DOWNLOAD the newest VCETorrent H12-821\_V1.0 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1hCy5nziKd9C2QZMK-dqUoqyUCiNkicl>

Practicing with Huawei H12-821\_V1.0 Exam questions will help you to become an expert, Huawei H12-821\_V1.0 and acquire the Huawei H12-821\_V1.0 Certification. Huawei H12-821\_V1.0 Exam Questions allow you to verify your skills as a professional, prepared by Huawei H12-821\_V1.0. You have to pass the HCIP-Datacom-Core Technology V1.0 H12-821\_V1.0 exam to achieve the Huawei H12-821\_V1.0 certification on the first attempt, which is organized by Huawei.

Huawei H12-821\_V1.0: HCIP-Datacom-Core Technology V1.0 exam is a certification exam that focuses on the core technologies of data communication. H12-821\_V1.0 exam is designed for professionals who are interested in enhancing their skills and knowledge in the field of data communication. HCIP-Datacom-Core Technology V1.0 certification is offered by Huawei, a Chinese multinational technology company that specializes in telecommunications equipment and consumer electronics.

Huawei H12-821\_V1.0 certification exam is a comprehensive exam that covers a wide range of topics related to data communication. It is ideal for IT professionals who are looking to advance their careers in this field and who want to demonstrate their expertise to potential employers. H12-821\_V1.0 Exam is also suitable for network engineers, network administrators, and other IT professionals who are responsible for designing, building, and managing data communication networks. With the Huawei H12-821\_V1.0 certification, IT professionals can enhance their skills and knowledge and increase their value in the job market.

## H12-821\_V1.0 Latest Study Guide, H12-821\_V1.0 Braindumps Downloads

Our company has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about our Huawei study materials. On the one hand, our company has benefited a lot from renovation. Customers are more likely to choose our H12-821\_V1.0 Materials. On the other hand, the money we have invested is meaningful, which helps to renovate new learning style of the exam. So it will be very convenient for you to buy our product and it will do a lot of good to you.

Huawei H12-821\_V1.0 (HCIP-Datacom-Core Technology V1.0) exam is a certification test for IT professionals who want to demonstrate their expertise in data communication core technologies. H12-821\_V1.0 exam is designed to test the skills and knowledge required for the design and implementation of data communication networks using Huawei technologies. H12-821\_V1.0 Exam covers a wide range of topics, including network architecture, network protocols, network security, and network maintenance.

## Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q298-Q303):

### NEW QUESTION # 298

A company purchased a new network device.

As a network administrator, what method is usually used to configure the device for the first time?

- A. Telnet
- B. Console port login
- C. FTP
- D. SNMP

**Answer: B**

### NEW QUESTION # 299

What are the main types of ISIS Hello messages? (Multiple choice)

- A. P2P LAN IIIH
- B. Level-2 LANIH
- C. Level-3 LAN IIIH
- D. Level-1 LAN IIIH

**Answer: A,B,D**

### NEW QUESTION # 300

An enterprise uses OSPF to implement network communication. To ensure data validity and security, all authentication modes supported by OSPF are enabled on routers. In this case, interface authentication is preferentially used by the routers.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

OSPF Authentication Overview OSPF supports three authentication modes:

- \* Null Authentication: No authentication (default).
- \* Plaintext Authentication: Uses clear-text passwords.
- \* MD5 Authentication: Secure cryptographic authentication.

Interface-Level Priority When both interface-level and area-level authentication are configured, OSPF prioritizes interface-level authentication. This ensures that interface-specific security overrides area-wide configurations for greater granularity and security.

HCIP-Datacom-Core Reference

\* OSPF authentication hierarchy and configurations are detailed in the OSPF security configuration chapter.

### NEW QUESTION # 301

IP multicast effectively conserves network bandwidth and reduces network load. Therefore, it is widely used in network services, such as IPTV, real-time data transmission, and multimedia conferencing.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

1. Overview of IP Multicast:

IP multicast is a method of delivering data from one source to multiple destinations simultaneously.

Unlike unicast (one-to-one communication) or broadcast (one-to-all communication), multicast is one-to-many, allowing data to be sent only to subscribers (multicast group members).

This significantly conserves bandwidth and reduces the load on the network because the source only sends a single stream of data, which is replicated by multicast routers as needed.

2. Use Cases for IP Multicast:

IP multicast is widely used in network services that involve real-time or large-scale data delivery, such as:

IPTV (Internet Protocol Television): Broadcasting live TV streams.

Real-Time Data Transmission: Delivering stock market data, sensor updates, etc.

Multimedia Conferencing: Supporting group calls, webinars, and online meetings.

3. Why the Statement is TRUE:

IP multicast reduces unnecessary traffic and maximizes efficiency, making it ideal for these types of network services.

Reference:

Huawei HCIA-Datacom Study Guide, Chapter "Multicast Basics."

RFC 1112: Host Extensions for IP Multicasting.

### NEW QUESTION # 302

In BGP, Keepalive messages are used to maintain BGP peer relationships. When a BGP router receives a Keepalive message from a peer, the BGP router sets the state of the peer to Established and periodically sends Keepalive messages to maintain the connection. By default, the device sends Keepalive messages every seconds.

**Answer:**

Explanation:

60

Explanation:

Keepalive messages are used to maintain the Established state of a BGP peer relationship. The Keepalive timer determines the frequency of these messages and defaults to 60 seconds, as per the BGP specification.
