

# 2026 Useful Oracle 1Z0-1072-25: Sample Oracle Cloud Infrastructure 2025 Architect Associate Test Online

DOWNLOAD the newest Fast2test 1Z0-1072-25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=18Pluc6bUvMsZONJKnCpGfkKLe1C6Fiyg>

Are you still worried about not able to pass 1Z0-1072-25 exam certification? Then you can ask Fast2test for help. It can bring you the master of the sophisticated techniques of IT industry and help you pass 1Z0-1072-25 certification exam easily. With Fast2test's efforts for years, the passing rate of 1Z0-1072-25 Certification Exam has reached as high as 100%. Choosing Fast2test is to choose the way to go to a beautiful future.

With these real 1Z0-1072-25 Questions, you can prepare for the test while sitting on a couch in your lounge. Whether you are at home or traveling anywhere, you can do 1Z0-1072-25 exam preparation with our Oracle 1Z0-1072-25 dumps. 1Z0-1072-25 test candidates with different learning needs can use our three formats to meet their needs and prepare for the Oracle 1Z0-1072-25 test successfully in one go. Read on to check out the features of these three formats.

## Track Your Progress And Get Succeed With Oracle 1Z0-1072-25 Practice Test

So our high efficiency 1Z0-1072-25 torrent question can be your best study partner. Only 20 to 30 hours study can help you acquire proficiency in the exam. And during preparing for 1Z0-1072-25 exam you can demonstrate your skills flexibly with your learning experiences. The rigorous world force us to develop ourselves, thus we can't let the opportunities slip away. Being more suitable for our customers the 1Z0-1072-25 Torrent question complied by our company can help you improve your competitiveness in job seeking, and 1Z0-1072-25 exam training can help you update with times simultaneously.

## Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN</li> <li>FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block</li> <li>File</li> <li>Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.</li> </ul>

## Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q11-Q16):

### NEW QUESTION # 11

Which of the following is a valid RFC 1918 CIDR prefix that can be used for creating an Oracle Cloud Infrastructure (OCI) Virtual Cloud Network (VCN)?

- A. 0.0.0.0/0
- B. 192.168.0.0/16**
- C. 10.0.0.0/8
- D. 192.268.0.0/24

**Answer: B,C**

Explanation:

RFC 1918 defines IP address ranges that are reserved for private networks, which cannot be routed on the public internet. In Oracle Cloud Infrastructure (OCI), these private IP address ranges can be used to create Virtual Cloud Networks (VCNs). The valid RFC 1918 CIDR prefixes include:

192.168.0.0/16: A private IP range often used in home networks.

10.0.0.0/8: A large private IP range commonly used in enterprise networks.

Invalid Options:

B . 0.0.0.0/0: This CIDR represents all IP addresses and is not a valid private IP range.

C . 192.268.0.0/24: This is not a valid IP address range as the octet "268" is outside the allowable range of 0-255.

RFC 1918: Address Allocation for Private Internets

### NEW QUESTION # 12

Which Oracle Cloud Infrastructure (OCI) Identity and Access Management (IAM) policy is invalid?

- A. Allow group 'Default'/'A-Admins' to manage all-resources in compartment Project-A
- B. Allow any-user to inspect users in tenancy**
- C. Allow group 'Default'/'A-Developers' to create volumes in compartment Project-A

- D. Allow dynamic-group 'Default'/'FrontEnd' to manage instance-family in compartment Project-A

**Answer: B**

Explanation:

In Oracle Cloud Infrastructure (OCI), Identity and Access Management (IAM) policies are used to control access to resources. The policy in option C is invalid because "any-user" is not a valid principal in OCI IAM policies. OCI policies can only grant permissions to groups or dynamic groups, but not to arbitrary users.

Here's an explanation for each option:

- A . Allow dynamic-group 'Default'/'FrontEnd' to manage instance-family in compartment Project-A: This is valid. It grants the dynamic group 'FrontEnd' the ability to manage instances within the Project-A compartment.
- B . Allow group 'Default'/'A-Admins' to manage all-resources in compartment Project-A: This is valid. It provides full administrative access to all resources in the Project-A compartment for the 'A-Admins' group.
- C . Allow any-user to inspect users in tenancy: This is invalid because OCI does not allow the use of "any-user" in policies. You must specify a valid group or dynamic group to define permissions.
- D . Allow group 'Default'/'A-Developers' to create volumes in compartment Project-A: This is valid. It permits the 'A-Developers' group to create volumes in the Project-A compartment.

OCI Policy Reference

**NEW QUESTION # 13**

What happens to the performance level of a volume when it is detached from an instance?

- A. The performance level is adjusted to Lower Cost (0 VPUs/GB).
- B. The performance level remains unchanged.
- C. The performance level is adjusted to Balanced.
- D. The performance level is adjusted to Higher Performance.

**Answer: A**

Explanation:

In Oracle Cloud Infrastructure (OCI), when a block volume is detached from an instance, its performance level is automatically adjusted to the "Lower Cost" tier, which provides 0 VPUs (Volume Performance Units) per GB. This adjustment helps reduce costs when the block volume is not actively being used by a compute instance.

Key Points:

Volume Performance Levels: OCI offers various performance tiers for block volumes, including "Higher Performance," "Balanced," and "Lower Cost." These tiers determine the level of IOPS (Input/Output Operations Per Second) and throughput available to the volume.

Automatic Adjustment: When a block volume is detached from an instance, OCI automatically optimizes the cost by switching the volume to the "Lower Cost" performance tier. This tier offers minimal performance, suitable for data that is not actively accessed.

Cost Management: This automatic adjustment is beneficial for managing costs, as it prevents users from incurring unnecessary charges for higher performance levels when the volume is not in use.

Oracle Cloud Infrastructure Documentation: Block Volume Performance Levels

**NEW QUESTION # 14**

How can an organization securely grant a third-party application access to specific OCI resources?

- A. By creating an IAM policy granting full access to the tenancy
- B. By implementing OAuth 2.0 with the application
- C. By sharing user credentials for an OCI administrator
- D. By configuring the application to utilize Instance Principal

**Answer: D**

Explanation:

To securely grant a third-party application access to specific Oracle Cloud Infrastructure (OCI) resources, the recommended approach is to configure the application to use Instance Principal. This method allows the application to authenticate directly with OCI services without needing to manage sensitive credentials like passwords or API keys.

Instance Principals: Enable compute instances to directly make API calls against OCI services, inheriting permissions through IAM policies. This setup is more secure than sharing user credentials, as it avoids hardcoding credentials within the application and leverages OCI's native security features.

Oracle Cloud Infrastructure Documentation: Instance Principals

## NEW QUESTION # 15

How many capacity reservations would you create to meet the requirement for high availability and distribution across Availability Domains?

- A. Two
- B. Three
- C. One
- D. Four

**Answer: B**

Explanation:

In Oracle Cloud Infrastructure (OCI), to ensure high availability and distribution across Availability Domains (ADs), the recommended approach is as follows:

Capacity Reservations for High Availability: To achieve high availability, especially across all three Availability Domains in a region, you should create three capacity reservations. Each reservation corresponds to one AD, ensuring that your instances or resources are evenly distributed and resilient to AD-level failures.

Why Three: This setup provides redundancy and load distribution across the ADs, meeting the high availability requirements.

Relevant OCI Documentation:

Capacity Reservations

This document outlines how to create and manage capacity reservations to meet high availability and fault tolerance requirements.

## NEW QUESTION # 16

.....

simulation tests of our 1Z0-1072-25 learning materials have the functions of timing and mocking exams, which will allow you to adapt to the exam environment in advance and it will be of great benefit for subsequent exams. After you complete the learning task, the system of our 1Z0-1072-25 test prep will generate statistical reports based on your performance so that you can identify your weaknesses and conduct targeted training and develop your own learning plan. For the complex part of our 1Z0-1072-25 Exam Question, you may be too cumbersome, but our system has explained and analyzed this according to the actual situation to eliminate your doubts and make you learn better.
