### NEW QUESTION # 104

You have an Azure Virtual Desktop host pool named Pool1 in the East US region.

You have a storage account named storage1 that contains FSLogix profile containers. In the East US region, you have a shared image gallery named SIG1 that contains a virtual machine image named Image1.

Image1 is used to create new session hosts in Pool1.

You plan to deploy a new Azure Virtual Desktop host pool named Pool2 to the South India region. You need to implement a session host deployment solution for Pool2 that meets the following requirements:

- Image1 must replicate in the South India region.
- The session hosts in Pool2 must be based on Image1.
- Changes to Image1 must be available in the South India and East US regions.

What should you include in the solution?

- A. Create a new shared image gallery named SIG2 in the South India region. Upload a copy of Image1 to SIG2.
- **B. From SIG1, update the replication for the latest image version of Image1.**
- C. Create a new Azure Storage account named storage2 in the South India region. Copy Image1 to a shared folder in storage2.
- D. Configure geo-redundant storage (GRS) replication for storage1. Copy the VHD file of Image1 to the FSLogix profile container.

**Answer: B**

Explanation:

One example is to always replicate the latest image in multi-regions while all older versions are only available in 1 region. This can help save on storage costs for image versions.
