If you choose our study materials and use our products well, we can promise that you can pass the exam and get the C_SEC_2405 Certification. Then you will find you have so many chances to advance in stages to a great level of social influence and success. Our C_SEC_2405 dumps torrent can also provide all candidates with our free demo, in order to exclude your concerns that you can check our products.

SAP Certified Associate - Security Administrator Sample Questions (Q49-Q54):

NEW QUESTION # 49

Which of the following is part of the SAP S/4HANA central UI component?

- A. SAP Fiori transactional application
- B. SAP Fiori analytical application
- C. SAP Fiori launchpad
- D. SAP Fiori object page

Answer: C

NEW QUESTION # 50

Which code does the authority-check return when a user does NOT have any authorizations for the authorization object checked?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

In SAP systems, the authority-check statement evaluates whether a user has the required authorizations for a specific authorization object. When a user does not have any authorizations for the checked object, the system returns a return code (SY-SUBRC) of 0. This indicates that the authorization check has failed, meaning the user lacks the necessary permissions to perform the requested action. The return code 0 is a standard indicator in ABAP programming for authorization failures, prompting the system to deny access or trigger an error message. Other return codes, such as 4, 12, or 16, may indicate different scenarios, like partial authorization or specific check conditions, but they are not applicable when no authorizations exist. Understanding this return code is crucial for developers and administrators to handle authorization errors effectively, ensuring that access control is enforced consistently across SAP applications. This mechanism supports SAP's robust security model, preventing unauthorized actions and maintaining system integrity.

NEW QUESTION # 51

Which user type in SAP S/4HANA Cloud Public Edition is used for API access, system integration, and scenarios where automated data exchange is required?

- A. SAP Communication User
- B. SAP Administrative User
- C. SAP Technical User
- D. SAP Support User

Answer: A

Explanation:

In SAP S/4HANA Cloud Public Edition, the SAP Communication User type is used for:

- * API Access:
- * Facilitates secure communication between SAP systems and external applications.
- * System Integration:
- * Used in scenarios requiring automated data exchange, such as integrations with middleware or third-party systems.

SAP Security References:

- * SAP Help Portal: Communication User Setup and Use Cases
- * SAP API Management Documentation

NEW QUESTION # 52

Which archiving objects are relevant for archiving change documents for user master records? Note: There are 2 correct answers to this question.

- A. US_PASS
- B. US_USER
