

# Valid Exam 1Z0-1072-25 Practice & New 1Z0-1072-25 Exam Duration

What's more, part of that TorrentValid 1Z0-1072-25 dumps now are free: <https://drive.google.com/open?id=1H9JopLBwqVu6Qsi2cxnDKZluW9Gbe1ol>

Subjects are required to enrich their learner profiles by regularly making plans and setting goals according to their own situation, monitoring and evaluating your study. Because it can help you prepare for the 1Z0-1072-25 exam. If you want to succeed in your exam and get the related exam, you have to set a suitable study program. If you decide to buy the 1Z0-1072-25 reference materials from our company, we will have special people to advise and support you. Our staff will also help you to devise a study plan to achieve your goal. We believe that if you purchase 1Z0-1072-25 Test Guide from our company and take it seriously into consideration, you will gain a suitable study plan to help you to pass your exam in the shortest time.

Some people are worrying about that they cannot operate the windows software and the online test engine of the 1Z0-1072-25 training engine smoothly. We ensure that you totally have no troubles in learning our 1Z0-1072-25 study materials. All small buttons are designed to be easy to understand. Also, the layout is beautiful and simple. Complex designs do not exist in our 1Z0-1072-25 Exam Guide. You can find that our content is easy to follow and practice.

>> Valid Exam 1Z0-1072-25 Practice <<

## New 1Z0-1072-25 Exam Duration, 1Z0-1072-25 Free Exam Questions

With all of these 1Z0-1072-25 study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our practice materials. As long as you make up your mind on this exam, you can realize their profession is unquestionable. And their profession is expressed in our 1Z0-1072-25 training prep thoroughly. They are great help to catch on the real knowledge of 1Z0-1072-25 exam and give you an unforgettable experience. Do no miss this little benefit we offer.

## Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN</li> <li>• FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block</li> <li>• File</li> <li>• Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.</li> </ul>

## Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q34-Q39):

### NEW QUESTION # 34

Which OCI feature should be used to ensure that communication between database servers and OCI Object Storage is secure?

- A. Use a VPN Gateway
- B. Use a NAT Gateway
- C. Use a Service Gateway
- D. Use a Local Peering Gateway

**Answer: C**

Explanation:

To ensure secure communication between database servers and OCI Object Storage, you should use a Service Gateway. A Service Gateway enables instances in your VCN to privately access OCI services like Object Storage without traversing the public internet. Security: The traffic between your database servers and Object Storage remains within the Oracle network, providing a secure and high-performance connection.

Reference:

Oracle Cloud Infrastructure Documentation: Service Gateway Overview

### NEW QUESTION # 35

How can an organization securely grant a third-party application access to specific OCI resources?

- A. By sharing user credentials for an OCI administrator
- B. By implementing OAuth 2.0 with the application
- C. By configuring the application to utilize Instance Principal
- D. By creating an IAM policy granting full access to the tenancy

**Answer: C**

Explanation:

To securely grant a third-party application access to specific Oracle Cloud Infrastructure (OCI) resources, the recommended approach is to configure the application to use Instance Principal. This method allows the application to authenticate directly with

OCI services without needing to manage sensitive credentials like passwords or API keys.

Instance Principals: Enable compute instances to directly make API calls against OCI services, inheriting permissions through IAM policies. This setup is more secure than sharing user credentials, as it avoids hardcoding credentials within the application and leverages OCI's native security features.

Reference:

Oracle Cloud Infrastructure Documentation: Instance Principals

### NEW QUESTION # 36

Which statement is true about pre-authenticated requests?

- A. You need to provide your OCI credentials to the partner company.
- B. Pre-authenticated requests can be used to delete buckets.
- **C. You cannot edit a pre-authenticated request.**
- D. Deleting a pre-authenticated request does not revoke access.

**Answer: C**

Explanation:

In Oracle Cloud Infrastructure (OCI), pre-authenticated requests (PARs) allow users to grant access to specific objects in Object Storage without requiring the recipient to have an OCI account or credentials. This feature is useful for sharing objects securely without exposing broader access.

Cannot Edit a PAR: Once a pre-authenticated request is created, you cannot edit it. If you need to change the settings, such as the expiration date or the object being shared, you must delete the existing PAR and create a new one.

Other Statements:

Deleting a PAR does indeed revoke access immediately, contradicting option B.

Providing OCI credentials (C) is not required for using PARs. The purpose of PARs is to avoid sharing credentials.

Deleting Buckets (D): PARs are designed for accessing objects, not for administrative actions like deleting buckets.

Relevant OCI Documentation:

Managing Pre-Authenticated Requests

This reference outlines the features and limitations of pre-authenticated requests, including the inability to edit them once created.

### NEW QUESTION # 37

Why is the OCI Inter-Region Latency dashboard useful for optimizing data transfer and backup strategies?

- A. It's designed for troubleshooting latency issues within your specific applications.
- B. It provides real-time data specific to your tenancy's workloads.
- **C. It offers a current and historical view of latency snapshots.**
- D. It focuses solely on latency within your own tenancy.

**Answer: C**

Explanation:

The OCI Inter-Region Latency dashboard is useful for optimizing data transfer and backup strategies because it provides both current and historical views of latency snapshots between OCI regions. This information helps you understand the network performance between regions over time, allowing you to optimize the placement of resources and data transfer operations.

Optimization Use: By analyzing latency data, you can make informed decisions on where to store backups and how to efficiently transfer data across regions, potentially reducing costs and improving performance.

Reference:

Oracle Cloud Infrastructure Documentation: Inter-Region Latency Dashboard

### NEW QUESTION # 38

What happens to the performance level of a volume when it is detached from an instance?

- A. The performance level is adjusted to Balanced.
- B. The performance level remains unchanged.
- **C. The performance level is adjusted to Lower Cost (0 VPU/GB).**
- D. The performance level is adjusted to Higher Performance.

**Answer: C**

Explanation:

In Oracle Cloud Infrastructure (OCI), when a block volume is detached from an instance, its performance level is automatically adjusted to the "Lower Cost" tier, which provides 0 VPU (Volume Performance Units) per GB. This adjustment helps reduce costs when the block volume is not actively being used by a compute instance.

### Key Points:

**Volume Performance Levels:** OCI offers various performance tiers for block volumes, including "Higher Performance," "Balanced," and "Lower Cost." These tiers determine the level of IOPS (Input/Output Operations Per Second) and throughput available to the volume.

**Automatic Adjustment:** When a block volume is detached from an instance, OCI automatically optimizes the cost by switching the volume to the "Lower Cost" performance tier. This tier offers minimal performance, suitable for data that is not actively accessed.

**Cost Management:** This automatic adjustment is beneficial for managing costs, as it prevents users from incurring unnecessary charges for higher performance levels when the volume is not in use.
