Valid SC-100 Braindumps, Valid Study SC-100 Questions

You can directly refer our Microsoft SC-100 study materials to prepare the exam. Once the newest test syllabus is issued by the official, our experts will quickly make a detailed summary about all knowledge points of the real Microsoft SC-100 Exam in the shortest time. All in all, our SC-100 exam quiz will help you grasp all knowledge points.

Microsoft SC-100 Certification Exam is an excellent certification for professionals who want to advance in their cybersecurity career. Microsoft Cybersecurity Architect certification is recognized globally and provides professionals with access to the Microsoft community, which is a great resource for networking, learning, and professional development. With the right preparation and dedication, candidates can achieve this certification and demonstrate their ability to design and implement secure solutions using Microsoft technologies.

How To Get Microsoft SC-100 Certification Exam

The Microsoft SC-100 certification exam is the first step in your path toward becoming a Cybersecurity Architect. It is an entry level exam that requires you to demonstrate a fundamental understanding of IT security principles and processes. The most important thing you can do before taking the exam is to be prepared for it. An identity privileged role hybrid tenant is a tenant who can use both their individual and organizational identities. This allows them to access the resources they need without having to reveal their full identity. Logging baselines should be set and maintained to mitigate the risk of regulatory compliance. This can be done through the use of specific logging requirements, predefined thresholds, and regular analysis and review of logs. There are various types of platforms but here at Microsoft **SC-100 dump** are the best way to pass and save your time and money.

If you are planning to get the Microsoft SC-100 Cybersecurity Architect (beta) certification in order to make a career in this field, you need to have proper training and experience. But if you do not have any idea about how to get the certification exam, then you are at the right place. Here you find every thing about how to get this exam and what is needed for it. The process of evolving mitigation selection eliminates the need for checking. By continuously refining the selection of mitigation measures, organizations can more easily adapt to changes in the environment and protect their assets more effectively.

Microsoft Cybersecurity Architect Sample Questions (Q282-Q287):

NEW QUESTION # 282
Your company has a hybrid cloud infrastructure.
Data and applications are moved regularly between cloud environments.
The company's on-premises network is managed as shown in the following exhibit.
You are designing security operations to support the hybrid cloud infrastructure. The solution must meet the following requirements:
* Govern virtual machines and servers across multiple environments.
* Enforce standards for all the resources across all the environment across the Azure policy.
Which two components should you recommend for the on-premises network? Each correct answer presents part of the solution.
NOTE Each correct selection is worth one point.

- A. on-premises data gateway
- B. Azure VPN Gateway
- C. Azure Arc
- D. Azure Bastion
- E. guest configuration in Azure Policy

Answer: C,E

Explanation:
Explanation
https://docs.microsoft.com/en-us/azure/governance/machine-configuration/overview

NEW QUESTION # 283
You have Microsoft Defender for Cloud assigned to Azure management groups.
You have a Microsoft Sentinel deployment.
During the triage of alerts, you require additional information about the security events, including suggestions for remediation. Which two components can you use to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Microsoft Sentinel threat intelligence workbooks
- B. workload protections in Defender for Cloud
- C. Microsoft Sentinel notebooks
- D. threat intelligence reports in Defender for Cloud

Answer: A,B

You are evaluating the security of ClaimsApp.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE; Each correct selection is worth one point.

Answer:

Explanation:

Topic 1, Fabrikam, Inc

On-premises Environment

The on-premises network contains a single Active Directory Domain Services (AD DS) domain named corp.fabrikam.com.

Azure Environment

Fabrikam has the following Azure resources:

* An Azure Active Directory (Azure AD) tenant named fabrikam.onmicrosoft.com that syncs with corp.fabnkam.com

* A single Azure subscription named Sub1

* A virtual network named Vnetl in the East US Azure region

* A virtual network named Vnet2 in the West Europe Azure region

* An instance of Azure Front Door named FD1 that has Azure Web Application Firewall (WAR enabled

* A Microsoft Sentinel workspace

* An Azure SQL database named ClaimsDB that contains a table named ClaimDetails

* 20 virtual machines that are configured as application servers and are NOT onboarded to Microsoft Defender for Cloud

* A resource group named TestRG that is used for testing purposes only

* An Azure Virtual Desktop host pool that contains personal assigned session hosts All the resources in Sub1 are in either the East US or the West Europe region.

Partners

Fabrikam has contracted a company named Contoso, Ltd. to develop applications. Contoso has the following infrastructure-.

* An Azure AD tenant named contoso.onmicrosoft.com

* An Amazon Web Services (AWS) implementation named ContosoAWS1 that contains AWS EC2 instances used to host test workloads for the applications of Fabrikam Developers at Contoso will connect to the resources of Fabrikam to test or update applications. The developers will be added to a security Group named Contoso Developers in fabrikam.onmicrosoft.com that will be assigned to roles in Sub1.

The ContosoDevelopers group is assigned the db.owner role for the ClaimsDB database.

Compliance Event

Fabrikam deploys the following compliance environment:

* Defender for Cloud is configured to assess all the resources in Sub1 for compliance to the HIPAA HITRUST standard.

* Currently, resources that are noncompliant with the HIPAA HITRUST standard are remediated manually.

* Qualys is used as the standard vulnerability assessment tool for servers.

Problem Statements

The secure score in Defender for Cloud shows that all the virtual machines generate the following recommendation-. Machines should have a vulnerability assessment solution.

All the virtual machines must be compliant in Defender for Cloud.

ClaimApp Deployment

Fabrikam plans to implement an internet-accessible application named ClaimsApp that will have the following specification

* ClaimsApp will be deployed to Azure App Service instances that connect to Vnetl and Vnet2.

* Users will connect to ClaimsApp by using a URL of https://claims.fabrikam.com.

* ClaimsApp will access data in ClaimsDB.

* ClaimsDB must be accessible only from Azure virtual networks.

* The app services permission for ClaimsApp must be assigned to ClaimsDB.

Application Development Requirements

Fabrikam identifies the following requirements for application development:

* Azure DevTest labs will be used by developers for testing.

* All the application code must be stored in GitHub Enterprise.

* Azure Pipelines will be used to manage application deployments.

* All application code changes must be scanned for security vulnerabilities, including application code or configuration files that contain secrets in clear text. Scanning must be done at the time the code is pushed to a repository.

Security Requirement

Fabrikam identifies the following security requirements:

* Internet-accessible applications must prevent connections that originate in North Korea.

* Only members of a group named InfraSec must be allowed to configure network security groups (NSGs} and instances of Azure

Firewall, VJM. And Front Door in Sub1.
* Administrators must connect to a secure host to perform any remote administration of the virtual machines. The secure host must be provisioned from a custom operating system image.
AWS Requirements
Fabrikam identifies the following security requirements for the data hosted in ContosoAWSV.
* Notify security administrators at Fabrikam if any AWS EC2 instances are noncompliant with secure score recommendations.
* Ensure that the security administrators can query AWS service logs directly from the Azure environment.
Contoso Developer Requirements
Fabrikam identifies the following requirements for the Contoso developers;
* Every month, the membership of the ContosoDevelopers group must be verified.
* The Contoso developers must use their existing contoso.onmicrosoft.com credentials to access the resources in Sub1.
* The Comoro developers must be prevented from viewing the data in a column named MedicalHistory in the ClaimDetails table.
Compliance Requirement
Fabrikam wants to automatically remediate the virtual machines in Sub1 to be compliant with the HIPPA HITRUST standard. The virtual machines in TestRG must be excluded from the compliance assessment.

NEW QUESTION # 285
Your company is migrating data to Azure. The data contains Personally Identifiable Information (Pll). The company plans to use Microsoft Information Protection for the Pll data store in Azure. You need to recommend a solution to discover Pll data at risk in the Azure resources.
What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Prioritize security actions by data sensitivity, https://docs.microsoft.com/en-us/azure/defender-for-cloud /information-protection. As to Azure SQL Database Azure SQL Managed Instance Azure Synapse Analytics (Azure resources as well): https://docs.microsoft.com/en-us/azure/azure-sql/database/data-discovery-and- classification-overview?view=azuresql

NEW QUESTION # 286
You are planning the security levels for a security access strategy.
You need to identify which job roles to configure at which security levels. The solution must meet security best practices of the Microsoft Cybersecurity Reference Architectures (MCRA).
Which security level should you configure for each job role? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 287
......

Therefore, make the most of this opportunity of getting these superb exam questions for the Microsoft SC-100 certification exam. We guarantee you that our top-rated Microsoft Cybersecurity Architect practice exam (PDF, desktop practice test software, and web-based practice exam) will enable you to pass the Microsoft SC-100 Certification Exam on the very first go.
