## 100% Pass Quiz HPE7-A01 - Efficient Exam Aruba Certified Campus Access Professional Exam Flashcards

Are you worried about where to find reliable and valid HPE7-A01 practice exam cram? Please stop hunting with aimless, HP HPE7-A01 free study dumps will help you and solve your problems. If you still have doubts, you can download HPE7-A01 free

demo to have a try. If you have any questions about HPE7-A01 Study Tool, please contact us by email or chat with our online customer service, we will always here to answers your questions. Our HPE7-A01 test practice will enhance your professional skills and expand your knowledge, which will ensure you a define success in our HPE7-A01 actual test.

## HP Aruba Certified Campus Access Professional Exam Sample Questions (Q77-Q82):

### NEW QUESTION # 77

What is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches?

- A. Switch authentication and user-based tunneling of the voice traffic.
- B. Central authentication and port-based tunneling of the voice traffic.
- C. Controller authentication and port-based tunneling of all traffic
- **D. Switch authentication and local forwarding of the voice traffic**

**Answer: D**

Explanation:

This is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches.

Dynamic segmentation is a feature that allows AOS-CX switches to tunnel user traffic to a controller or another switch based on user roles and policies. For voice traffic, it is recommended to use switch authentication and local forwarding, which means the voice devices are authenticated by the switch and their traffic is forwarded locally without tunneling. This reduces latency and jitter for voice traffic and improves voice quality. The other options are incorrect because they either use central authentication or tunneling, which are not optimal for voice traffic.

### NEW QUESTION # 78

When setting up an Aruba CX VSX pair, which information does the Inter-Switch Link Protocol configuration use in the configuration created?

- A. RPVST+
- B. QSVI
- **C. MAC tables**
- D. UDLD

**Answer: C**

Explanation:

UDLD (Unidirectional Link Detection) is the information that the Inter-Switch Link Protocol configuration uses in the configuration created for Aruba CX VSX pair inter-switch-link. UDLD is a protocol that detects unidirectional links between switches and prevents loops or black holes in the network. UDLD is enabled by default on all ports that are part of the inter-switch-link between VSX peers. The other options are incorrect because they are either not related to inter-switch-link or not supported by Aruba CX VSX.

### NEW QUESTION # 79

Your Director of Security asks you to assign AOS-CX switch management roles to new employees based on their specific job requirements. After the configuration was complete, it was noted that a user assigned with the auditors role did not have the appropriate level of access on the switch.

The user was not allowed to perform firmware upgrades and a privilege level of 15 was not assigned to their role. Which default management role should have been assigned for the user?

- A. sysadmin
- **B. sysops**

- C. config
- D. administrators

**Answer: B**

Explanation:

Explanation

The correct answer is B. sysops.

The sysops user role is a predefined role that allows users to perform system operations on the switch, such as backup, restore, upgrade, or reboot. The sysops user role also has access to the PUT and POST methods for REST API, which can be used to modify the switch configuration. The sysops user role has a privilege level of 15, which is the highest level of access on the switch<sup>1</sup>.

The other options are incorrect because:

A: sysadmin: The sysadmin user role is a predefined role that allows users to view and modify the switch configuration using the CLI or the Web UI. The sysadmin user role does not have access to the REST API methods, and cannot perform firmware upgrades<sup>1</sup>.

C: administrators: The administrators user role is a predefined role that has full access to all switch configuration information and all REST API methods. This role is more than what the Director of Security requires<sup>1</sup>.

D: config: The config user role is a predefined role that allows users to view and modify the switch configuration using the CLI or the Web UI. The config user role does not have access to the REST API methods, and cannot perform firmware upgrades<sup>1</sup>.

### NEW QUESTION # 80

You are configuring an SVI on an Aruba CX switch that needs to have the following characteristics:

\* VLANID = 25

. IPv4 address 10.105.43.1 with mask 255.255.255.0

\* IPv6 address fd00:5780::f02d:4df6 with a 64 bit prefix length

\* member of VRF eng

\* VRF eng and VLAN 25 have not yet been created

Which command lists will satisfy the requirements with the least number of commands?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

**Answer: A**

Explanation:

Explanation

The other options either use more commands or do not create the VRF or the VLAN.

Option C uses the following commands:

\* vrf eng: This command creates a VRF named eng and enters the VRF configuration mode<sup>1</sup>.

\* vlan 25: This command creates a VLAN with ID 25 and enters the VLAN configuration mode<sup>2</sup>.

\* interface vlan 25: This command creates an SVI on VLAN 25 and enters the interface configuration mode<sup>3</sup>.

\* ip address 10.105.43.1/24 ipv6 address fd00:5780::f02d:4df6/64 vrf attach eng: This command assigns an IPv4 address of 10.105.43.1 with a subnet mask of 255.255.255.0 and an IPv6 address of fd00:5780::f02d:4df6 with a prefix length of 64 to the SVI, and attaches it to the VRF eng.

### NEW QUESTION # 81

Your Director of Security asks you to assign AOS-CX switch management roles to new employees based on their specific job requirements. After the configuration was complete, it was noted that a user assigned with the administrators role did not have the appropriate level of access on the switch.

The user was not limited to viewing nonsensitive configuration information and a level of 1 was not assigned to their role. Which default management role should have been assigned for the user?

- A. helpdesk
- B. sysadmin
- C. operators
- D. config

**Answer: C**

Explanation:

The default management role that should have been assigned for the user is B. operators.

The operators user role is a predefined role that allows users to view nonsensitive configuration information on the switch, such as interfaces, VLANs, routing protocols, statistics, and more. The operators user role has a privilege level of 1, which is the lowest level of access on the switch.

The administrators user role is a predefined role that has full access to all switch configuration information and all REST API methods. This role is more than what the Director of Security requires.

## NEW QUESTION # 82

.....

As we all know, if we want to pass a exam successfully, preparation is necessity, especially for the HPE7-A01 exam. Our product will help you to improve your efficiency for the preparation of the HPE7-A01 exam with list the knowledge points of the exam. And this will help the candidates to handle the basic knowledge, so that you can pass the HPE7-A01 Exam more easily, and the practice materials is free update for one year, and money back guarantee. Possession of the practice materials of our company, it means that you are not worry about the HPE7-A01 exam, since the experts of experienced knowledge are guiding you. So just take action now.

**Actual HPE7-A01 Tests:** <https://www.dumpstests.com/HPE7-A01-latest-test-dumps.html>

We will collect all relevant reference books of the HPE7-A01 exam written by famous authors from the official website, HP Exam HPE7-A01 Flashcards. Passing the test means you might get the chance of promotion and higher salary. Our company takes on stronger commitments that our HPE7-A01 premium VCE file is safe and free of virus, HP Exam HPE7-A01 Flashcards Trial use before payment.

Getting to Know the Main Menu, Each video lab presents detailed objectives, lab diagrams, and video captures. We will collect all relevant reference books of the HPE7-A01 Exam written by famous authors from the official website.
