In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our L3M6 exam question will be constantly updated every day. Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. L3M6 Test Questions have the function of supporting printing in order to meet the need of customers.

CIPS L3M6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.
Topic 2	<ul style="list-style-type: none">Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.

Topic 3	<ul style="list-style-type: none"> • Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.
Topic 4	<ul style="list-style-type: none"> • Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.

Beneficial CIPS L3M6 Dumps to Achieve Your Activity [2026]

Our L3M6 study questions will update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boosts many advantages and to gain a better understanding of our Socially Responsible Warehousing and Distribution guide torrent. It is very worthy for you to buy our product and please trust us. If you still can't fully believe us, please read the introduction of the features and the functions of our product as follow.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q47-Q52):

NEW QUESTION # 47

Not enough visual stimulation can lead to eye strain, distraction, and too much noise.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

Insufficient visual stimulation (e.g., bland environments) may cause boredom or fatigue, but not eye strain (from overexertion), distraction (from excess stimuli), or noise (an auditory issue). The CIPS L3M6 module clarifies visual pollution's effects in LO2-excess, not lack, drives stress. The statement is false due to mismatched causation.

NEW QUESTION # 48

Slotting or profiling identifies the least efficient placement for each item in a warehouse.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

Slotting or profiling identifies the most efficient placement for items based on factors like demand and accessibility, not the least efficient. The CIPS L3M6 syllabus defines slotting as an optimization technique, making this statement false.

Reference:

NEW QUESTION # 49

Carbon dioxide from the burning of fossil fuels and industrial processes accounts for what percentage of greenhouse gas emissions?

- A. 5%
- B. 95%
- C. 65%
- D. 35%

Answer: C

Explanation:

Carbon dioxide (CO₂) from fossil fuel combustion (e.g., coal, oil) and industrial processes (e.g., cement production) accounts for about 65% of global greenhouse gas emissions, per IPCC data cited in the CIPS L3M6 module. This dominates over methane (16%) or nitrous oxide (6%), due to widespread energy and manufacturing reliance. In supply chains, this affects procurement (e.g., energy-intensive goods) and logistics (e.g., fuel use), making it a critical LO2 focus for reduction strategies.

NEW QUESTION # 50

Which of the following would you do to calculate a carbon footprint? Select all that apply.

- A. Select your measurement method and be consistent
- B. Ask an untrustworthy third party to audit and verify your data before making it public
- C. Only collect the easy data and ignore the difficult data
- D. Collect your data and identify and explain any gaps or assumptions you have made

Answer: A,D

Explanation:

Calculating a carbon footprint, per the CIPS L3M6 syllabus, requires robust methods: collecting comprehensive data with transparency about gaps/assumptions (B) and using a consistent measurement approach (D). Option A (untrustworthy auditing) undermines credibility, and option C (ignoring difficult data) invalidates accuracy. CSR emphasizes reliable carbon footprint monitoring.

NEW QUESTION # 51

The ISO 20400 is designed to help organizations to do what?

- A. Manage supplier relations
- B. Reduce their impact on the environment
- C. All the above
- D. Tackle human rights issues

Answer: C

Explanation:

ISO 20400, launched in 2017, is the world's first international standard for sustainable procurement. It provides guidance for organizations to:

* Manage supplier relations: Ensuring ethical and sustainable practices in the supply chain.

* Reduce environmental impact: Promoting eco-friendly purchasing decisions.

* Tackle human rights issues: Addressing social responsibilities like fair labor practices.

The CIPS L3M6 module recognizes ISO 20400 as a comprehensive framework integrating all these aspects into procurement strategies.
