

100% Pass Quiz 2026 Authoritative Fortinet EMEA-Advanced-Support: Download Fortinet EMEA Advanced Support Exam Pdf

Fortinet NSE 2 Questions and Answers 100% Pass

What are organizations doing to stay competitive?

Adopting new models of connectivity and data sharing including Cloud computing and enabling the IoT

Should we take the vendor's word for how good their products are?

No. We need to have 3rd party verification.

Governing bodies all over the world are mandating risk management processes. What does an org have to do to comply with these processes?

Compliance includes:

1) auditing

2) monitoring

3) adherence

There used to be a clearly defined border (perimeter) to secure a network. Is that still the case today?

No. Today we say the network is borderless because of the Cloud, BYOD, IoT, and wireless.

Now we need intelligent security that can see the entire network and all the devices connected to it.

Does slow mean broken?

Yes. Security has to be high performance and cannot slow down the business.

For candidates who are going to attend the exam, the pass rate is quite important. EMEA-Advanced-Support training materials of us are pass guaranteed, and if you can't pass the exam one time, we are money back guaranteed. Besides EMEA-Advanced-Support training materials are verified by skilled experts, therefore the quality and accuracy can be guaranteed, and you can use the EMEA-Advanced-Support Exam Dumps at ease. We also have online and offline chat service stuff, if any other questions, please contact us, we will give a reply to you as quickly as possible.

Using the Fortinet EMEA-Advanced-Support updated product of TestPassed will result in cracking the EMEA-Advanced-Support real test on the first try. The reliability and accuracy of our Fortinet EMEA-Advanced-Support practice questions make us one of the trusted brands in the market. TestPassed proudly presents you with an EMEA-Advanced-Support Exam Dumps that carry actual Fortinet EMEA-Advanced-Support questions.

Pass Guaranteed Quiz 2026 Fortinet EMEA-Advanced-Support: Fortinet

EMEA Advanced Support Exam Fantastic Download Pdf

Before you try to attend the EMEA-Advanced-Support practice exam, you need to look for best learning materials to easily understand the key points of EMEA-Advanced-Support exam prep. There are EMEA-Advanced-Support real questions available for our candidates with accurate answers and detailed explanations. We are ready to show you the most reliable EMEA-Advanced-Support PDF VCE and the current exam information for your preparation of the test.

Fortinet EMEA Advanced Support Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which of the following is a benefit of using FortiGate's Security Fabric?

- A. It automatically configures VLANs on FortiSwitches
- B. It increases the speed of IPsec VPN tunnels
- C. It reduces the need for firewall policies
- **D. It enables centralized management of multiple Fortinet devices**

Answer: D

Explanation:

The Fortinet Security Fabric provides a centralized management platform for multiple Fortinet devices (e.g., FortiGate, FortiSwitch, FortiAP), enabling coordinated security policies, telemetry sharing, and simplified administration. It does not directly speed up VPNs (B), reduce firewall policies (C), or auto-configure VLANs (D). Exact extract: "The Fortinet Security Fabric enables centralized management and visibility across Fortinet devices, allowing coordinated security policies and telemetry sharing for enhanced protection."

NEW QUESTION # 47

Which of these BGP paths will be the preferred one ?

- **A. Prefer the path with the highest Local Preference value**
- B. Prefer the path with the lowest Multi-Exit Discriminator (MED)
- C. Prefer the path with the shortest AS Path
- D. Prefer External path (learned via EBGP) over Internal path (IBGP)

Answer: A

Explanation:

BGP path selection follows a specific order of attributes to determine the best path. The process prefers the path with the highest local preference first, as it is one of the earliest steps in the decision process. Local preference is used within an AS to influence outbound traffic. Only if local preferences are equal does it move to the next criteria, such as shortest AS path. The AS path length is considered after local preference, MED after that, and eBGP over iBGP even later. Therefore, among the options, the highest local preference (D) is the most preferred criterion. The original document's answer B is incorrect based on standard BGP selection rules implemented in Fortinet. Exact extract: This article describes the BGP route selection process. Scope FortiGate. Solution Consider only routes with no AS loops and a valid next hop. BGP makes routing decisions based on path, network policies and rulesets ... select the route with the lowest router ID as the best path. Network. Type. To achieve this, multiple route selection techniques can be used. Some are protocol-agnostic (for example, weight) and others are protocol-specific (for example ...).

NEW QUESTION # 48

In FortiGate, what is the purpose of a Virtual IP (VIP)?

- A. To enable load balancing for VPN tunnels
- B. To create a virtual interface for VLANs
- C. To assign a secondary IP to a physical interface
- **D. To map an external IP to an internal IP for NAT**

Answer: D

Explanation:

A Virtual IP (VIP) in FortiGate maps an external IP address to an internal IP for Destination NAT (DNAT), commonly used for

accessing internal servers from external networks. It is not for VLANs (B), secondary IPs (C), or VPN load balancing (D). Exact extract: "Virtual IPs (VIPs) are used for Destination NAT, mapping an external IP address to an internal IP to allow external access to internal resources, such as servers."

NEW QUESTION # 49

Link aggregation allows network devices to _____

- A. None of the above
- B. Restrict the bandwidth
- C. Increase bandwidth by binding physical interfaces into a single channel
- D. Increase bandwidth of an interface

Answer: C

Explanation:

Link aggregation, also known as IEEE 802.3ad or 802.1ax, enables the binding of multiple physical interfaces to form a single logical interface, which increases the overall bandwidth and provides redundancy. This is achieved by combining the bandwidth of the individual links into one aggregated link. For example, if two

1Gbps interfaces are aggregated, the logical link can provide up to 2Gbps bandwidth. This configuration is commonly used in FortiGate devices to enhance network performance without replacing hardware. The option B correctly describes this by stating "Increase bandwidth by binding physical interfaces into a single channel," which aligns with the official description. Incorrect options include A, which is vague and does not specify the method of binding multiple interfaces; C, which is the opposite of the purpose; and D, which is invalid.

Exact extract: Link aggregation (IEEE 802.3ad/802.1ax) enables you to bind two or more physical interfaces together to form an aggregated (combined) link. This new link ... Link aggregation combines multiple physical interfaces into a single logical interface, increasing bandwidth and link redundancy. Traffic is distributed evenly.

NEW QUESTION # 50

How does a stateful firewall control a TCP session?

- A. TCP sequence numbers and TCP flags are used to control the session
- B. TCP destination ports are used to control the session
- C. TCP source ports are used to control the session
- D. TCP ack numbers are used to control the session

Answer: A

Explanation:

A stateful firewall, like FortiGate, tracks TCP sessions by maintaining a state table that includes TCP sequence numbers and flags (e.g., SYN, ACK, FIN) to monitor the connection's lifecycle (establishment, data transfer, termination). This ensures proper session handling, detecting out-of-order packets or invalid states.

Source and destination ports identify the session but don't control its state, and ACK numbers alone are insufficient. Exact extract: "Stateful inspection tracks TCP sessions using sequence numbers and TCP flags (SYN, ACK, FIN, etc.) to ensure packets are valid and part of an established session... FortiGate maintains a state table to monitor the TCP connection states."

NEW QUESTION # 51

.....

The passing rate of our EMEA-Advanced-Support training quiz is high as 98% to 100% and the hit rate is also high. Our professional expert team seizes the focus of the exam and chooses the most important questions and answers which has simplified the important information and follow the latest trend to make the client learn easily and efficiently on our EMEA-Advanced-Support Study Guide. YOU can also free download the demos of our EMEA-Advanced-Support learning materials to have a check.
