

# JN0-363 New Learning Materials | JN0-363 Updated Testkings

Question 1 (Exam A)  
Click the correct answer:  
user@router>ze0> show system z7  
Possible completions:  
services show service applications information  
storage show storage information  
software show loaded JUNOS extensions  
statistics show statistics for protocol  
storage show local storage data  
You have entered privileged EXEC mode (GREP). However you must complete the show system interface command.  
Referring to the exhibit, what is the problem?  
A. The command is only available if a backup router is configured.  
B. The command is only available if non-stop routing is enabled.  
C. The command is only available if graceful restart is enabled.  
D. The command is only available on the Backup Routing Engine.

Answer : D

Question 2 (Exam A)  
What are three well-known mandatory BGP attributes? (Choose three.)  
A. MED  
B. origin  
C. community  
D. AS path  
E. next hop

Answer : BDE

Question 3 (Exam A)  
What is the correct order of BGP attributes for active route selection?  
A. next hop -> local preference -> AS path -> MED  
B. next hop -> AS path -> local preference -> MED  
C. next hop -> origin -> local preference -> AS path -> MED  
D. next hop -> AS path -> local preference -> origin -> MED

Answer : B

Question 4 (Exam A)  
What are two bridging concepts that are used to maintain an Ethernet switching table? (Choose two.)  
A. learning  
B. spanning  
C. aging  
D. routing

Answer : AC

Question 5 (Exam A)  
Which BGP attribute is used to detect routing loops?  
A. AS path  
B. local preference  
C. local preference  
D. next hop

Answer : A

## 100% Pass 2026 The Best JN0-363: Service Provider Routing and Switching, Specialist (JNCIS-SP) New Learning Materials

It is apparent that a majority of people who are preparing for the JN0-363 exam would unavoidably feel nervous as the exam approaching, since you have clicked into this website, you can just take it easy now--our JN0-363 learning materials. Our company has spent more than 10 years on compiling study materials for the exam, and now we are delighted to be here to share our JN0-363

Study Materials with all of the candidates for the exam in this field. There are so many striking points of our JN0-363 preparation exam.

Juniper JN0-363 is a certification exam for IT professionals who want to enhance their skills in service provider routing and switching. JN0-363 exam is designed to test the candidate's knowledge of basic and advanced routing and switching technologies. JN0-363 Exam is also designed to test the candidate's ability to configure, manage, and troubleshoot Juniper Networks devices in a service provider environment.

## Juniper Service Provider Routing and Switching, Specialist (JNCIS-SP) Sample Questions (Q75-Q80):

### NEW QUESTION # 75

You have configured graceful RE switchover (GRES), however you cannot complete the show system switchover command. Referring to the exhibit, what is the problem?

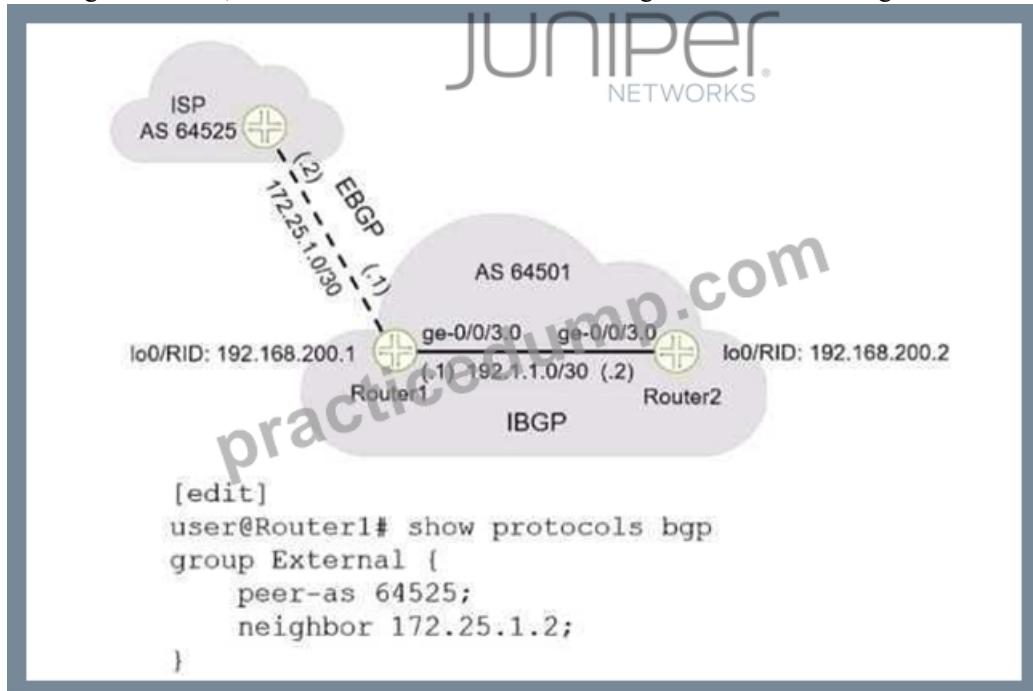

```
user@router> show system s?
Possible completions:
service           Show service applications information
snapshot         Show snapshot information
software         Show loaded JUNOS extensions
statistics        Show statistics for protocol
storage          Show local storage data
```

- A. The command is only available on the backup Routing Engine.
- B. The command is only available If a backup router is configured.
- C. The command is only available If graceful restart is enabled.
- D. The command is only available if non-stop routing is enabled.

**Answer: A**

### NEW QUESTION # 76

Referring to the exhibit, what must be included in the Route1 configuration when establishing an EBGP session with the ISP?

- A. A local address must be specified.
- B. A local AS must be specified.
- C. The BGP session type external must be specified.
- D. The BGP session type internal must be specified.

Answer: A

NEW QUESTION # 77

Click the Exhibit button.

```
[edit]
user@R1# show interfaces
ge-0/0/1 {
    unit 0 {
        family inet {
            address 172.18.1.1/30;
        }
    }
    lo0 {
        unit 0 {
            family inet {
                address 192.168.254.1/32;
            }
        }
    }
}

[edit]
user@R1# show routing-options

[edit]
user@R1# show protocols ospf
area 0.0.0.0 {
    interface ge-0/0/1.0;
}

[edit]
user@R2# show interfaces
ge-0/0/1 {
    unit 0 {
        family inet {
            address 172.18.1.2/30;
        }
    }
}

[edit]
user@R2# show routing-options
router-id 192.168.254.1;

[edit]
user@R2# show protocols ospf
```

```

user@switch# show protocols ospf
area 0.0.0.0 {
    interface ge-0/0/1.0 {
        hello-interval 10;
        dead-interval 40;
    }
}

```

You configured R1 and R2 to form an OSPF adjacency, but the adjacency will not establish. Referring to the exhibit, which statement correctly identifies the problem?

- A. R2 has a wrong area configured
- B. R1 does not have a router ID defined
- C. R1 and R2 have the same router ID**
- D. Hello and dead timers are not matching between R1 and R2

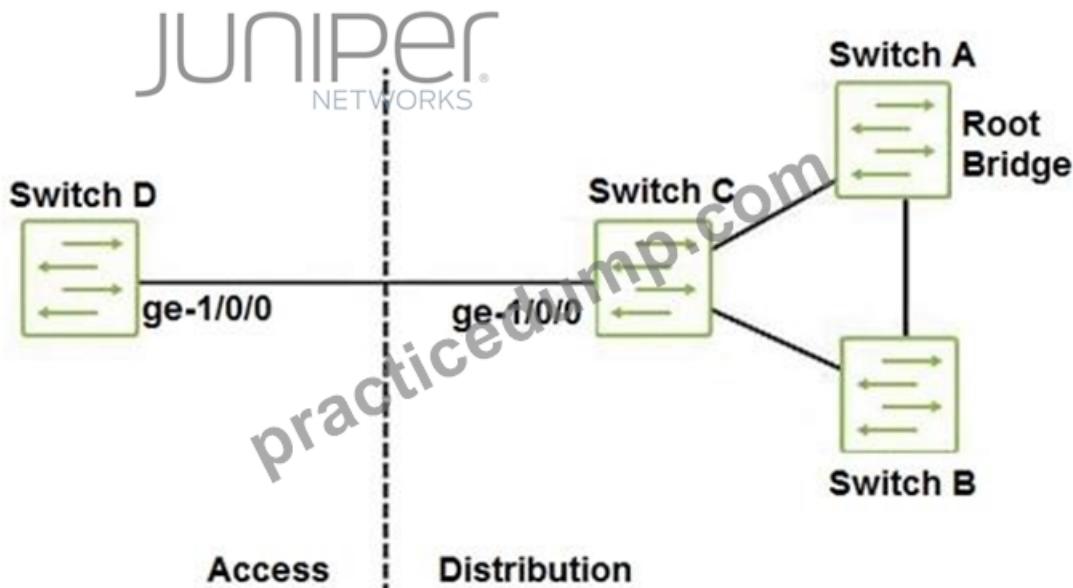

**Answer: C**

Explanation:

[https://www.juniper.net/documentation/en\\_US/junos/topics/reference/configuration-statement/router-id-edit-routing-options.html](https://www.juniper.net/documentation/en_US/junos/topics/reference/configuration-statement/router-id-edit-routing-options.html)

#### NEW QUESTION # 78

Click the Exhibit button.

In the network shown in the exhibit, all switches are configured with the default STP root bridge priority, and Switch A has been selected as root. You recently added the older Switch D into the network as an access switch, and notice it has taken over as root. Which configuration would solve this problem?

- A.**

```

[edit protocols rstp]
user@switchC# show
interface ge-1/0/0 {
    no-root-port;
}

```
- B.**

```

[edit protocols rstp]
user@switchC# show
interface ge-1/0/0 {
    edge;
}

```

- C. 

```
[edit protocols rstp]
user@switchC# show
interface ge-1/0/0 {
    bpdu-timeout-action {
        block;
    }
}
```
- D. 

```
[edit protocols rstp]
user@switchD# show
interface ge-1/0/0 {
    no-root-port;
```

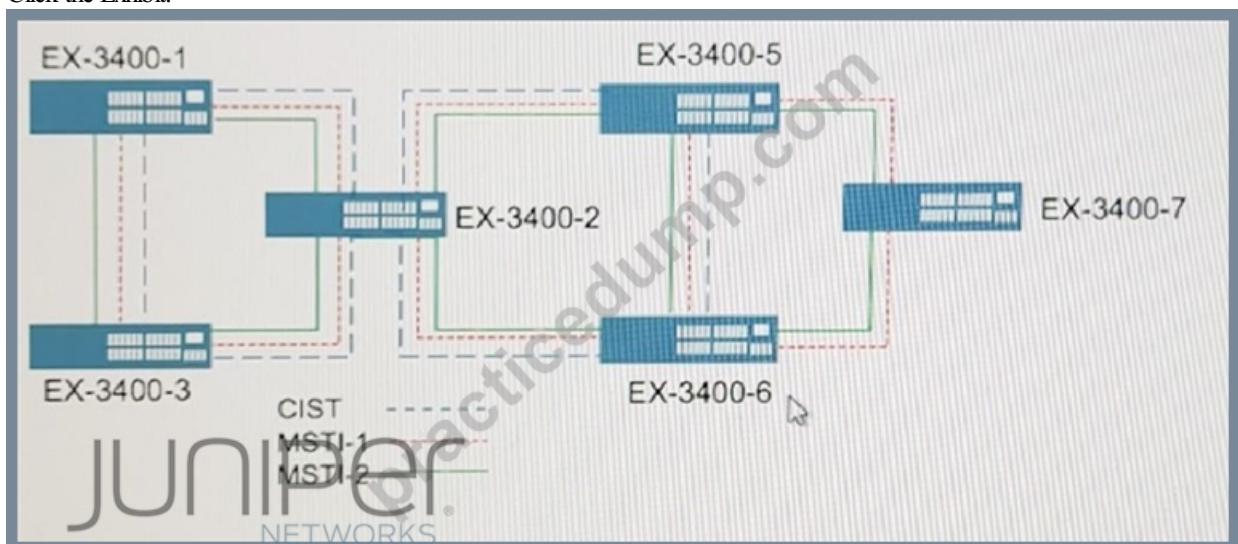

**Answer: A**

Explanation:

[https://www.juniper.net/documentation/en\\_US/junos/topics/reference/configuration-statement/no-root-port-edit-protocols-stp.html](https://www.juniper.net/documentation/en_US/junos/topics/reference/configuration-statement/no-root-port-edit-protocols-stp.html)

### NEW QUESTION # 79

Click the Exhibit.

You are planning the addition of a new EX3400 Series device to the network (EX-3400-7) to service MSTI-1 and MSTI-2. Referring to the exhibit, which requirement must be met on EX-3400-7 for the MSTP instances to become fully operational and resilient?

- A. The MSTP configuration-name must be the same.
- B. The MSTP revision-level must be incremented.
- C. The CIST must be extended to EX-3400-7.
- D. The bridge-priority must match EX-3400-5 and EX-3400-6.

**Answer: A**
