Architect learning materials!

The Google Professional-Cloud-Architect Exam is designed to test the candidate's knowledge of GCP, including its features, services, and capabilities. Professional-Cloud-Architect exam evaluates the candidate's abilities in designing, planning, and managing GCP solutions. To pass the exam, the candidate must have a deep understanding of GCP architecture and be able to design and implement solutions that are reliable, scalable, and secure.

Google Certified Professional - Cloud Architect (GCP) Sample Questions (Q157-Q162):

NEW QUESTION # 157
For this question, refer to the TerramEarth case study.
The TerramEarth development team wants to create an API to meet the company's business requirements.
You want the development team to focus their development effort on business value versus creating a custom framework. Which method should they use?

- A. Use Google App Engine with a JAX-RS Jersey Java-based framework. Focus on an API for the public.
- B. Use Google App Engine with the Swagger (open API Specification) framework. Focus on an API for the public.
- C. Use Google Container Engine with a Tomcat container with the Swagger (Open API Specification) framework. Focus on an API for dealers and partners.
- D. Use Google App Engine with Google Cloud Endpoints. Focus on an API for dealers and partners.
- E. Use Google Container Engine with a Django Python container. Focus on an API for the public.

Answer: D

Explanation:
https://cloud.google.com/endpoints/docs/openapi/about-cloud-endpoints?hl=en_US&_ga=2.21787131.-171252
https://cloud.google.com/endpoints/docs/openapi/architecture-overview
https://cloud.google.com/storage/docs/gsutil/commands/test
Develop, deploy, protect and monitor your APIs with Google Cloud Endpoints. Using an Open API Specification or one of our API frameworks, Cloud Endpoints gives you the tools you need for every phase of API development.
From scenario:
Business Requirements
Decrease unplanned vehicle downtime to less than 1 week, without increasing the cost of carrying surplus inventory Support the dealer network with more data on how their customers use their equipment to better position new products and services Have the ability to partner with different companies - especially with seed and fertilizer suppliers in the fast-growing agricultural business - to create compelling joint offerings for their customers.
