# First-grade Salesforce Mule-Dev-301 Study Center and Realistic Mule-Dev-301 Pass4sure Dumps Pdf

For candidates who want to buy Mule-Dev-301 exam materials online, they may have the concern of the privacy. We respect personal information of you. If you buy Mule-Dev-301 test materials from us, your personal information such as your email address and name will be protected well. Once the order finishes, your personal information will be concealed. Moreover, Mule-Dev-301 Exam Dumps cover most of knowledge points for the exam, and it will be enough for you to pass the exam just one time. In order to strengthen your confidence for Mule-Dev-301 exam braindumps, we are pass guarantee and money back guarantee.

Our company is glad to provide customers with authoritative study platform. Our Mule-Dev-301 quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question on our Mule-Dev-301 exam braindump, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our Mule-Dev-301 Quiz prep, you will have the chance to enjoy the authoritative study platform provided by our company. We believe our latest Mule-Dev-301 exam torrent will be the best choice for you. More importantly, you have the opportunity to get the demo of our latest Mule-Dev-301 exam torrent for free.

Salesforce Mule-Dev-301 Pass4sure Dumps Pdf, Trustworthy Mule-Dev-301 Exam Content

Salesforce Mule-Dev-301 certification exam opens the doors for starting a bright career in the sector. After passing the Salesforce Mule-Dev-301 test you will easily apply for good jobs in top companies all over the world. Salesforce Mule-Dev-301 exam offers multiple advantages including, high salaries, promotions, enhancing resumes, and skills improvement. Once you pass the Mule-Dev-301 Exam, you can avail all these benefits. If you want to pass the Salesforce Mule-Dev-301 certification exam, you must find the best resource to prepare for the Salesforce Mule-Dev-301 test.

Salesforce Certified MuleSoft Developer II Sample Questions (Q58-Q63):

NEW QUESTION # 58
Refer to the exhibit.

Based on the code snippet, schema.json file, and payload below, what is the outcome of the given code snippet when a request is sent with the payload?

- A. The Mule flow will execute successfully with status code 204
- B. The Mule flow will execute successfully with status code 200, and the response will be the JSON sent in request
- C. The Mule flow will throw the exception 'JSON:SCHEMA_NOT_HONOURED
- D. The Mule flow will execute successfully with status code 200m and a response will display the message " Age in years which must equal to or greater than zero."

Answer: C

Explanation:
Based on the code snippet, schema.json file, and payload below, the outcome of the given code snippet when a request is sent with the payload is that the Mule flow will throw the exception 'JSON:SCHEMA_NOT_HONOURED'. This is because the payload does not conform to the schema.json file, which specifies that age must be a number greater than or equal to zero. The payload has age as a string with a negative value, which violates the schema. Therefore, the validate-schema operation throws an error with type 'JSON:SCHEMA_NOT_HONOURED'. Reference: https://docs.mulesoft.com/json-module/1.1/json-validate-schema

NEW QUESTION # 59
A mule application exposes and API for creating payments. An Operations team wants to ensure that the Payment API is up and running at all times in production.
Which approach should be used to test that the payment API is working in production?

- A. Create a health check endpoint that reuses the same port number and HTTP Listener configuration as the API itself
- B. Create a health check endpoint that listens on a separate port and uses a separate HTTP Listener configuration from the API
- C. Monitor the Payment API directly sending real customer payment data
- D. Configure the application to send health data to an external system

Answer: B

Explanation:
To test that the payment API is working in production, the developer should create a health check endpoint that listens on a separate port and uses a separate HTTP Listener configuration from the API. This way, the developer can isolate the health check endpoint from the API traffic and avoid affecting the performance or availability of the API. The health check endpoint should return a simple response that indicates the status of the API, such as OK or ERROR. Reference: https://docs.mulesoft.com/api-functional-monitoring/afm-create-monitor#create-a-monitor

NEW QUESTION # 60
Refer to the exhibit.

A Mule application pom.xml configures the Maven Resources plugin to exclude parsing binary files in the project's src/main/resources/certs directory.
Which configuration of this plugin achieves a successful build?

- A.
- B.
- C.
- D.

Answer: D

Explanation:
To configure the Maven Resources plugin to exclude parsing binary files in the project's src/main/resources/certs directory, option C should be used. This option specifies that any files with .cer or .jks extensions under the certs directory should be excluded from filtering. Filtering is a process of replacing placeholders with actual values in resource files during the build process. Binary files should not be filtered because they may become corrupted or unusable. Reference: https://maven.apache.org/plugins/maven-resources-plugin/examples/filter.html https://maven.apache.org/plugins/maven-resources-plugin/examples/include-exclude.html

NEW QUESTION # 61

A Mule implementation uses a HTTP Request within an Unit Successful scope to connect to an API.

How should a permanent error response like HTTP:UNAUTHORIZED be handle inside Until Successful to reduce latency?

- A. Put the HTTP Request inside a try scope in Unit Successful.
  In the error handler, use On Error Propagate to catch permanent errors like HTTP UNAUTHORIZED.
- B. Put the HTTP Request inside a try scope in Unit Successful.
  In the error handler, use On Error Continue to catch permanent errors like HTTP UNAUTHORIZED.
- C. In Until Successful configuration, set the retry count to 1 for error type HTTP: UNAUTHORIZED.
- D. Configure retrying until a MULERETRY_EXHAUSTED error is raised or the API responds back with a successful response.

Answer: B

Explanation:

To handle a permanent error response like HTTP:UNAUTHORIZED inside Until Successful, the developer should put the HTTP Request inside a try scope in Unit Successful, and use On Error Continue to catch permanent errors like HTTP UNAUTHORIZED in the error handler. This way, the developer can avoid retrying requests that will always fail due to a permanent error, and reduce latency. On Error Continue allows the flow to continue processing after handling the error. Reference: https://docs.mulesoft.com/mule-runtime/4.3/until-successful-scope https://docs.mulesoft.com/mule-runtime/4.3/on-error-continue-concept

NEW QUESTION # 62

Refer to the exhibit.
What is the result if "Insecure" selected as part of the HTTP Listener configuration?

- A. The HTTP Lister will accept any unauthenticated request
- B. The HTTP listener will only accept HTTP requests
- C. Mutual TLS authentication will be enabled between this HTTP Listener and an HTTP client
- D. The HTTP Listener will trust any certificate presented by the HTTP client

Answer: B

Explanation:

Based on the exhibit below, if 'Insecure' is selected as part of the HTTP Listener configuration, the HTTP listener will only accept HTTP requests. This means that no TLS context will be configured for this listener and no encryption or authentication will be applied to incoming requests. The protocol attribute of this listener will be set to HTTP instead of HTTPS. Reference: https://docs.mulesoft.com/http-connector/1.6/http-listener-ref#insecure

NEW QUESTION # 63

......

Join our success, In this way, customers Mule-Dev-301 are free to choose to buy or not to buy, which is nothing but utterly beneficial, One year updates freely, Many persons who purchased Mule-Dev-301 guide torrent and accepted our help have passed the exam.
