

2V0-16.25 Prüfungsfragen, 2V0-16.25 Fragen und Antworten, VMware vSphere Foundation 9.0 Administrator

Man sollte die verlässliche Firma auswählen, wenn man etwas kaufen will. Was wir Fast2test Ihnen garantieren können sind: zuerst, die höchste Bestehensquote der VMware 2V0-16.25 Prüfung, die Probe mit kostenfreier Demo der VMware 2V0-16.25 sowie der einjährige kostenlose Aktualisierungsdienst. Um mehr Ihre Sorgen zu entschlagen, garantieren wir noch, falls Sie die VMware 2V0-16.25 Prüfung leider nicht bestehen, geben wir Ihnen alle Ihre bezahlte Gebühren zurück. Fast2test----Ihr bester Partner bei Ihrer Vorbereitung der VMware 2V0-16.25!

VMware 2V0-16.25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Thema 2	Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Thema 3	Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Thema 4	Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

Thema 5	VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

2V0-16.25 Schulungsangebot & 2V0-16.25 Buch

Die Schwierigkeiten können den Charakter eines Menschen testen. Eine schlechte Situation kann die Aufrichtigkeit eines Menschen zeigen. Wenn man einer schlechten Situation gegenüberstehen, können nur die mutigen es ganz leichtnehmen. Sind Sie ein mutiger Mensch? Wenn Sie sich nicht so gut auf Ihre Prüfung vorbereiten, können Sie es noch leichtnehmen. Weil Sie die Fragenkataloge zur VMware 2V0-16.25 Prüfung von Fast2test haben. Und eine VMware 2V0-16.25 Prüfung wird Sie nicht niederschlagen.

VMware vSphere Foundation 9.0 Administrator 2V0-16.25 Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Automation
- B. VCF Operations
- C. vSphere Client
- D. VCF Fleet Management

Antwort: C

Begründung:

To deploy the VCF Operations for Logs OVA appliance:

- * The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.
- * After deployment, the appliance can be configured and integrated with VCF.

Other options:

- * A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
- * C. VCF Automation# Provides automation workflows, not appliance deployment.
- * D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.

References:

VMware Cloud Foundation 9.0 -Deploying VCF Operations for Logs Appliance VMware Docs: Deploy OVF/OVA Templates Using vSphere Client

23. Frage

Which scenario demonstrates the benefit of server consolidation using VMware server virtualization?

- A. Running multiple independent machines on a single physical host.
- B. Automating the deployment of application clusters.
- C. Performing load balancing between web servers.
- D. Providing protection against ransomware attacks.

Antwort: A

Begründung:

The core benefit of server consolidation using VMware server virtualization is the ability to run multiple independent virtual machines (VMs) on a single physical host.

- * This increases hardware utilization, reduces physical server sprawl, and cuts operational costs.
- * A. Load balancing# Achieved through features like DRS, not basic server consolidation.
- * C. Ransomware protection# Achieved through security features and backups, not consolidation.
- * D. Automating application clusters# A benefit of orchestration tools, not consolidation.

References:

VMware vSphere 9.0 - Server Consolidation Benefits

VMware Docs: VMware Virtualization Fundamentals

24. Frage

An administrator is preparing to deploy VMware vSphere Foundation using the VMware Cloud Foundation (VCF) Installer wizard. During host onboarding, it is discovered that the VMware ESX hosts each have different root passwords.

Which deployment method must be used to continue the installation?

- A. Set the password to expire on all ESX hosts.
- B. Use the deployment wizard and enter credentials per host manually.
- **C. Use a JSON specification file to define per-host credentials.**
- D. Proceed with the wizard and override host credentials during staging.

Antwort: C

Begründung:

When deploying VMware vSphere Foundation using the VCF Installer wizard, host onboarding requires consistent access credentials.

- * If ESX hosts have different root passwords, the wizard cannot proceed using a single credential.
- * In this case, administrators must use a JSON specification file to define per-host credentials, ensuring each host can be onboarded successfully.
- * The JSON specification allows defining host-specific parameters (IP, hostname, root password, networking, etc.).

Other options are incorrect:

- * A. Proceed with wizard and override host credentials during staging# Not supported.
- * B. Use deployment wizard and enter credentials per host manually# Wizard requires uniform credentials.
- * C. Set password to expire on all ESX hosts# Irrelevant to deployment and would cause failures.

References:

VMware Cloud Foundation Deployment Guide - Host onboarding using JSON specification (covered in installer documentation).

VMware Docs: Using JSON Specification for VCF Deployment

25. Frage

An administrator is tasked to configure VMware Cloud Foundation (VCF) Operations alerts to notify only relevant stakeholders when alerts trigger.

Which configuration step will satisfy the requirement?

- A. Configure notification for only critical alerts.
- B. Configure notification to write a file to an output folder.
- C. Configure notification to use generic contact information.
- **D. Configure notification to specific alert recipients.**

Antwort: D

Begründung:

In VCF Operations, alerts can be configured with notification settings. To ensure only relevant stakeholders receive alerts:

- * You assign specific recipients to notifications.
- * This avoids alert fatigue and ensures teams only see alerts they are responsible for.

Other options:

- * A. Write to file# Not for stakeholder notifications.
- * B. Only critical alerts# Reduces volume, but still not targeted to relevant recipients.
- * D. Generic contact info# Sends to broad groups, not selective.

References:

26. Frage

Which rule in a virtual machine (VM) storage policy is configured to ensure data redundancy in a VMware vSAN environment?

- A. Disk Stripes Per Object
- B. Stripe Width
- C. Flash Read Cache Reservation
- **D. Failures to Tolerate**

Antwort: D

Begründung:

The VM Storage Policy rule that controls data redundancy in vSAN is Failures to Tolerate (FTT).

* Defines the number of hardware failures (host, disk, network) that vSAN can tolerate while maintaining data availability.

* Configurations include RAID-1 (mirroring), RAID-5/6 (erasure coding).

Other options:

* B. Disk Stripes Per Object# Defines performance striping, not redundancy.

* C. Stripe Width# Same as above, not redundancy.

* D. Flash Read Cache Reservation# Relates to caching performance, not redundancy.
