Friends or workmates can also buy and learn with our MuleSoft-Integration-Architect-I Practice Guide together.

Salesforce Certified MuleSoft Integration Architect I Sample Questions

(Q195-Q200):

NEW QUESTION # 195

An ABC Farms project team is planning to build a new API that is required to work with data from different domains across the organization.

The organization has a policy that all project teams should leverage existing investments by reusing existing APIs and related resources and documentation that other project teams have already developed and deployed.

To support reuse, where on Anypoint Platform should the project team go to discover and read existing APIs, discover related resources and documentation, and interact with mocked versions of those APIs?

- A. Runtime Manager
- B. Anypoint Exchange
- C. Design Center
- D. API Manager

Answer: B

Explanation:

The mocking service is a feature of Anypoint Platform and runs continuously. You can run the mocking service from the text editor, the visual editor, and from Anypoint Exchange. You can simulate calls to the API in API Designer before publishing the API specification to Exchange or in Exchange after publishing the API specification.

NEW QUESTION # 196

An insurance company is implementing a MuleSoft API to get inventory details from the two vendors. Due to network issues, the invocations to vendor applications are getting timed-out intermittently. But the transactions are successful upon reprocessing What is the most performant way of implementing this requirement?

- A. Implement Round-Robin scope to invoke the two vendor applications on two different routes Use the Try-Catch scope to implement retry mechanism for timeout errors on each route
- B. Implement a scatter-gather scope to invoke the two vendor applications on two different route
  Use the Until-Successful scope to implement the retry mechanism for timeout errors on each route
- C. Implement a For-Each scope to invoke the two vendor applications
  Use until successful scope to implement the retry mechanism for the timeout errors
- D. Implement a Choice scope to invoke the two vendor applications on two different route Use the try-catch scope to implement the retry mechanism for timeout errors on each route

Answer: B

NEW QUESTION # 197

An auto mobile company want to share inventory updates with dealers Dl and D2 asynchronously and concurrently via queues Q1 and Q2. Dealer Dl must consume the message from the queue Q1 and dealer D2 to must consume a message from the queue Q2. Dealer D1 has implemented a retry mechanism to reprocess the transaction in case of any errors while processing the inventers updates. Dealer D2 has not implemented any retry mechanism.

How should the dealers acknowledge the message to avoid message loss and minimize impact on the current implementation?

- A. Dealer D1 must use auto acknowledgement and dealer D2 can use manual acknowledgement and acknowledge the message after successful processing
- B. Dealer D1 can use AUTO acknowledgement and dealer D2 must use manual acknowledgement and acknowledge the message
- C. Dealer D1 and dealer D2 must use AUTO acknowledgement and acknowledge the message after successful processing
- D. Dealer D1 can use auto acknowledgement and dealer D2 can use IMMEDIATE acknowledgement and acknowledge the message of successful processing

Answer: B

Explanation:

after successful processing
