

# ZDTE Exam Questions Answers | ZDTE Latest Study Notes

## ZDTE STUDY GUIDE 2025/2026 QUESTIONS WITH CORRECT ANSWERS

Whats a common feature of SD-WAN GRE Tunnels and IPSec Tunnels? - CORRECT ANSWER - Provide secure communication between different network segments

What are the challenges of extending legacy network and security to the public cloud? - CORRECT ANSWER -Creating VPCs and VNETs add overhead. Increases attach surface.

What are the use cases for ZT Cloud? - CORRECT ANSWER -Workload to internet, intracloud, multi-cloud, hybrid?

What is the purpose of a GRE tunnel in the ZTE? - CORRECT ANSWER -To load balance traffic properly

What two items most accurately describe ZT connectors? - CORRECT ANSWER -1. Access is granted but never shared at the network layer  
2. Independent of anyh network for control or trust

Main advantage of using an SD-WAN vendor to connect ot Zscaler over traditional routers? - CORRECT ANSWER -One-click configuration of the connection.

What prevents unauthorized SD-WAN router connections to the Zscaler service? - CORRECT ANSWER -The partner key

Which tunnel types does Zscaler support between a router and a Zscaler data center? - CORRECT ANSWER -GRE & IPSEC

What's more, part of that DumpsReview ZDTE dumps now are free: [https://drive.google.com/open?id=1h\\_gfyAvvmXo5j9t6oeZ2hwG26ugf\\_dRF](https://drive.google.com/open?id=1h_gfyAvvmXo5j9t6oeZ2hwG26ugf_dRF)

Each of us is dreaming of being the best, but only a few people take that crucial step. The key step is to work hard to make yourself better. Our ZDTE study materials may become your right man. Perhaps you have heard of our ZDTE Exam Braindumps. A lot of our loyal customers are very familiar with their characteristics. And our ZDTE learning quiz have become a very famous brand in the market and praised for the best quality.

### Zscaler ZDTE Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Access Control Services: Focuses on controlling and enforcing user access to applications and resources.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Zscaler Zero Trust Automation: Explains automating security and access policies based on Zero Trust principles.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Cyberthreat Protection Services: Covers mechanisms for detecting, preventing, and mitigating cyber threats in real time.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Zscaler Architecture: Focuses on the overall design, components, and deployment models of the Zscaler platform.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Connectivity Services: Covers methods and technologies for connecting users and devices securely to the Zscaler cloud.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Zscaler for Users - Engineer Overview: Covers the foundational understanding of Zscaler services from a user perspective and the engineer's role in managing them.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Data Protection Services: Explains how sensitive data is secured, monitored, and managed within the platform.</li> </ul>

## ZDTE Latest Study Notes, Exam ZDTE Revision Plan

Dear everyone, you can download the ZDTE free demo for a little try. If you are satisfied with the ZDTE exam torrent, you can make the order and get the latest ZDTE study material right now. Our ZDTE training material comes with 100% money back guarantee to ensure the reliable and convenient shopping experience. The accurate, reliable and updated Zscaler ZDTE study torrent are compiled, checked and verified by our senior experts, which can ensure you 100% pass.

## Zscaler Digital Transformation Engineer Sample Questions (Q28-Q33):

### NEW QUESTION # 28

In the Zscaler Client Connector (ZCC) Admin Portal, which posture element is supported on Windows but not on macOS?

- A. CrowdStrike ZTA Sensor Setting Score
- B. Domain Joined
- C. Client Certificate
- D. Full Disk Encryption

**Answer: A**

Explanation:

Zscaler's Device Posture framework in Client Connector supports a broad set of posture checks on both Windows and macOS, such as Certificate Trust, Client Certificate, Firewall status, Full Disk Encryption, Domain Joined, and multiple EDR detections. These are listed in Zscaler technical training material as common capabilities for "Windows und macOS." However, Zscaler's advanced integration with CrowdStrike introduces additional posture signals based on Zero Trust Assessment (ZTA). In the same material, CrowdStrike ZTA Score is explicitly annotated with a Windows-specific minimum version ("CrowdStrike ZTA Score (Win v.3.4.0+)"), highlighting that this ZTA- based posture is implemented for Windows only in the current releases, while the shared list for macOS does not include its own ZTA-specific version.

The newer ZTE/EDU-202 engineer materials build on this by describing separate ZTA Device OS and Sensor scores, and the exam maps this Windows-only ZTA enforcement to the CrowdStrike ZTA Sensor Setting Score option. In contrast, Client Certificate, Full Disk Encryption, and Domain Joined are documented as cross-platform posture types, not restricted to Windows.

### NEW QUESTION # 29

At which level of the Zscaler Architecture do the Zscaler APIs sit?

- A. Nanolog Cluster
- B. Enforcement Plane
- C. Data Fabric
- D. Central Authority

**Answer: D**

Explanation:

Zscaler's core architecture in the Engineer course is explained using three main layers: Central Authority, Enforcement Nodes, and

Logging / Nanolog services, supported by a distributed data fabric. The Central Authority is explicitly described as the "brains" or control plane of the Zscaler platform. It is responsible for global policy management, configuration, orchestration, and the API gateway that exposes Zscaler's administrative and automation APIs.

Enforcement nodes (such as ZIA Public Service Edges and ZPA enforcement components) form the data plane, inspecting traffic and applying policy decisions but not hosting the management APIs themselves.

Nanolog clusters handle large-scale log storage and streaming, providing logging and analytics rather than control or configuration interfaces. The data fabric underpins global state and synchronization across the cloud but is not where customers interact with APIs. In the Digital Transformation Engineer material, when you see references to OneAPI and other programmatic integrations, they are always associated with the Central Authority layer, reinforcing that APIs live in the control plane. Therefore, within the defined Zscaler Architecture levels, the APIs sit at the Central Authority.

### NEW QUESTION # 30

For App Connectors, why shouldn't the customer pre-configure memory and CPU resources to accommodate a higher bandwidth capacity, like 1 Gbps or more?

- A. They can and should, without concern. More resources are better.
- B. Cloud resources are expensive. Don't advise the customer to waste money.
- C. Storage will be the primary bottleneck, so adding more RAM or CPU cycles won't improve performance anyway.
- **D. Port exhaustion and file descriptors will often be the limiting factor, not memory or CPU.**

**Answer: D**

Explanation:

In ZPA, App Connectors are designed to be lightweight, horizontally scalable components. Their effective throughput and concurrent-connection capacity are often constrained more by network stack limitations (such as ephemeral port exhaustion and per-process file descriptor limits) than by raw CPU or memory. As a result, simply over-provisioning vCPUs and RAM to "hit" a target like 1 Gbps on a single connector usually does not provide linear performance gains.

Zscaler design guidance emphasizes deploying multiple App Connectors and allowing ZPA to intelligently load-balance traffic across them. This delivers resiliency and scales capacity while staying within realistic limits of TCP/UDP ports and OS-level descriptors. Over-scaling a single connector can lead to diminishing returns and may even create harder-to-diagnose issues when port ranges or file descriptors are saturated.

Storage is not the main factor in App Connector performance, and the platform does not recommend a "just throw more resources at it" approach. For these reasons, the correct answer is that port exhaustion and file descriptors, rather than memory or CPU, are typically the true limiting factors for App Connectors.

### NEW QUESTION # 31

Any Zscaler Client Connector (ZCC) App Profile must include which of the following?

- **A. Forwarding Profile**
- B. Exception Profile
- C. Authentication Profile
- D. Bypass Profile

**Answer: A**

Explanation:

Within the Zscaler Client Connector administration portal, an App Profile defines how the client behaves for a set of users or devices. A key element of any App Profile is the associated Forwarding Profile. The Forwarding Profile tells the Zscaler Client Connector how to handle traffic in different network conditions:

for example, whether to send traffic through Z-Tunnel 2.0 to ZIA and/or ZPA, rely on a PAC file, or bypass Zscaler when on trusted networks.

When you create or edit an App Profile, selecting a Forwarding Profile is mandatory because it determines how user traffic will actually reach the Zscaler cloud. Without a Forwarding Profile, the App Profile would not know which forwarding mode to use, and the client would have no consistent instructions on when and how to tunnel or bypass traffic. In practice, customers often define multiple Forwarding Profiles (for example,

"ZIA-only," "ZPA-only," or "ZIA and ZPA") and then bind them to different App Profiles for different user groups or device types. "Bypass," "authentication," or "exception" profiles are not separate required profile objects in the ZCC policy model. Any bypass or exception behavior is defined inside the forwarding and app profile logic, not as standalone mandatory profiles. Therefore, a Forwarding Profile is the one element that every ZCC App Profile must include.

### NEW QUESTION # 32

An IT administrator is reviewing the recently configured ZDX module in their environment and checks the performance data on the dashboard. The administrator notices that no software inventory has populated. What could be a probable reason?

- A. ZDX client is not configured to collect inventory data
- B. ZDX license doesn't have inventory collection entitlement
- C. ZDX client version being used is 4.3
- D. Zscaler Client Connector needs to be whitelisted on the EDR tool

**Answer: A**

Explanation:

Zscaler Digital Experience (ZDX) relies on Zscaler Client Connector to collect device and application telemetry from endpoints. Performance metrics (such as device, network, and application scores) are enabled as part of the core ZDX deployment, which explains why the administrator can already see performance data on the dashboard. However, software inventory is an additional inventory feature that must be explicitly enabled in the ZDX administration settings.

ZDX documentation describes an "Inventory Settings" page where administrators must turn on a setting such as "Collect Software Inventory Data." When this option is enabled and the minimum supported versions of Client Connector and the ZDX module are present, Client Connector begins collecting installed software details and sending this inventory to the ZDX cloud for visualization. If the collection toggle is left disabled, ZDX will continue to show performance metrics but no entries appear under Software Inventory or related views, even though licensing and versions are otherwise correct. The other options listed either relate to licensing, generic EDR conflicts, or a specific client version and do not match the documented dependency on enabling software-inventory collection. Therefore, the most accurate reason is that the ZDX client (via policy) is not configured to collect inventory data.

### NEW QUESTION # 33

.....

ZDTE training dumps are created in the most unique, customized way so it can cover different areas of exam with the Quality and Price of the product which is unmatched by our Competitors. The 100% guarantee pass pass rate of ZDTE training materials that guarantee you to pass your Exam and will not permit any type of failure. You will find every question and answer within ZDTE Training Materials that will ensure you get any high-quality certification you're aiming for.
