## Fast Download NLN Test NEX Dumps Pdf Are Leading Materials & Hot NEX: Nursing Entrance Exam (Math, Science and Verbal)

The reason why many people choose DumpExam is that DumpExam brings more convenience. IT elites of DumpExam use their professional eye to search the latest NEX certification training materials, which ensure the accuracy of our NEX Exam Dumps. If you still worry, you can download NEX free demo before purchase.

## NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q63-Q68):

### NEW QUESTION # 63

Word Knowledge

The word "interpret" most nearly means:

- A. Ignore
- B. Delay action
- C. Memorize

- D. Explain the meaning

**Answer: D**

Explanation:

Interpret means to explain or understand the meaning of information. Option B correctly defines the term. Interpretation skills are frequently referenced in healthcare and testing environments.

---

#### NEW QUESTION # 64

An acid needs to be diluted at a ratio of 5 grams of acid per 3 liters of water. How many grams of acid are needed for a solution of 24 liters of water to maintain the ratio?

- A. 360 grams
- B. 40 grams
- C. 14.4 grams
- D. 1.6 grams

**Answer: B**

Explanation:

This is a ratio and proportion problem. The given ratio is 5 grams of acid for every 3 liters of water. First determine how many groups of 3 liters are in 24 liters:  $24 \div 3 = 8$ . Each group requires 5 grams of acid, so multiply:  $8 \times 5 = 40$  grams. Therefore, option C is correct. Option D results from dividing instead of multiplying. Option B is excessively large and unrealistic. Ratio problems on the NEX require identifying the scaling factor before multiplying.

#### NEW QUESTION # 65

Three nurses work a combined total of 130 hours each week. If Nurse A worked 5 days for hours each day, and Nurse B worked 4 days for hours each day, how many hours did Nurse C work?

- A. hours
- B. hours
- C. hours
- D. hours

**Answer: D**

Explanation:

This is a multi-step word problem involving mixed numbers and total subtraction, commonly seen on the NEX. First calculate Nurse A's total hours: Multiply by 5 days: hours. Next, calculate Nurse B's total hours:

Multiply by 4 days: hours. Now add the hours worked by Nurses A and B:

$41.25 + 42 = 83.25$  hours (or).

Subtract this from the total combined hours:

$130 - 83.25 = 46.75$  hours.

Convert 0.75 to a fraction:

So Nurse C worked hours, making option D correct. The NEX often tests accurate step-by-step calculation with workplace scenarios.

---

#### NEW QUESTION # 66

A red flower (RR) and a white flower (WW) were cross-pollinated. The result was four pink flowers (RW).

This is best explained by

- A. codominance
- B. mutation
- C. multiple alleles
- D. non-disjunction

**Answer: A**

Explanation:

Codominance occurs when two different alleles are both expressed in a heterozygous organism. In this case, the red and white alleles combine to produce an intermediate pink phenotype. Non-disjunction refers to chromosome separation errors, multiple alleles involve more than two allele types, and mutations involve DNA changes. The NEX Science exam frequently tests inheritance patterns, including codominance and incomplete dominance.

---

**NEW QUESTION # 67**

What is the term for organisms that are preserved for thousands of years by being buried in sediment, encased in amber, or frozen in ice?

- A. Relics
- B. Ancestors
- C. Remnants
- **D. Fossils**

**Answer: D**

Explanation:

Fossils are the preserved remains or traces of organisms that lived in the past. Fossilization can occur in several ways, including burial in sediment, preservation in amber, or freezing in ice. These conditions prevent decay and allow organisms or parts of organisms to remain intact for thousands or even millions of years.

Fossils provide critical evidence for understanding evolution, extinct species, and changes in life on Earth over time. The terms remnants, ancestors, and relics are not scientifically precise terms used to describe preserved organisms in geology or biology. The NEX Science section often focuses on basic concepts of evolution and Earth history, making fossil identification an important topic.
