Study AD0-E117 Materials - AD0-E117 Test Dumps.zip
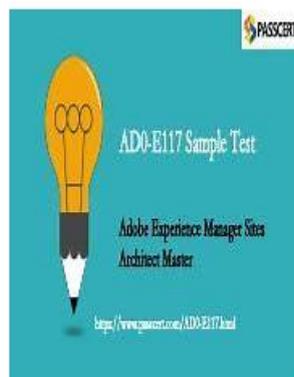

The best way for candidates to know our AD0-E117 training dumps is downloading our free demo. We provide free PDF demo for each exam. This free demo is a small part of the official complete Adobe AD0-E117 training dumps. The free demo can show you the quality of our exam materials. You can download any time before purchasing. You can tell if our products and service have advantage over others. I believe our Adobe AD0-E117 training dumps will be the highest value with competitive price comparing other providers.

Adobe AD0-E117 exam is part of the Adobe Certified Expert (ACE) program, which is a globally recognized certification program for Adobe products. It is specifically designed for AEM architects who want to demonstrate their expertise in designing and implementing AEM solutions. AD0-E117 Exam covers a wide range of topics, including AEM architecture, deployment, security, performance optimization, and integration with other systems.

Top Features of BraindumpsPrep Adobe AD0-E117 Exam Questions

The valid updated, and real Adobe AD0-E117 PDF questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in the Adobe AD0-E117 Certification Exam and start this journey with BraindumpsPrep AD0-E117 exam PDF dumps and practice test software.

Adobe Experience Manager Architect Master Sample Questions (Q14-Q19):

NEW QUESTION # 14

AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:

[Frt Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- A. Add additional dispatcher servers
- B. Review and optimize the Dispatcher cache configuration
- C. Create a cron job that will delete the dispatcher cache on a regular basis
- D. Add additional AEM instances to the Publish Farm

Answer: B

Explanation:
According to Adobe Experience Manager documentation5, dispatcher is a caching and load balancing tool that can be used to improve performance and security of AEM sites. Dispatcher cache configuration can be adjusted using various properties in the dispatcher.any file6. Creating a cron job that will delete the dispatcher cache on a regular basis is not a good idea as it will reduce the cache hit ratio and increase the load on AEM servers.

NEW QUESTION # 15

During the implementation of a public-facing website based on AEM as a Cloud Service, the customer raises an additional requirement to have a commenting functionality for end users implemented on the pages.
What should the Architect do to make the design a future proof solution?

- A. Save comments in JCR and leverage reverse replication to synchronize comments via author
- B. Save comments in JCR and leverage Sling Distribution to synchronize comments between publishers
- C. Integrate a third-party solution to store comments externally
- D. Use MongoDB as provided with AEM as a Cloud Service to store the comments

Answer: C

Explanation:
"integrating a third-party solution to store comments externally can provide a future proof solution that does not depend on AEM as a Cloud Service limitations or changes".

NEW QUESTION # 16

A customer is about to go live with a new website on AEM on prem. The DNS (www.domam.com) already points to the load balancer of the AEM environment and final sanity checks are being performed. The website was tested in lower environments without SSL On production, the website is served over https. During sanity testing, all requests result in a 404.
While investigating this issue, an Architect determines the following:
* The requests land on port 443 on the load balancer where SSL is terminated and an HTTP header X-Forwarded-Proto is set
* The website Sling Mapping is created beneath /etc/map/http/www.domain.com.80
* The URLs on the website are externalized with http in the absolute links Which two actions should the Architect take to resolve this problem? (Choose two.)

- A. Configure Apache Felix Http Service SSL Filter to use the correct SSL forward header
- B. Ensure the Sling Mapping exist at /etc/map/httpj)mwp<.domain.com.443Configure the Adobe Granite SSL Connector Factory with the correct SSL port
- C. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.443
- D. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.80

Answer: A,B

Explanation:
"the Sling Mapping should match the protocol and port of the incoming request, which in this case is https and 443. The Apache Felix Http Service SSL Filter should be configured to use the X-Forwarded-Proto header to detect if the request is secure or not".

NEW QUESTION # 17

During an optimization session, a client using AEM 6.5 mentions that they face challenges with their AEM Author setup. The client has significant repository growth and can see an increased amount of TAR files in the segmentstore on disk. When editors are working, they see that workflows take up more time. The purging of workflows works as expected. Which two optimizations should an Architect suggest to took into and further investigate? (Choose two.)

- A. Configure the Maximum Parallel Jobs
- B. Increase the maxFileSize of the TAR segmentstore
- C. Leverage workflow offloading for all workflows
- D. Leverage Transient Workflows where possible
- E. Execute an offline tar compaction twice a day

Answer: C,D

Explanation:
Leverage workflow offloading for all workflows and Leverage Transient Workflows where possible123. According to Adobe Experience Manager documentation2, workflow offloading is a technique that distributes processing tasks among AEM instances in a topology. This can improve performance and scalability of AEM author instances by using dedicated instances for executing workflows. Transient workflows are workflows that do not persist any data or history and are automatically purged after completion3. This can reduce repository growth and improve workflow efficiency.

NEW QUESTION # 18

A client with an existing AEM 6.5 AMS (Adobe Managed Services) implementation wants to start selling its products in Mainland China.

The client owns a state-issued ICP (Internet Content Provider) license.

The client does not accept high-latency calls for uncached content.

The client does not accept content being potentially blocked by a Chinese firewall.

The client wants to have an in-China hosting solution.

What option would the AEM architect recommend to cover the scenario above?

- A. Provision an on-premise AEM 6.5 near-China hosted environment that is accessed via an in-China CDN (Content Delivery Network).
- B. Migrate the existing AMS AEM environment to AEMaaCS and create the environment with multiple Cloud Service Environment regions
- C. Reach out to AMS to set up an Adobe Experience Manager Managed Services for China infrastructure
- D. Use an in-China CDN (Content Delivery Network) that interfaces with the existing AMS AEM set-up

Answer: C
