## Seit Neuem aktualisierte MD-102 Examfragen für Microsoft MD-102 Prüfung

Die Ausbildungsmaterialien zur Microsoft MD-102 Zertifizierungsprüfung aus ZertPruefung sind nicht nur der Grundstein auf dem Weg zu Ihrem Erfolg, sie können Ihnen auch dabei helfen, Ihre Fähigkeiten in der IT-Branche effektiver zu entfalten. Nach mehrjährigen Bemühungen beträgt die Hit-Rate von Microsoft MD-102 Zertifizierungsprüfung von ZertPruefung bereits 100%. Wenn Sie die Zertifizierungsprüfung nicht bestehen, nachdem Sie unsere Fragenpool gekauft haben, werden wir alle Ihre bezahlten Summe zurückgeben.

## Microsoft Endpoint Administrator MD-102 Prüfungsfragen mit Lösungen (Q124-Q129):

### 124. Frage

You need to meet the technical requirements for the iOS devices.

Which object should you create in Intune?

- A. A device configuration profile
- B. A compliance policy
- C. A Deployment profile
- D. An app protection policy

Antwort: A

Begründung:

Reference:

<https://docs.microsoft.com/en-us/intune/device-restrictions-configure>

<https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

### 125. Frage

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant by using Azure AD Connect.

You use Microsoft Intune and Configuration Manager to manage devices.

You need to recommend a deployment plan for new Windows 11 devices. The solution must meet the following requirements:

\* Devices for the marketing department must be joined to the AD DS domain only. The IT department will install complex applications on the devices at build time, before giving the devices to the marketing department users.

\* Devices for The sales department must be Azure AD joined. The devices will be shipped directly from the manufacturer to The homes of the sales department users.

\* Administrative effort must be minimized.

Which deployment method should you recommend for each department? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' in the Microsoft Intune console. It features two dropdown menus for selecting deployment methods. The 'Sales' dropdown is set to 'Windows Autopilot with automatic registration', and the 'Marketing' dropdown is set to 'Configuration Manager'. Both dropdowns are open, showing a list of options: 'Configuration Manager', 'Windows Autopilot with automatic registration', 'Windows Autopilot with manual registration', and 'Windows Autopilot with OEM registration'. The selected options are highlighted in the dropdown lists.

Antwort:

Begründung:

Answer Area

This screenshot is similar to the one above, showing the 'Answer Area' in the Microsoft Intune console. It features two dropdown menus for selecting deployment methods. The 'Sales' dropdown is set to 'Windows Autopilot with automatic registration', and the 'Marketing' dropdown is set to 'Configuration Manager'. Both dropdowns are open, showing a list of options: 'Configuration Manager', 'Windows Autopilot with automatic registration', 'Windows Autopilot with manual registration', and 'Windows Autopilot with OEM registration'. The selected options are highlighted in the dropdown lists.

Explanation:

Answer Area

Sales: Windows Autopilot with automatic registration

Marketing: Configuration Manager

## 126. Frage

Case Study 3 - Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

Contoso has a Microsoft 365 E5 subscription.

Environment

Network Environment

The network contains an on-premises Active Directory domain named contoso.com. The domain contains the servers shown in the following table.

Name	Operating system	Role
DC1	Windows Server 2019	Domain controller
Server1	Windows Server 2016	Member server
Server2	Windows Server 2019	Member server

Contoso has a hybrid Azure Active Directory (Azure AD) tenant named contoso.com.

Contoso has a Microsoft Store for Business instance.

Users and Groups

The contoso.com tenant contains the users shown in the following table.

Name	Azure AD role	Microsoft Store for Business role	Member of
User1	Cloud device administrator	Basic Purchaser	GroupA
User2	Azure AD joined device local administrator	Device Guard signer	GroupB
User3	Global reader	Purchaser	GroupA, GroupB
User4	Global administrator	None	Group1

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group1 and Group2 have a Membership type of Assigned.

Devices

Contoso has the Windows 10 devices shown in the following table.

Name	Type	Member of	Scope (Tags)
Device1	Corporate-owned	Group1	Default
Device2	Corporate-owned	Group1, Group2	Tag2
Device3	Personally-owned	Group1	Tag1
Device4	Personally-owned	Group2	Tag2
Device5	Corporate-owned	Group3	Default

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Secure Boot	VPN connection
Device1	Yes	No	VPN1
Device2	Yes	Yes	VPN1, VPN3
Device3	No	No	VPN3
Device4	No	Yes	None
Device5	Yes	No	None

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder1.

Microsoft Endpoint Manager Configuration

Microsoft Endpoint Manager has the compliance policies shown in the following table.

Name	Configuration	Assignment
Policy1	Require BitLocker only	Group1
Policy2	Require Secure Boot only	Group1
Policy3	Require BitLocker and Secure Boot	Group2

The Compliance policy settings are shown in the following exhibit.

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as 

Compliant  Not Compliant

Enhanced jailbreak detection 

Enabled  Disabled

Compliance status validity period (days) 

30 

The Automatic Enrollment settings have the following configurations:

MDM user scope: GroupA

MAM user scope: GroupB

You have an Endpoint protection configuration profile that has the following Controlled folder access settings:

Name: Protection1

Folder protection: Enable

List of apps that have access to protected folders: C:\\*AppA.exe

List of additional folders that need to be protected: D\Folder1

Assignments:

- Included groups: Group2, GroupB

Windows Autopilot Configuration

Contoso has a Windows Autopilot deployment profile configured as shown in the following exhibit.

- Assignments:

- - Included groups: GroupA

- - Excluded groups: GroupB

Purchase an app named App1 that is available in Microsoft Store for Business and to assign the app to all the users.

Technical Requirements

Contoso must meet the following technical requirements:

Users in GroupA must be able to deploy new computers.

Administrative effort must be minimized.

Which users can purchase and assign App1?

- A. User1 and User3 only
- **B. User1, User3, and User4 only**
- C. User3 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4

**Antwort: B**

Begründung:

Global Administrator and Billing Administrator - IT Pros with these accounts have full access to Microsoft Store. They can do everything allowed in the Microsoft Store Admin role, plus they can sign up for Microsoft Store.

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

### 127. Frage

You have an Azure Active Directory (Azure AD) tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune.

You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Device restrictions settings.
- B. To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configure Windows Defender Firewall with Advanced Security.
- C. To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configure Windows Defender Antivirus settings.
- **D. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Endpoint protection settings.**
- E. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Endpoint protection settings.
- **F. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Device restrictions settings.**

**Antwort: D,F**

Begründung:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-windows-10>

> include only Defender AV

<https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-windows-10?toc=/intune/configuration/toc.json&bc=/intune/configuration/breadcrumb/toc.json>

> include only Defender FW

### 128. Frage

You have a Microsoft Deployment Toolkit (MDT) server named MDT1.

When computers start from the LiteTouchPE\_x64.iso image and connect to MDT1, the welcome screen appears as shown in the following exhibit.

You need to prevent the welcome screen from appearing when the computers connect to MDT1.

Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Antwort:**

**Begründung:**

**Explanation**

Box 1: Modify the Bootstrap.ini file.

Add this to your bootstrap.ini file and then update the deployment share and use the new boot media created in that process:

SkipBDDWelcome=YES

Box 2: Modify the CustomSettings.ini file.

SkipBDDWelcome

Indicates whether the Welcome to Windows Deployment wizard page is skipped.

For this property to function properly it must be configured in both CustomSettings.ini and BootStrap.ini.

BootStrap.ini is processed before a deployment share (which contains CustomSettings.ini) has been selected.

Box 3: Update the deployment share.
