  
C. BASIC AUTHENTICATION  
D. OAUTH 2.0 CLIENT AUTHENTICATION  
ANSWER: D
3. HOW DOES THE INCREASED NUMBER OF API CALLS IN A MICROSERVICES ARCHITECTURE IMPACT API MANAGEMENT AND MONITORING WITHIN AN SAP INTEGRATION SUITE LANDSCAPE?  
A. INCREASED API CALLS NECESSITATE LESS ROBUST API MANAGEMENT TOOLS AND SIMPLIFIED MONITORING CAPABILITIES  
B. INCREASED API CALLS NECESSITATE MORE ROBUST API MANAGEMENT TOOLS AND COMPREHENSIVE MONITORING CAPABILITIES  
C. REDUCED API CALLS SIMPLIFY API MANAGEMENT AND MINIMIZE MONITORING NEEDS  
D. INCREASED API CALLS IMPROVE API MANAGEMENT EFFICIENCY AND REDUCE THE NEED FOR EXTENSIVE MONITORING  
ANSWER: B
4. WHICH EXPRESSION LANGUAGE CAN YOU USE TO ACCESS THE CONTENT OF A MESSAGE IN AN INTEGRATION FLOW?  
A. SIMPLE EXPRESSION LANGUAGE  
B. XML EXPRESSION LANGUAGE  
C. SPRING EXPRESSION LANGUAGE  
D. JAVASCRIPT EXPRESSION LANGUAGE  
ANSWER: A
5. WHICH SAP OFFERING MANAGES INTEGRATIONS ACROSS HYBRID AND MULTICLOUD ENVIRONMENTS?  
A. SAP PROCESS ORCHESTRATION  
B. SAP CLOUD PLATFORM INTEGRATION  
C. SAP INTEGRATION SUITE  
D. SAP BUSINESS TECHNOLOGY PLATFORM  
ANSWER: C
6. WHAT DOES THE MESSAGING MODEL OF THE APACHE CAMEL DATA MODEL CONSIST OF?  
A. HEADER, BODY, ATTACHMENT  
B. HEADER, BODY, PROPERTIES

## How Can You Avoid Wasting Your Money by Purchasing the SAP C-CPI-2506 Exam Questions?

SAP C-CPI-2506 pdf dumps format contains actual C-CPI-2506 exam questions. With SAP C-CPI-2506 pdf questions you

don't have to spend a lot of time on SAP Certified Associate - Integration Developer Networking Solutions C-CPI-2506 exam preparation. You just go through and memorize these real C-CPI-2506 exam questions. ExamCost has designed this set of valid SAP Exam Questions with the assistance of highly qualified professionals. Preparing with these C-CPI-2506 Exam Questions is enough to get success on the first try. However, this format of ExamCost C-CPI-2506 exam preparation material is best for those who are too much busy in their life and don't have enough time to prepare for SAP C-CPI-2506 exam.

## SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>SAP Integration Suite Overview:</b> This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Implementing Cloud Integration:</b> This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>SAP Event Mesh:</b> This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Managing APIs:</b> This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.</li> </ul>

## SAP Certified Associate - Integration Developer Sample Questions (Q51-Q56):

### NEW QUESTION # 51

In a Content Modifier, you want to set up a call to the message body of the previous Content Modifier. Which notation do use to implement this?

- A. S{body.in}
- B. S[bodyin]
- C. S(inbody)
- **D. S{in body}**

**Answer: D**

Explanation:

To access the message body of the previous Content Modifier step in an integration flow, you must use the notation S{in body} in the current Content Modifier step. This notation means that you want to read the value from the in-message body of the exchange container. The exchange container is used to store additional data besides the message that is being processed by SAP Integration Suite. It has two message containers: in-message and out-message. The in-message contains the original message that was received by the integration flow, while the out-message contains the modified message that will be sent by the integration flow. Reference: Content Modifier Basics | SAP Help Portal, Exchange Container | SAP Help Portal

### NEW QUESTION # 52

What does the "Open Integration" principle of the SAP Integration Suite mean?

- A. SAP Integration Suite by default supports integrations to other SAP software.
- B. SAP Integration Suite allows SAP-to-SAP integrations.

- C. SAP Integration Suite by default supports third-party software integration.

**Answer: C**

Explanation:

The "Open Integration" principle of SAP Integration Suite emphasizes openness beyond SAP-to-SAP integrations. SAP provides pre-built content and adapters for SAP solutions (S/4HANA, SuccessFactors, Ariba, Concur, etc.). Additionally, it supports third-party applications and ecosystems through: Open Connectors (over 160+ third-party apps like Salesforce, HubSpot, Workday). Open APIs and standards (REST, OData, SOAP, JMS, AMQP, etc.). Thus, the principle ensures SAP + non-SAP integration scenarios are fully supported by default.

#### NEW QUESTION # 53

Which SAP Cloud Integration process event allows you to run integration flows directly after deployment?

- A. Router
- B. Timer
- C. Content Modifier
- D. Message Digest

**Answer: B**

Explanation:

A Timer event allows you to run integration flows directly after deployment. A Timer event is triggered by a predefined schedule or interval, such as every hour, every day, or every month. You can use a Timer event to initiate an integration process based on a time-based condition. Reference: Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 54

In a Data Store write operation, you want to set an Entry ID by reading a header value from an incoming message. Which notation do you use to implement this?

- A. S\${headerreceiver}
- B. S{receiverheader}
- C. S {receiverheader}
- D. \${header.receiver}

**Answer: D**

Explanation:

In SAP Cloud Integration, dynamic configuration values (headers, properties, body elements) are accessed using Expression Language (EL) notation:

`${header.<headerName>}` # Accesses a message header value.

`${property.<propertyName>}` # Accesses a message property.

`${body}` # Accesses the payload.

Therefore, when you want to set an Entry ID in a Data Store Write operation using a header value, the correct syntax is `${header.receiver}`.

#### NEW QUESTION # 55

You want to implement a synchronous call to a remote HTTP API as an integration flow component. Which adapter can you use?

- A. Mail
- B. OData
- C. SFTP
- D. AMQP

**Answer: B**

Explanation:
