New ISTQB-CTFL Dumps - ISTQB-CTFL Exam Syllabus

Our ActualTestsIT team always provide the best quality service in the perspective of customers. There are many reasons why we

ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q89-Q94):

NEW QUESTION # 89
Determining the schedule for each testing activity and test milestones for a test project, using activity estimates, available resources, and other constraints is a typical task performed during

- A. Test planning
- B. Test execution
- C. Test design.
- D. Test analysis.

Answer: A

Explanation:
Test planning involves defining the overall approach to testing, including scheduling, resources, and milestones. It is during this phase that the detailed schedule for each testing activity is determined based on estimates, resource availability, and constraints. The ISTQB CTFL Syllabus v4.0 outlines that test planning encompasses the creation of test plans and schedules to ensure that testing activities are properly managed and controlled.

NEW QUESTION # 90
Given the following priorities and dependencies for these test cases:

Test Case	Priority	Technical dependency on:	Logical dependency on:
TC1	High	TC4	
TC2	Low		
TC3	High		TC4
TC4	Medium		
TC5	Low		TC2
TC6	Medium	TC5	

Which of the following test execution schedules BEST takes into account the priorities and technical and logical dependencies?

- A. TC1 - TC3 - TC2 - TC4 - TC5 - TC6
- B. TC2 - TC4 - TC1 - TC3 - TC5 - TC6
- C. TC3 - TC4 - TC2 - TC6 - TC1 - TC5
- D. TC1 - TC3 - TC2 - TC4 - TC6 - TC5

Answer: A

Explanation:
When scheduling test cases, priorities and dependencies must be considered. The best execution order will respect both the logical dependencies and the priorities assigned to each test case.
Given the options, the correct order considering the priorities and dependencies is:
* TC1(Priority 1)
* **TC(ISTQB not-for-profit association)ity 2, dependent on TC1)
* TC2(Priority 3, dependent on TC1)
* TC4(Priority 4)
* TC5(Priority 5)
* TC6(Priority 6, dependent on TC4)
According to the ISTQB Certified Tester Foundation Level (CTFL) v4.0 syllabus, understanding dependencies and scheduling tests accordingly is crucial for effective test execution#6†source#.

NEW QUESTION # 91
Which of the following statements about decision tables are TRUE?
I Generally, decision tables are generated for low risk test items.
II Test cases derived from decision tables can be used for component tests.
III Several test cases can be selected for each column of the decision table.
IV The conditions in the decision table represent negative tests generally.

- A. II. IV
- B. II. Ill
- C. Generally, decision tables are generated for low risk test items. Decision tables are not related to risk level, but rather to complexity level. Decision tables are generated for test items that have complex logic or multiple conditions and actions that need to be tested.
- D. I. Ill
- E. I. IV

Answer: B

Explanation:
IV. The conditions in the decision table represent negative tests generally. The conditions in the decision table represent both positive and negative tests, depending on whether they are valid or invalid inputs for the test item. Verified Reference: A Study Guide to the ISTQB Foundation Level 2018 Syllabus - Springer, Chapter 4, page 42-43.
Explanation:
A decision table is a technique that shows combinations of inputs and/or stimuli (causes) with their associated outputs and/or actions (effects). A decision table consists of four quadrants: conditions (inputs), actions (outputs), condition entries (values) and action entries (results). The following statements about decision tables are true:
II. Test cases derived from decision tables can be used for component tests. Decision tables can be used to test components that have multiple inputs and outputs that depend on logical combinations of conditions. Decision tables can help cover all possible combinations or scenarios in a systematic way.
III. Several test cases can be selected for each column of the decision table. A column of a decision table represents a unique combination of condition entries and action entries. Several test cases can be selected for each column by varying other input values or expected results that are not part of the decision table. The following statements about decision tables are false:

NEW QUESTION # 92
Which of the following statements about statement coverage is TRUE?

- A. Achieving 100% statement coverage ensures that no variable within the code has been used without being initialised.
- B. Achieving 90% statement coverage ensures that 90% branch coverage is achieved.
- C. Achieving 80% statement coverage ensures that 80% of all executable statements within the code have been exercised.
- D. Achieving 100% statement coverage ensures that 100% branch coverage is achieved

Answer: C

Explanation:
Statement coverage measures the percentage of executable statements that have been exercised by a test suite. Achieving 80% statement coverage means that 80% of the executable code lines have been tested. This metric helps in understanding how much of the code has been covered during testing. However, it does not guarantee branch coverage, variable initialization, or detection of all possible defects. The ISTQB CTFL Syllabus v4.0 explains statement coverage as a measure of the extent to which the code has been tested, without implying other types of coverage or testing goals.

NEW QUESTION # 93
Which of the following statements about decision tables are TRUE?
I. Generally, decision tables are generated for low risk test items.
II. Test cases derived from decision tables can be used for component tests.

III. Several test cases can be selected for each column of the decision table.
IV. The conditions in the decision table represent negative tests generally.

- A. II. IV
- B. II. Ill
- C. I. Ill
- D. I, IV

Answer: B

Explanation:
A decision table is a technique that shows combinations of inputs and/or stimuli (causes) with their associated outputs and/or actions (effects). A decision table consists of four quadrants: conditions (inputs), actions (outputs), condition entries (values) and action entries (results). The following statements about decision tables are true:
* II. Test cases derived from decision tables can be used for component tests. Decision tables can be used to test components that have multiple inputs and outputs that depend on logical combinations of conditions. Decision tables can help cover all possible combinations or scenarios in a systematic way.
* III. Several test cases can be selected for each column of the decision table. A column of a decision table represents a unique combination of condition entries and action entries. Several test cases can be selected for each column by varying other input values or expected results that are not part of the decision table. The following statements about decision tables are false:
* I. Generally, decision tables are generated for low risk test items. Decision tables are not related to risk level, but rather to complexity level. Decision tables are generated for test items that have complex logic or multiple conditions and actions that need to be tested.
* IV. The conditions in the decision table represent negative tests generally. The conditions in the decision table represent both positive and negative tests, depending on whether they are valid or invalid inputs for the test item. NEW QUESTION # 94
......

To get all these benefits you must have to pass the ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) certification exam which is not an easy task. It is a difficult task but you can make ActualTestsIT simple and quick. To do this you just visit Exams. Solutions provide updated, valid, and actual ISTQB-CTFL Exam Dumps that will assist you in ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) exam preparation and you can easily get success in this challenging ISTQB Certified Tester Foundation Level (CTFL v4.0) exam with flying colors.

New ISTQB-CTFL Dumps: https://www.actualtestsit.com/ISTQB/ISTQB-CTFL-exam-prep-dumps.html

With the help of our ISTQB-CTFL test quiz, your preparation for the exam will become much easier, The portable PDF format means customers can access real ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) exam questions on their smartphones, tablets, and laptops, Our production experts have been preparing such material which can succeed you in ISTQB ISTQB-CTFL exam in a one day, But since you have clicked into this website for ISTQB-CTFL practice guide you need not to worry about that at all because our company is especially here for you to solve this problem.

There are three kinds of variable substitution: Pattern matching, They're going to be apprehensive and skeptical of your cooking abilities, With the help of our ISTQB-CTFL Test Quiz, your preparation for the exam will become much easier.

Become Proficient to Pass the Exam with Updated ISTQB ISTQB-CTFL Exam Dumps

The portable PDF format means customers can access real ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) exam questions on their smartphones, tablets, and laptops, Our production experts have been preparing such material which can succeed you in ISTQB ISTQB-CTFL exam in a one day.

But since you have clicked into this website for ISTQB-CTFL practice guide you need not to worry about that at all because our company is especially here for you to solve this problem.

Our ISTQB-CTFL training materials cover the most content of the real exam and the accuracy of our ISTQB-CTFL test answers is 100% guaranteed.
