## Free PDF Quiz 2026 APMG-International Fantastic ISO-IEC-27001-Foundation: Exam ISO/IEC 27001 (2022) Foundation Exam Simulator Fee

We believe that getting the newest information about the exam will help all customers pass the ISO-IEC-27001-Foundation exam easily. If you purchase our study materials, you will have the opportunity to get the newest information about the ISO-IEC-27001-Foundation exam. More importantly, the updating system of our company is free for all customers. If you decide to buy and use the ISO-IEC-27001-Foundation Training Materials from our company, it will be very easy for you to pass the exam without doubt. We sincerely hope that you can achieve your dream in the near future by the ISO-IEC-27001-Foundation latest questions of our company.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q18-Q23):

#### NEW QUESTION # 18

What activity is done first when preparing for an initial certification audit?

- A. Agree the scope of the ISMS with the Certification Body auditor
- B. Provide documents to the Certification Body auditor for the Stage 1 audit
- C. Provide records to the Certification Body auditor for the Stage 2 audit
- D. Provide evidence that nonconformities from an internal audit have been actioned

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance: Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body. ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage 2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first. Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

#### NEW QUESTION # 19

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Ensuring information security objectives are established
- B. Implementing the actions from internal audits
- C. Communicating feedback from interested parties to the organization

- D. Producing a risk assessment report

**Answer: A**

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

\* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

\* "ensuring the integration of the ISMS requirements into the organization's processes;"

\* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

#### NEW QUESTION # 20

Which item is required to be included in an information security policy?

- A. A plan for the continual improvement of the information security management system
- B. A framework enabling concerns with the information security policy to be addressed
- **C. A commitment to satisfy applicable requirements related to information security**
- D. A Statement of Applicability which defines the necessary controls to be implemented

**Answer: C**

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

\* "includes information security objectives (or provides a framework for setting them)"

\* "includes a commitment to satisfy applicable requirements related to information security"

\* "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself.

Thus, the correct answer is A.

#### NEW QUESTION # 21

What is the definition of a threat according to ISO/IEC 27000?

- **A. A potential cause of an unwanted incident which can result in harm to a system or organization**
- B. The risk remaining after risk treatment
- C. A single or a series of unwanted or unexpected information security events
- D. A weakness of an asset or a control that can be exploited

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

\* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

\* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

\* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

## NEW QUESTION # 22

Which of the following statements about the differences between an internal audit and a certification audit is true?

An internal audit is conducted at planned intervals and a certification audit is conducted annually An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Both 1 and 2 are true
- **B. Only 2 is true**
- C. Neither 1 or 2 is true
- D. Only 1 is true

**Answer: B**

Explanation:

ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency. Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually." This makes statement 1 inaccurate.

Audit types are defined in ISO/IEC 19011:

First-party audits: conducted internally by or on behalf of the organization (internal audits).

Third-party audits: conducted by independent external certification bodies.

Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

## NEW QUESTION # 23

.....

ITExamSimulator provides exam dumps designed by experts to ensure that the candidates' success. This means that there is no need to worry about your results since everything ISO-IEC-27001-Foundation exam dumps are verified and updated by professionals. APMG-International ISO-IEC-27001-Foundation Exam are made to be a model of actual exam dumps. Therefore, it can help users to feel in a real exam such as a real exam. This will improve your confidence and lessen stress to be able to pass the actual tests.
