Salesforce Certified B2C Commerce Cloud Developer Sample Questions (Q115-Q120):

NEW QUESTION # 115

A developer has these requirements for out-of-stock products:

Save the SKUs of the out-of-stock products that the customer is interested in
Save the customer email regardless if the customer is a guest or registered
Email the customer when the product is back-in-stock
Which step should the developer perform as part of the solution to achieve the requirements?

- A. Create a new custom object type that has a set-of-string type custom attribute for the SKUs and a string for the email field.
- B. Create a new set-of-string type custom attribute to the system object type Product to save all the customer email addresses for back-in-stock notification.

- C. Create a new system object type that has a set-of-string type custom attribute for the SKUs and a string for the email field.
- D. Create a new set-of-string type custom attribute to the system object type Profile to save all the SKUs and use the existing email field for the email.

Answer: B

NEW QUESTION # 116

A Digital Developer extends a system object, Product, and adds a Boolean attribute, "sellable," to it.

Assuming "prod" is the variable name handling the product, what code can the Developer use to access it?

- A. `prod.custom.sellable`
- B. `prod.persistable.sellable`
- C. `prod.extended.sellable`
- D. `prod.sellable`

Answer: A

NEW QUESTION # 117

A client wants to differentiate their monobrand stores with a special icon when shown in the store locator. The information is saved in a true/false custom attribute for each Store object in Merchant tools.

How should the developer follow SFRA best practices to expose this data for rendering?

- A. Extend the existing Stores_Find controller with a new middleware function that performs the query
- B. Pass the Store system object to the template, so that custom properties are available
- C. Use the `module.superModule` functionality and the call method to add a new property to the Store Model.
- D. Add `<isscript>` to the template, and call `StoreMgr.searchStoresByCoordinates()`;

Answer: C

NEW QUESTION # 118

A client sells its products in North America, Europe, and Asia, and has a B2C Commerce Site for each of these markets. The client receives three area-specific snippets of analytics code by a third-party provider to insert in the sites.

How should the developer configure an instance to allow the merchant to independently insert and update these snippets?

- A. Configure a new Service Profile with the provided snippet of code.
- B. Use ISML conditional tags to add the snippet into the codebase.
- C. Create a new "HTML" attribute in the SitePreference object type.

Answer: C

NEW QUESTION # 119

A merchant has complained to the developers that some products are not appearing in the storefront and has asked them to diagnose and solve the issue.

Which two factors might be causing a product to be hidden?

Choose 2 answers

- A. Product has been set to searchable.
- B. Product Available to sell is `<1`.
- C. Product lacks a price.
- D. Product is not online.
- E. Product does not have any images.

Answer: C,E

NEW QUESTION # 120

We own the profession experts on compiling the Comm-Dev-101 exam questions and customer service on giving guide on questions from our clients.
