NEW QUESTION # 166

Group1	Microsoft 365
Group2	Security

The subscription contains the resources shown in the following table.

Team1	Microsoft Teams team

You create a sensitivity label named Label1.
You need to publish Label1 and have the label apply automatically.
To what can you publish Label1, and to what can Label1 be auto-applied? To answer, select the appropriate options in the answer

Box 1: Publishing a Sensitivity Label

Sensitivity labels can be published to Microsoft 365 groups, security groups, SharePoint Online sites, and Microsoft Teams. Since we have:

Group1 (Microsoft 365 group) - Supported

Group2 (Security group) - Supported

Site1 (SharePoint Online site) - Supported

Team1 (Microsoft Teams team) - Supported

This means we can publish Label1 to Group1, Group2, Site1, and Team1.

Box 2: Auto-Applying a Sensitivity Label

Auto-apply policies for sensitivity labels work on:

SharePoint Online sites (documents)

OneDrive (documents)

Exchange email (messages)

However, labels cannot be auto-applied to Microsoft 365 groups or Teams directly because labels are applied to files and emails, not to groups or Teams as entities. Since Site1 (a SharePoint Online site) supports auto- apply, it is the correct option.
