SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q22-Q27):

NEW QUESTION # 22
What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP Business Accelerator Hub
- B. SAP ABAP Environment
- C. SAP Business Technology Platform
- D. SAP Discovery Center

Answer: C

Explanation:
SAP Business Technology Platform (BTP) provides a foundation for the SAP Cloud ERP where integrations and extensions live. SAP BTP is a cloud-based platform that offers a range of services and capabilities to extend, integrate, and orchestrate SAP and

non-SAP applications. SAP BTP enables customers and partners to build extensions that are decoupled from the core SAP S/4HANA Cloud system, ensuring lifecycle stability and avoiding modification of SAP code. SAP BTP also leverages the huge library of free integration packages and extension templates available on the SAP Business Accelerator Hub, which can be consumed and customized according to the customer's needs. All services are listed in the SAP Discovery Center, where customers can explore, try, and buy SAP BTP services.

SAP ABAP Environment, SAP Discovery Center, and SAP Business Accelerator Hub are not the foundation for the SAP Cloud ERP, but rather components or tools that are related to SAP BTP. SAP ABAP Environment is a service on SAP BTP that allows customers and partners to develop and run ABAP code in the cloud. SAP Discovery Center is a portal that showcases the available services and solutions on SAP BTP and guides customers through the end-to-end journey of discovering, trying, buying, and implementing them.

SAP Business Accelerator Hub is a repository of ready-to-use integration packages and extension templates that can be deployed on SAP BTP to accelerate the implementation of SAP S/4HANA Cloud. NEW QUESTION # 23

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Maintain restrictions
- B. Assign business catalogs to a business role
- C. Assign PFCG profiles to a business role
- D. Maintain technical catalogs

Answer: A,B

Explanation:

You can complete the following activities in the Maintain Business Roles SAP Fiori app:

* Assign business catalogs to a business role. Business catalogs are collections of SAP Fiori apps that are relevant for a specific business area or task. You can add one or more business catalogs to a business role to grant access to the corresponding apps1.

* Maintain restrictions. Restrictions are rules that limit the access of a business role to certain data or functions based on predefined criteria, such as company code, plant, or sales organization. You can maintain restrictions for a business role in a new UI that provides an overview of the restriction types and values2.

You cannot complete the following activities in the Maintain Business Roles SAP Fiori app:

* Maintain technical catalogs. Technical catalogs are collections of SAP Fiori apps that are grouped by technical criteria, such as application component or OData service. Technical catalogs are not assigned to business roles, but rather to business catalogs as dependencies3.

* Assign PFCG profiles to a business role. PFCG profiles are authorization profiles that are created and maintained in the Profile Generator (PFCG) transaction in the SAP GUI. PFCG profiles are not assigned to business roles, but rather to business users as part of the user role assignment4. References

= Maintain Business Roles; Maintain Business Roles and Business Users; Maintain Business Roles - New (Preview); Maintain Business Catalogs

NEW QUESTION # 24

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Communication interface
- B. Communication arrangement
- C. Communication system
- D. Communication API

Answer: B,C

Explanation:

When you build an integration scenario using the SAP Fiori Communication Management apps in SAP S

/4HANA Cloud Public Edition, you must create a communication system and a communication arrangement.

A communication system represents the communication partner within a communication, such as the system that calls or provides services. A communication arrangement defines the settings for a specific communication scenario, such as the authentication

method, the communication user, and the service URL.
You can use the Communication Systems app and the Communication Arrangements app to create and manage these objects in the SAP Fiori launchpad. References = Setting up Communication Management - SAP Learning, Setting up SAP Best Practices Integrations - SAP Learning, Setting Up Integrations in SAP S
/4HANA Cloud Public Edition

NEW QUESTION # 25

What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?
Note: There are 2 correct answers to this question

- A. Configuration activities
- B. Group currency
- C. Fiscal year variant
- D. Scoping

Answer: B,C

Explanation:
Fiscal year variant and group currency are activities that are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration. These activities are part of the system provisioning step, which is the first step in the implementation process. Once the system provisioning is completed and confirmed, the system is locked for these activities and any changes would require a new system provisioning. Scoping and configuration activities, on the other hand, are not applied to the entire system and can be changed later on in the project experience step, which is the second step in the implementation process. Scoping and configuration activities allow the user to adapt the preconfiguration content to their company's needs and extend the configuration for areas not equipped with preconfiguration content. References = SAP Central Business Configuration - Overview, page 6; Configuring with SAP Central Business Configuration

NEW QUESTION # 26

You are recording actions for a custom process step in a test automate.
When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture a value in a text field that should be stored as a variable.
- B. To capture text in a message screen that can be used for data binding later.
- C. To capture an error message on the screen that can be used later.
- D. To capture a static label on the screen that should be checked during test execution.

Answer: A,B

NEW QUESTION # 27

......

These features have made TestPDF C-S4CPB-2508 pdf questions format the most reputable prep material for the quick and restrictions-free exam preparation. As laptops, tablets, and smartphones support this SAP C-S4CPB-2508 pdf format, you can easily learn from your comfort zone in your free time.
