2026 Salesforce Arch-302: Pass-Sure Reliable Salesforce Certified B2C Solution Architect Test Prep

Are you sometimes nervous about the coming Arch-302 exam and worried that you can't get used to the condition? Never worry, we can offer 3 different versions for you to choose: PDF, Soft and APP versions. You can use the Soft version of our Arch-302 study materials to stimulate the exam to adjust yourself to the atmosphere of the real exam and adjust your speed to answer the questions. The other 2 versions also boost their own strength and applicable method and you could learn our Arch-302 training quiz by choosing the most suitable version to according to your practical situation.

Salesforce Certified B2C Solution Architect Sample Questions (Q13-Q18):

NEW QUESTION # 13

Universal Containers (UC) uses B2C Commerce, Marketing Cloud, and Salesforce OMS for their online sales capabilities. Given recent logistics constraints and challenges, many customers are asking UC for the ability to make their purchases online but pick them up at a local store or location (BOPIS).

Which consideration should a Solution Architect keep in mind when designing a solution for UC that would allow for this functionality?

- A. Manage inventory data inside of B2C Commerce so it is easier to parse by store.
- B. Marketing Cloud Mobile Push is required for this solution and must be enabled.
- C. Manage inventory data inside of Salesforce OMS so it is easier to parse by store.
- D. Manage B2C Commerce geolocation data for stores on an order by order basis.

Answer: A

Explanation:

This answer is correct because managing inventory data inside of B2C Commerce makes it easier to parse by store and enable buy online pick up in store (BOPIS) functionality. B2C Commerce can store inventory information for multiple locations and provide real-time availability information to customers and service agents. B2C Commerce can also integrate with Salesforce OMS to manage order fulfillment and payment processing for BOPIS orders. References: https://help.salesforce.com/s/articleView?id=sf.b2c_commerce_oms_integration.htm&type=5

NEW QUESTION # 14

Northern Trail Outfitters (NTO) exported all the Account records from Salesforce and used a data transformation tool to clean up values in the phone field using a standardized format. The export file has more than 2 million records. During previous data loads for similar updates on the Account object, NTO did not experience any issues with row lock.

Which feature of Data Loader should be used to load this data back into Salesforce faster?

- A. SOAP API
- B. REST API
- C. Bulk API Serial Mode
- D. Bulk API

Answer: D

Explanation:

Bulk API is a feature of Data Loader that allows loading large amounts of data into Salesforce faster and more efficiently. Bulk API uses asynchronous processing to handle data in batches, which reduces network overhead and improves performance. Bulk API is suitable for loading data files with more than 20,000 records or larger than 10 MB. The export file has more than 2 million records, so Bulk API should be used to load this data back into Salesforce faster. References:

* https://help.salesforce.com/s/articleView?id=sf.data_loader_bulk.htm&type=5

* https://developer.salesforce.com/docs/atlas.en-us.api_asynch.meta/api_asynch/asynch_api_intro.htm

NEW QUESTION # 15

A customer is currently implementing B2C Commerce and wants to use Marketing Cloud to send triggered emails like the Welcome Email, Order Confirmation, and Order Status Update Email. The customer is not interested in Sales or Service Cloud.

Which three steps are required to configure the Marketing Cloud for B2C Commerce storefront triggered emails?

Choose 3 answers

- A. Extend the B2C Commerce storefront to trigger emails via Marketing Cloud's journey REST APIs.
- B. Copy and paste the Collect Script within the head or body in the website template.
- C. Set up jobs in B2C Commerce to send catalog, product, order, and customer to Marketing Cloud SFTP.

- D. Configure data extensions in Marketing Cloud for B2C Commerce objects.
- E. Update order.export custom object in B2C Commerce with the Marketing Cloud object data extension

Answer: A,B,E

Explanation:

B: Extending the B2C Commerce storefront to trigger emails via Marketing Cloud's journey REST APIs allows the customer to send triggered emails based on customer behavior on the storefront, such as signing up, placing an order, or abandoning a cart. The REST APIs can also pass data attributes, such as order details or personalization information, to Marketing Cloud. D. Copying and pasting the Collect Script within the head or body in the website template allows the customer to track customer behavior on the storefront using Marketing Cloud's Web & Mobile Analytics feature. The Collect Script can also capture customer attributes, such as email address or contact key, and send them to Marketing Cloud. E. Updating order.export custom object in B2C Commerce with the Marketing Cloud object data extension allows the customer to map order data from B2C Commerce to Marketing Cloud using a point-and-click configuration in Business Manager.

This enables order data synchronization between B2C Commerce and Marketing Cloud. References:

NEW QUESTION # 16

Universal Containers is about to expand from their existing product efforts around watches into creating smart watches. These watches are intended to integrate with the users smart phone but also gather and collect health data from the watch and the phone. Universal Containers has never had to manage or work with health related data and are concerned about how to go further while still keeping their users trust.

What is a next step a Solution Architect should suggest to provide UC the kind of understanding they are looking for?"

Choose 1 answers

- A. Run a Journey Mapping Workshop to understand the users' interactions with the system
- B. Speak with a Legal Expert in regards to HIPPA and PHI Data
- C. Run a Consequence Scanning Workshop to understand the impact of the work
- D. Does the team need front-end development capabilities?
- E. Run a Requirements Gathering Workshop to start creating the build requirements

Answer: C

Explanation:

This answer is correct because it is a next step that a Solution Architect should suggest to provide UC the kind of understanding they are looking for regarding how to manage or work with health related data while still keeping their users trust. A Consequence Scanning Workshop is a method that helps identify potential positive and negative consequences of a product or service on people, society, and environment. It can help UC anticipate the impact of their work on their users' trust and privacy, and design solutions that mitigate risks and maximize benefits. NEW QUESTION # 17

Northern Trail Outfitters (NTO) wants to bring data from across all parts of their Salesforce Customer Success Platform Into the Marketing Cloud account. A Solution Architect recommends using Synchronized Data Sources In Contact Builder and Marketing Cloud Connect to Integrate multiple business units In their account.

Which API does the Solution Architect need to use with Marketing Cloud Connect for this integration?

- A. Tooling API
- B. REST API
- C. Streaming API
- D. SOAP API

Answer: D

Explanation:

* C is correct because Marketing Cloud Connect uses the SOAP API to integrate multiple business units in Marketing Cloud with Salesforce core orgs. The SOAP API enables data synchronization, triggered sends, journey builder integrations, and tracking data.

- * A is incorrect because the Tooling API is used to create and modify metadata in Salesforce core orgs, such as custom objects, fields, workflows, etc. It is not used for Marketing Cloud Connect integration.
- * B is incorrect because the REST API is used to access resources in Marketing Cloud, such as contacts, content, campaigns, etc. It is not used for Marketing Cloud Connect integration.
- * D is incorrect because the Streaming API is used to receive notifications of data changes in Salesforce core orgs, such as record updates, deletes, etc. It is not used for Marketing Cloud Connect integration.
