SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Employee Central Core Sample Questions (Q20-Q25):

NEW QUESTION # 20

You need to create a one-to-many association from Location to Legal Entity. You also need to configure filtering of the Location field based on the Company field in the Job Information block.

What do you need to add to the data models? Note: There are 2 correct answers to this question.

- A. <association> as part of <hris-element id="jobInfo">
- B. <field-criteria> as part of <hris-field="location">
- C. <field-criteria> as part of <hris-field="company">
- D. <association> as part of <hris-element id="location">

Answer: B,D

Explanation:

To establish a one-to-many association from Location to Legal Entity and enable filtering of the Location field based on the Company field in the Job Information block, the following configurations are necessary:

* Define the Association in the Location Object:

* In the location object definition, add an <association> element to link it to the legalEntity object. This association should be defined within the <hris-element id="location"> section.

* Configure Field Criteria for the Location Field:

* Within the Job Information (jobInfo) element, add a <field-criteria> element as part of the <hris-field id="location">. This configuration ensures that the Location field is filtered based on the selected Company (Legal Entity) in the Job Information block.

Therefore, the correct answers are:

* B: <field-criteria> as part of <hris-field id="location">

* D: <association> as part of <hris-element id="location">

These configurations align with the standard practices for setting up associations and field criteria in SAP SuccessFactors Employee Central.

NEW QUESTION # 21

Which of the following can you use to explore released APIs?

- A. SAP Business Accelerator Hub
- B. SAP Integration Suite
- C. SAP Application Interface Framework

Answer: A

NEW QUESTION # 22

How does the system validate the destination object for composite associations?

- A. The system validates if the destination object has effective dating set to None.
- B. The system validates if the destination object has effective dating set to Basic.
- C. The system validates if the destination object has effective dating set to Multiple Changes Per Day.
- D. The system validates if the destination object has effective dating set to From Parent.

Answer: D

Explanation:

In SAP SuccessFactors Employee Central, when configuring composite associations, the system validates that the destination object has its effective dating set to "From Parent." This setting ensures that the effective dates of the associated records are synchronized with the parent object, maintaining data consistency across related entities.

This validation is crucial because it ensures that any changes in the parent object's effective dates are appropriately reflected in the associated child objects, thereby preserving the integrity of historical data and future-dated records.
