C-ADBTP-2601 Übungsmaterialien & C-ADBTP-2601 Lernführung: Administrating SAP Business Technology Platform(C_ADBTP_2601) & C- ADBTP-2601 Lernguide

Viele der C-ADBTP-2601 Fragenkatalog Administrating SAP Business Technology Platform(C_ADBTP_2601)aus Pass4Test sind in der Form von Vielfache-Wahl-Fragen. Um Ihre C-ADBTP-2601 Zertifizierungsprüfungen reibungslos zu meistern, brauchen Sie nur unsere SAP C-ADBTP-2601 Prüfungsfragen und Antworten (Administrating SAP Business Technology Platform(C_ADBTP_2601)) auswendigzulemen.

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) C- ADBTP-2601 Prüfungsfragen mit Lösungen (Q10-Q15):

10. Frage

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Credential Store	credstore	proxy	Assigned (1 unit)	☐	☐
Destination Service	destination	lte	Assigned (1 unit)	☐	☐
Feature Flags Service	feature-flags-dashboard	dashboard (Application)	Assigned (1 unit)	☐	☐
	feature-flags	standard	Assigned (1 unit)	☐	☐
		lte	Assigned (1 unit)	☐	☐
HTML5 Application Repository Service	html5-apps-repo	app-host	Assigned (1 unit)	☐	☐
		app-runtime	Assigned (1 unit)	☐	☐
Print Service	print	receiver	Assigned (1 unit)	☐	☐
SaaS Provisioning Service	saas-registry	application	Assigned (1 unit)	☐	☐
SAP Build Work Zone, standard edition	SAPLaunchpad	standard (Application)	Assigned (1 unit)	☒	☐
Service Manager	service-manager	service-operator-access	Assigned (1 unit)	☐	☐
		global-offerings-audit	Assigned (1 unit)	☐	☐
		subaccount-audit	Assigned (1 unit)	☐	☐
		subaccount-admin	Assigned (1 unit)	☐	☐
		container	Assigned (1 unit)	☐	☐

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

11. Frage

SIMULATION

Establish Shared Services

Task 2: Entitle and Subscribe a Service in a Shared Subaccount

In your SAP BTP cockpit, in your SH Dev subaccount, entitle one standard (Application) service plan for the SAP Build Work Zone, advanced edition.

In the SH Dev subaccount, establish a trust to the agvlamkzw.accounts.ondemand.com identity provider.

In your SH Dev subaccount, create a service subscription for SAP Build Work Zone, advanced edition with the standard service plan.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Shared Services directory.

Open the SH Dev subaccount.

This matters because all three required actions must be done inside SH Dev, not in the directory and not in another subaccount.

Part 1 - Entitle the service in SH Dev

Step 1 - Open the subaccount

In the cockpit, choose Directories.

Open Shared Services.

Select SH Dev.

You should now be on the SH Dev subaccount page.

Step 2 - Open Entitlements

In SH Dev, choose Entitlements.

SAP documents that service plans and quotas for a subaccount are added in the subaccount's Entitlements are a.

Step 3 - Add the required service plan

Click Configure Entitlements or Add Service Plans.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard (Application).

Set the quantity to 1 if a quota/amount field is shown.

Save the entitlement changes.

This task explicitly asks for one standard (Application) service plan. SAP Help also notes that SAP Build Work Zone usage depends on the correct entitlement being available in the subaccount first.

Verify

Under Entitlements, you should now see:

SAP Build Work Zone, advanced edition

plan: standard (Application)

quantity: 1 if shown

Part 2 - Establish trust to the identity provider

Step 4 - Open Trust Configuration

In SH Dev, go to Security.

Choose Trust Configuration.

SAP Help states that trust to a custom identity provider is established from Security > Trust Configuration in the SAP BTP cockpit.

Step 5 - Create the trust

Click Establish Trust.

Enter or select the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard.

Save the trust configuration.

SAP documents that to use a custom identity provider, the subaccount must have a trust relationship to that provider. SAP also highlights that apps such as SAP Build Work Zone rely on SAP Cloud Identity Services trust configuration.

Verify

On the Trust Configuration page, you should see:

agvlamkzw.accounts.ondemand.com

as a trusted identity provider.

Part 3 - Create the subscription

Step 6 - Open Instances and Subscriptions

In SH Dev, go to Services.

Choose Instances and Subscriptions.

Step 7 - Create the subscription

Click Create.

Choose Subscription if the cockpit asks for a type.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard.

Confirm the creation.

SAP Help for SAP Build Work Zone scenarios indicates that the subaccount needs the correct entitlements and subscription flow to expose and use SAP Build Work Zone content.

Step 8 - Confirm subscription status

Stay on Instances and Subscriptions.

Check that the new subscription appears and is active.

Verify

You should see:

SAP Build Work Zone, advanced edition

plan: standard

subscription created successfully

New Instance or Subscription

1

Basic Info

Enter basic info for your instance or subscription.

i Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: * **i**

Can't find what you're looking for?

SAP Build Work Zone, advanced edition

Plan: *

standard

Final expected result

Inside SH Dev:

the entitlement for SAP Build Work Zone, advanced edition exists

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, advanced edition

the subscription uses the standard plan

Common mistakes to avoid

Doing the entitlement in Shared Services directory instead of SH Dev

Choosing SAP Build Work Zone, standard edition instead of advanced edition
Choosing the wrong plan; the entitlement must be standard (Application)
Forgetting the trust step to agvlamkzw.accounts.ondemand.com
Trying to subscribe before the entitlement exists

12. Frage

SIMULATION

Enable Service Subscriptions

Task 2: Entitle and Subscribe a Service in a Subaccount

In your AM PA Prod subaccount, entitle the standard (Application) service plan for SAP Build Work Zone, standard edition.

In the AM PA Prod subaccount, establish a trust to the agylamkzw.accounts.ondemand.com identity provider.

In your AM PA Prod subaccount, create a service subscription for SAP Build Work Zone, standard edition with the standard service plan.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Part A - Entitle the Service Plan in AM PA Prod

Step 1 - Open the AM PA Prod Subaccount

What to do

In the SAP BTP Cockpit, go to Directories.

Open the Partner directory.

Select the subaccount AM PA Prod.

Explanation:

This opens the exact subaccount where the entitlement and subscription must be created.

What to verify

You should now be on the AM PA Prod subaccount page.

Step 2 - Open Entitlements in the Subaccount

What to do

In AM PA Prod, open Entitlements.

Explanation:

SAP documents that subaccount entitlements are configured in the subaccount's entitlement area, where you add service plans and quotas available to that subaccount.

What to verify

You should see the Entitlements screen for AM PA Prod.

Step 3 - Add the Required Service Plan

What to do

Click Configure Entitlements or Add Service Plans.

Search for:

SAP Build Work Zone, standard edition

Select the service.

Choose the plan:

standard (Application)

Add the service plan.

Save the entitlement changes.

Explanation:

The task requires the standard (Application) plan specifically. SAP's entitlement flow requires you to add the service plan to the subaccount before you can subscribe to the application.

What to verify

Under Entitlements, you should now see:

SAP Build Work Zone, standard edition

plan: standard (Application)

Part B - Establish Trust to the Identity Provider

Step 4 - Open Trust Configuration

What to do

In the AM PA Prod subaccount, go to:

Security

Trust Configuration

Explanation:

SAP Help states that trust to a custom identity provider is established from the cockpit in Security > Trust Configuration.

What to verify

You should be on the Trust Configuration page of AM PA Prod.

Step 5 - Start the Trust Setup

What to do

Click Establish Trust or New Trust Configuration.

Explanation:

This opens the wizard or form to add a trusted identity provider for the subaccount. SAP documents this as the standard cockpit flow for custom identity provider trust.

Step 6 - Enter the Identity Provider

What to do

In the trust configuration, use the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard and confirm the trust setup.

Save the configuration.

Explanation:

The simulation explicitly requires trust to that identity provider domain. For SAP Build Work Zone, standard edition, SAP also notes that the subaccount must trust an identity provider before subscription use cases for business users are completed.

What to verify

On the Trust Configuration page, the identity provider

agvlamkzw.accounts.ondemand.com should appear as trusted.

Configure Tenant

- 1 Choose Tenant
- 2 Configure Main Information
- 3 Configure Identity Provider and Parameters
- 4 Review

3. Configure Identity Provider and Parameters

For a good single sign-on experience, choose the same domain for all BTP accounts and non-BTP applications. Choose "Default" to always use the default domain configured in your tenant.

Identity Provider

SAP Cloud Identity Tenant: **agvlamkzw.accounts.ondemand.com**

Domain: **Default**

Parameters

Available for User Logon: ☒

Link Text for User Logon: **agvlamkzw.accounts.ondemand.com**

Create Shadow Users on Logon: ☒

Default for non-interactive logon: ☐

Previous Next Cancel

Part C - Create the Service Subscription

Step 7 - Open the Subscription Area

What to do

In AM PA Prod, go to:

Services

Instances and Subscriptions

Explanation:

SAP Help for SAP Build subscriptions points to the subaccount subscription flow after the entitlement is available. In current cockpit usage, subscriptions are created from the subaccount's services are a.

What to verify

You should see the Instances and Subscriptions page.

Step 8 - Create the Subscription

What to do

Click Create.

Choose Subscription if a type selection appears.

Search for:

SAP Build Work Zone, standard edition

Select the plan:

standard

Then confirm the creation.

New Instance of Subscription

Enter basic info for your instance or subscription.

Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: * ? ® Can't find what you're looking for?

SAP Build Work Zone, standard edition

Plan: *

standard

Create **Cancel**

Explanation:

SAP's getting-started guidance for SAP Build Work Zone, standard edition says that once the subaccount has the required entitlement, you can subscribe to the application from the subaccount.

What to verify

You should now see a subscription entry for:

SAP Build Work Zone, standard edition

plan: standard

Step 9 - Confirm the Subscription Is Active

What to do

Check the status of the new subscription in Instances and Subscriptions.

Explanation:

The subscription should be visible and active in the subaccount after creation.

What to verify

You should see:

SAP Build Work Zone, standard edition

subscription created successfully

SAP's guidance for subscription-based applications consistently uses this subaccount subscription flow after entitlement is present.

Final Expected Result for Task 2

Inside AM PA Prod:

the entitlement SAP Build Work Zone, standard edition is assigned
the entitled plan is standard (Application)
trust is established to agvlamkzw.accounts.ondemand.com
a subscription exists for SAP Build Work Zone, standard edition
the subscription uses the standard service plan

Common Mistakes to Avoid

1. Doing the entitlement in the wrong place

This task must be done in:

AM PA Prod subaccount

Not only in:

Partner directory

Directory entitlement and subaccount entitlement are different scopes in the cockpit.

2. Choosing the wrong service or wrong plan

Use exactly:

SAP Build Work Zone, standard edition

standard (Application) for entitlement

standard for the subscription selection screen

SAP's service subscription flow starts only after the correct entitlement exists.

3. Skipping trust configuration

The simulation explicitly requires trust to:

agvlamkzw.accounts.ondemand.com

Trust is configured in Security > Trust Configuration.

4. Looking for subscription creation before entitlement

The entitlement must be added first, otherwise the service may not appear in the subscription creation flow.

Quick Validation Checklist

Confirm all of the following in AM PA Prod:

Entitlements contains SAP Build Work Zone, standard edition

the plan is standard (Application)

Trust Configuration shows agvlamkzw.accounts.ondemand.com

Instances and Subscriptions shows SAP Build Work Zone, standard edition the subscription is created successfully

13. Frage

SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Login to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops####-am-pa-dev-test

Then choose the region:

Cloud Provider: Microsoft Azure

Region: US West (WA)

Environment / Technical Region: cf-us20

After checking all values, click Create.

Create Subaccount

Display Name *
AM PA Dev Test

Description
Partner Development and Testing

Region *
US West (WA)

Subdomain *
btpops xxxx-am-pa-dev-test

Parent *
Partner

> Advanced

Cockpit supports multi-level directories in your account structure.
You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under Parent.

Create Cancel

Explanation:

This creates the development and testing subaccount for the Partner directory.

The important points are:

the subaccount name must match exactly

the subdomain must include your account number in place of #####

the region must be Microsoft Azure → US West (WA) cf-us20

What to verify

After creation, you should see the new subaccount:

AM PA Dev Test

inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists

What to do

Check the subaccounts list under Partner.

Explanation:

Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify

You should see:

AM PA Dev Test

If it is not there, do not continue until it is created correctly.

The screenshot shows a table of subaccounts in SAP BTP. The table has columns for Name, Type, Environment, Provider, Region, and Changed On. The 'Partner' directory is expanded, showing a subaccount named 'AM PA Dev Test' with Type 'Subaccount', Environment 'Multi-Environment', Provider 'SAP', Region 'US West (000)', and a 'Changed On' date of March 26, 2026, 3:25:30.

Name	Type	Environment	Provider	Region	Changed On
BTP Admin Certification XXXXX	Global Account				March 25, 2026, 9:11:2...
Partner	Directory				March 26, 2026, 3:27:5...
AM PA Dev Test	Subaccount	Multi-Environment	SAP	US West (000)	March 26, 2026, 3:25:30

Step 5 - Start Creating the Second Subaccount

What to do

Still inside the Partner directory, click Create → Subaccount again.

Explanation:

This opens a new subaccount creation form for the production subaccount.

Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: btpops####-am-pa-prod

Then set:

Source Subaccount: AM PA Dev Test

Enable the production setting:

Used in Production: Yes

Then click Create.

The screenshot shows the 'Create Subaccount' form in SAP BTP. The form has fields for Display Name (AM PA Prod), Description (Partner Production), Region (US West (WA)), Subdomain (btpops####-am-pa-prod), and Parent (Partner). There is an 'Advanced' section with a checkbox for 'Used for production' which is checked, and an unchecked checkbox for 'Enable beta features'. Below this is a section for 'Add labels to this subaccount' with fields for Name and Values. At the bottom are 'Create' and 'Cancel' buttons.

Field	Value
Display Name *	AM PA Prod
Description	Partner Production
Region *	US West (WA)
Subdomain *	btpops####-am-pa-prod
Parent *	Partner
Used for production	☒
Enable beta features	☐
Name (Label)	
Values (Label)	

Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

2. AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Source Subaccount: AM PA Dev Test

Used in Production: Yes

Name	Type	Environment	Region	Changed On
BTP Admin Certification	Global Account			March 25, 2026, 9:11:2...
Americas	Directory			March 26, 2026, 3:27:5...
Partner	Directory			March 26, 2026, 9:30:3...
AM PA Dev Test	Subaccount	Microsoft Azure	US West (WA)	March 26, 2026, 3:35:3...
AM PA Prod	Subaccount	Microsoft Azure	US West (WA)	March 26, 2026, 3:39:3...

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account

Americas

Eurasia

Human Resources

2. Wrong subdomain format

Use exactly:

btpops#####-am-pa-dev-test

btpops#####-am-pa-prod

Replace only ##### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

4. Forgetting the source subaccount for AM PA Prod

You must select:

AM PA Dev Test

as the source subaccount.

5. Forgetting the production flag

For AM PA Prod, make sure:

Used in Production is enabled

14. Frage
