Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q175-Q180):

NEW QUESTION # 175

Universal Containers has 80% code coverage. Despite the creation of a test plan for each sprint, the number of defects is large. What two items should the architect recommend to reduce defects?

Choose 2 answers

- **A. The acceptance criteria should have more details.**

- B. The code coverage should be increased to 95%.
- C. The test analyst who creates the test plan must also create the test classes.
- D. The test script should be used to define the test classes.

Answer: A,D

NEW QUESTION # 176

What are three benefits of managing change with Packaged Development?

Choose 3 answers

- A. Versioning to help with change management.
- B. Making the release cycle more efficient and agile.
- C. Modular development process with specification of dependencies among packages.
- D. Manage the number of sandboxes needed to successfully deploy.
- E. Clearly divides developers and testers.

Answer: B,C,D

NEW QUESTION # 177

Northern Trail Outfitters (NTO) has well-defined release management processes for both large and small projects. NTO's development team created a workflow and a trigger for the changes in its opportunity renewal process.

What should the architect recommend for release planning of these changes?

- A. Plan this as a major release and align with a Salesforce major release.
- B. Plan this as a patch release and align with the Salesforce patch release.
- C. Plan this as a minor release with training and change management.
- D. Plan this as an interim release after checking with Salesforce support.

Answer: C

NEW QUESTION # 178

Universal Containers is having trouble deploying metadata from SIT to UAT. UAT is complaining that it does not recognize some new Salesforce metadata types to be deployed. The deployment from Dev to SIT worked perfectly. What could be the problem?

- A. UAT is on a preview release and SIT is not.
- B. Use the DX command line instead.
- C. SIT is on a preview release and UAT is not.
- D. There is no problem, this is expected behavior.

Answer: C

NEW QUESTION # 179

Universal Containers has three types of releases in their release management strategy: daily, minor (monthly), and major (quarterly).

A user has requested a new report to support an urgent client request. What release strategy would an Architect recommend?

- A. Utilize the minor release process to create the report directly in production bypassing the full sandbox.
- B. Utilize the major release process to create the report directly in production bypassing the full sandbox.
- C. Utilize the major release process to create the report in a full sandbox and then deploy it to production.
- D. Utilize the daily release process to create the report directly in a full sandbox and then deploy it to production.

Answer: D

NEW QUESTION # 180
