

# NetSec-Pro Reliable Dumps Files - NetSec-Pro New Dumps Files

DOWNLOAD the newest Test4Sure NetSec-Pro PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=12fAkjM2wwCOELWs6ax8Nd-M2ADLVZkkU>

If you lack confidence for your exam, choose the NetSec-Pro study materials of us, you will build up your confidence. NetSec-Pro Soft test engine strengthen your confidence by stimulating the real exam environment, and it supports MS operating system, it has two modes for practice and you can also practice offline anytime. Besides NetSec-Pro Study Materials are famous for high-quality. You can pass the exam by them. You can receive the latest version for one year for free if you choose NetSec-Pro exam dumps of us, and the update version will be sent to your email automatically.

Our NetSec-Pro study materials are superior to other same kinds of study materials in many aspects. Our products' test bank covers the entire syllabus of the test and all the possible questions which may appear in the test. Each question and answer has been verified by the industry experts. The research and production of our NetSec-Pro Study Materials are undertaken by our first-tier expert team. The clients can have a free download and tryout of our NetSec-Pro study materials before they decide to buy our products.

## Palo Alto Networks NetSec-Pro Realistic Reliable Dumps Files Pass Guaranteed Quiz

Our NetSec-Pro study quiz boosts many advantages and it is your best choice to prepare for the test. Our NetSec-Pro learning prep is compiled by our first-rate expert team and linked closely with the real exam. And our NetSec-Pro training materials provide three versions and multiple functions to make the learners have no learning obstacles. The passing rate of our NetSec-Pro Guide materials is high and you don't need to worry that you have spent money but can't pass the test.

### Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.</li> </ul>

### Palo Alto Networks Network Security Professional Sample Questions (Q19-Q24):

#### NEW QUESTION # 19

Which security profile provides real-time protection against threat actors who exploit the misconfigurations of DNS infrastructure and redirect traffic to malicious domains?

- A. Anti-spyware
- B. Vulnerability Protection
- C. URL Filtering
- D. Antivirus

**Answer: A**

Explanation:

The Anti-spyware profile includes DNS-based protections like sinkholing and detection of DNS queries to malicious domains, offering real-time protection against attacks that exploit DNS misconfigurations.

The Anti-Spyware profile protects against DNS-based threats by sinkholing DNS queries to malicious domains and detecting suspicious DNS activity, thus blocking data exfiltration and C2 communication.

#### NEW QUESTION # 20

A primary firewall in a high availability (HA) pair is experiencing a current failover issue with ICMP pings to a secondary device. Which metric should be reviewed for proper ICMP pings between the firewall pair?

- A. Non-functional state
- B. Link monitoring
- C. Bidirectional Forwarding Detection (BFD)
- D. Heartbeat polling

**Answer: D**

Explanation:

Heartbeat polling is a core HA function to monitor connectivity between HA peers, leveraging ICMP pings to determine link health and availability.

Heartbeat Polling uses ICMP pings to verify the connectivity and health of the HA peers. If heartbeat polling fails, the firewall considers the peer to be down and may initiate failover.

If ICMP pings fail, checking heartbeat polling logs helps identify if link or path monitoring triggers the failover.

#### NEW QUESTION # 21

After a firewall is associated with Strata Cloud Manager (SCM), which two additional actions are required to enable management of the firewall from SCM? (Choose two.)

- A. Deploy a service connection for each branch site and connect with SCM.
- B. Install a device certificate.
- C. Configure NTP and DNS servers for the firewall.
- D. Configure a Security policy allowing "stratacloudmanager.paloaltonetworks.com" for all users.

**Answer: B,C**

Explanation:

To fully manage a firewall from Strata Cloud Manager (SCM), it's essential to establish trust and ensure reliable connectivity:

Configure NTP and DNS servers

The firewall must have accurate time (NTP) and name resolution (DNS) to securely communicate with SCM and related cloud services.

To ensure successful management, configure the firewall's NTP and DNS settings to synchronize time and resolve domain names such as stratacloudmanager.paloaltonetworks.com

Install a device certificate

A device certificate authenticates the firewall's identity when connecting to SCM.

The device certificate authenticates the firewall to Palo Alto Networks cloud services, including SCM. It's a fundamental requirement to establish secure connectivity.

#### NEW QUESTION # 22

How do zones enhance security in a Palo Alto NGFW deployment?

- A. By limiting the need for SSL decryption

- B. By enforcing logging for all interfaces
- **C. By segmenting traffic and enabling granular policy enforcement**
- D. By creating dynamic routing paths

**Answer: C**

Explanation:

Zones in a Palo Alto NGFW are central to network segmentation, allowing administrators to define how traffic flows between different parts of the network. Security policies are enforced based on the source and destination zones, enabling precise control and reducing the attack surface by restricting unnecessary communication between network segments. This approach enhances security by allowing granular policy enforcement tied to logical network segments rather than just interfaces or IP addresses, making it more difficult for threats to move laterally within the environment.

### NEW QUESTION # 23

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- **A. Strata Logging Service**
- B. Prisma Cloud dashboard
- C. Service connection firewall
- **D. Strata Cloud Manager (SCM)**

**Answer: A,D**

Explanation:

Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service. Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.

"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

### NEW QUESTION # 24

.....

If you want to own a better and bright development in the IT your IT career, it is the only way for you to pass NetSec-Pro exam. Don't complain how difficult the NetSec-Pro exam is. Because our Test4Sure experienced technicians have provided efficient way for you to easily get NetSec-Pro Exam Certification. We constantly update test simulation software in order to help you who are preparing for NetSec-Pro exam by efforts to get the satisfactory results.
