높은 통과율 SAFe-Practitioner시험덤프자료 인기덤프

Scrum SAFe-Practitioner 시험을 어떻게 통과할수 있을가 고민중이신 분들은 Pass4Test를 선택해 주세요. Pass4Test는 많은 분들이 IT인증시험을 응시하여 성공하도록 도와주는 사이트입니다. 최고급 품질의 Scrum SAFe-Practitioner시험대비 덤프는 Scrum SAFe-Practitioner시험을 간단하게 패스하도록 힘이 되어드립니다. Pass4Test 의 덤프는 모두 엘

최신 SAFe Certification SAFe-Practitioner 무료샘플문제 (Q231-Q236):

질문 # 231
The sixth SAFe Lean-Agile principle advises to visualize and limit what?

- A. Work in Production (WIP)
- B. Impediments
- C. Work in Progress (WIP)
- D. Working Inventory Potential (WIP)

정답：C

질문 # 232
Which of the following tools can be used to develop a deeper understanding of what customers are seeing, thinking, and feeling while interacting with the Solution?

- A. Vision map
- B. Value stream map
- C. Empathy map
- D. Story map

정답：C

설명：
Empathy maps are a design thinking tool that promotes customer identification by helping teams develop a deep, shared understanding of others. They enable teams to imagine what a specific persona is thinking, feeling, hearing, and seeing as they use the solution. Empathy maps help teams to design with empathy, which is a key behavior of customer centricity. Empathy maps can be used to explore different aspects of the problem and solution space, and to validate assumptions and hypotheses about the customer's needs and preferences. 질문 # 233
The analyzing step of the Portfolio Kanban system has a new Epic with a completed Lean business case.
What best describes the next step for the Epic?

- A. It will be implemented if it has the highest weighted shortest job first (WSJF) ranking
- B. It will be moved to the ready state in the Portfolio Kanban if it receives a 'go' decision from Lean Portfolio Management.
- C. It will remain in the analyzing step until one or more Agile Release Trains have the capacity to implement it.
- D. It will be implemented once the Epic Owner approves the Lean business case.

정답：B

설명：
The Portfolio Kanban system is a method to visualize and manage the flow of portfolio Epics, from ideation through analysis, implementation, and completion1. The analyzing step of the Portfolio Kanban system involves developing a Lean business case for the Epic and presenting it to Lean Portfolio Management (LPM) for approval1. If the Epic receives a 'go' decision from LPM, it will be moved to the ready state in the Portfolio Kanban, where it will wait until one or more Agile Release Trains (ARTs) have the capacity to implement it1. The other options are incorrect because:
* A. The Epic Owner does not have the authority to approve the Lean business case. Only LPM can make the final decision on whether to proceed with the Epic or not1.
* C. The Epic will not remain in the analyzing step after receiving a 'go' decision from LPM. It will be moved to the ready state, where it will be prioritized using weighted shortest job first (WSJF) and other factors1.
* D. The Epic will not be implemented based on its WSJF ranking alone. It will also depend on the availability and alignment of the ARTs that can deliver the Epic1. References: 1: Portfolio Kanban - Scaled Agile Framework

질문 # 234

Which statement is true about Iteration planning for Kanban teams?

- A. Kanban teams estimate their velocity
- B. Kanban teams publish Iteration goals
- C. Kanban teams do not commit to service level agreements
- D. Kanban teams find high value in trying to plan the Iteration in detail

정답： B

설명：

Iteration planning for Kanban teams is different from Scrum teams in that Kanban teams do not estimate their velocity, do not commit to service level agreements, and do not plan the Iteration in detail. Instead, Kanban teams use a flow-based process that allows them to pull work items from the backlog as they become available and deliver value continuously. However, Kanban teams still operate within the ART iteration cadence and often publish Iteration goals to align with the ART vision and objectives, as well as to communicate their priorities and dependencies to other teams and stakeholders. 질문 # 235

What is the purpose of the Iteration review?

- A. To identify where there is too much work in the system and where the teams are being
