CITM301 Lab 5 (2%)
Please note that late assignment will not be accepted

LAB5: Advanced TCP commands

1. NETSTAT -r shows content of the routing table. At the command prompt, input Netstat -r >> Q1.TXT. Use the double > sign so that information will not be overwritten each time the command is executed (for all questions you need to use >> symbol) as a redirection command

```
C:\Users\sadurya.gasperson> Netstat -r >> Q1.TXT
```

2. Run the following command
PATHPING jupiter.scs.ryerson.ca
 - a. How many hops (routers) exist from your station to Jupiter server?
2, 0-1
 - b. How long did it take to send a packet from your Workstation to Jupiter server in ms
0 trans

```
C:\Users\sadurya.gasperson>PATHPING jupiter.scs.ryerson.ca
Tracing route to jupiter.scs.ryerson.ca [141.117.57.31]
over a maximum of 30 hops:
  0  CCS-AVD-P3-3.ruad.ryerson.ca [10.253.18.6]
  1  *
Computing statistics for 0 seconds...
Source to Here   This Node/Link
Hop  RTT      Lost/Sent = Pct  Lost/Sent = Pct  Address
  0              0/    0 = 0%      0/    0 = 0%      CCS-AVD-P3-3.ruad.ryerson.ca [10.253.18.6]
Trace complete.
```

3. Run HOSTNAME command and redirect (using >> symbol) the answer to Q1.TXT

```
C:\Users\sadurya.gasperson>HOSTNAME>>Q1.TXT
C:\Users\sadurya.gasperson>HOSTNAME
CCS-AVD-P3-3
```

2026年Jpshikenの最新CITM PDFダンプおよびCITM試験エンジンの無料共有: https://drive.google.com/open?id=198N5DewX4ClzxM69LEYxfI Z3RdyM_60

IT業種が新しい業種で、経済発展を促進するチェーンですから、極めて重要な存在だということを良く知っています。Jpshikenの EXINのCITM試験トレーニング資料は高度に認証されたIT領域の専門家の経験と創造を含めているものです。その権威性は言うまでもありません。あなたはJpshikenの学習教材を購入した後、私たちは一年間で無料更新サービスを提供することができます。

なにごとによらず初手は難しいです、どのようにEXIN CITM試験への復習を始めて悩んでいますか。我々の EXIN CITM問題集を購入するのはあなたの試験に準備する第一歩です。我々の提供するEXIN CITM問題集はあなたの需要に満足できるだけでなく、試験に合格する必要があることです。あなたはまだ躊躇しているなら、JpshikenのCITM問題集デモを参考しましょう。

CITM過去問無料 & CITM技術試験

JpshikenはたくさんEXIN関連CITM認定試験の受験者に利便性を提供して、多くの人がJpshikenの問題集を使うので試験に合格しました。彼らはJpshikenの問題集が有効なこと確認しました。Jpshikenが提供しておりますのは専門家チームの研究したCITM問題と真題で弊社の高い名誉はたぶり信頼をうけられます。安心で弊社の商品を使うために無料なサンプルをダウンロードしてください。

EXIN EPI Certified Information Technology Manager 認定 CITM 試験問題

(Q36-Q41):

質問 # 36

Lately, the support desk is receiving several requests for password resets from individuals who appear to be unknown to the organization. Possible criminal activities are suspected, and the organization wishes to address this issue in their information security awareness program. What is the area that requires awareness?

- A. Internet usage
- **B. Social engineering**
- C. Instant (mobile) messaging
- D. E-mail usage

正解: B

解説:

Requests for password resets from unknown individuals suggests social engineering attacks, such as phishing or impersonation, where attackers manipulate users to gain unauthorized access. An information security awareness program should focus on educating staff about social engineering tactics to recognize and prevent such incidents.

E-mail usage (A), instant messaging (B), and internet usage (C) may be vectors for attacks, but the core issue is social engineering, which encompasses tactics used across these channels.

Reference: EPI CITM study guide, under Information Security Management, likely emphasizes social engineering in security awareness training. Refer to sections on security awareness or threat management.

質問 # 37

Little to no budget is available for hiring new staff for the IT service desk. What is the ideal method of sourcing knowing that little time is available?

- **A. Internet job board**
- B. Internal IT staff based on a SWOT analysis
- C. Recruitment agency
- D. Word of mouth

正解: A

解説:

Given the constraints of little to no budget and limited time, internet job boards are the ideal sourcing method. They are cost-effective (often free or low-cost), allow quick posting of job openings, and reach a wide pool of candidates, enabling rapid hiring.

Word of mouth (A) is informal and may not yield qualified candidates quickly. Internal IT staff based on SWOT analysis (B) is not a standard recruitment method and takes time to analyze. Recruitment agencies (D) are expensive and slower due to their processes, making them unsuitable for low-budget, urgent hiring.

Reference: EPI CITM study guide, under IT Organization, likely discusses recruitment strategies for IT staff, emphasizing cost-effective methods like job boards. Check sections on human resource management or staffing.

質問 # 38

What is the correct sequence of activities for a risk assessment?

- A. Monitor and review - establish context - identify - evaluate - treatment
- **B. Establish context - identify - analyse - evaluate - treatment**
- C. Identify - analyse - evaluate - treatment - monitor and review
- D. Communication - establish context - analyse - treatment - monitor and review

正解: B

解説:

The correct sequence for a risk assessment, as per ISO 31000 and ISO/IEC 27001, is: Establish context - identify - analyse - evaluate - treatment (C).

* Establish context: Define the scope, objectives, and criteria for the risk assessment (e.g., organizational goals, assets, and risk appetite).

* Identify: Identify potential risks (e.g., threats and vulnerabilities) that could impact objectives.

- * Analyse: Assess the likelihood and impact of identified risks to determine their severity.
- * Evaluate: Compare risks against risk criteria to prioritize them for treatment.
- * Treatment: Implement controls or strategies to mitigate, avoid, transfer, or accept risks.
- * Option A: Incorrect, as "monitor and review" is a post-treatment step, not the starting point.
- * Option B: Incorrect, as "communication" is not a distinct step in risk assessment; it's embedded throughout.
- * Option D: Incorrect, as it skips "establish context," which is essential for defining the assessment's scope.

This sequence ensures a structured, systematic approach to risk assessment, aligning with organizational objectives.
Reference: EPI CITM study guide, under Risk Management, likely references ISO 31000 or ISO/IEC 27001 for risk assessment processes. Check sections on risk assessment methodologies or risk management lifecycle.

質問 # 39

Being part of service management, business relationship management follows the principles of the service lifecycle. Which of the below is not part of activities defined in service operation?

- A. Report service performance
- B. Communicate scheduled outages
- C. Define service strategy
- D. Escalation

正解: C

解説:

In ITIL, the service operation phase focuses on delivering and managing services, including activities like communicating scheduled outages (A), reporting service performance (B), and handling escalations (C).

Defining service strategy (D) is part of the service strategy phase, not service operation, as it involves planning and aligning services with business goals.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's service lifecycle, specifically distinguishing service operation from service strategy. Check sections on ITIL service operation or business relationship management.

質問 # 40

Users (customers) are complaining about the quality of how problems are being solved. What is the most likely cause?

- A. Lack of budget to manage problems
- B. Wrong allocation of problems
- C. Errors in priority
- D. Poor registration of problems

正解: D

解説:

In ITIL's problem management process, poor registration of problems (A) is the most likely cause of low-quality problem resolution. Effective problem management requires accurate logging of incidents and problems, including detailed descriptions, to enable proper root cause analysis and resolution. If problems are poorly registered (e.g., incomplete or inaccurate data), it hinders diagnosis and resolution, leading to customer dissatisfaction.

* Wrong allocation of problems (B): Incorrect assignment to teams can delay resolution but is less fundamental than poor registration, which affects the entire process.

* Errors in priority (C): Incorrect prioritization may delay urgent issues, but poor registration impacts resolution quality more directly.

* Lack of budget (D): May limit resources, but the scenario points to process quality, not resource constraints.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's problem management, emphasizing accurate problem logging. Check sections on ITIL problem management or service operation.

質問 # 41

.....

ただ一つの試験の準備をするだけで時間をたくさん無駄にすることをやめてください。はやく Jpshiken の CITM 問題集を入手しましょう。この問題集を持っていたら、どうやって効率的に試験の準備をすべきなのかをよく知ることができます。この CITM 問題集はあなたを楽に試験に合格させる素晴らしいツールですから、この成功で

きチャンスを見逃せば絶対後悔になりますから、尻込みしないで急いで行動しましょう。
