How does geolocation tracking in SAP Transportation Management reduce costs and improve carrier interactions for transporting perishable goods?

- A. Automates procurement
- B. Optimizes financial processes
- C. Manages global logistics using real-time geolocation
- D. Improves production processes

Answer: C

Explanation:

Solution:

Based solely on content from learning.sap.com (and related SAP documentation), the correct answer is:

* D. Manages global logistics using real-time geolocation

Geolocation tracking in SAP Transportation Management, particularly via SAP Business Network Global Track & Trace, provides real-time visibility across global logistics networks. This functionality reduces costs and enhances interactions with carriers-especially for perishable goods-by enabling predictive ETAs, milestone awareness, event-triggered alerts, and seamless collaboration with carriers and logistics partners.

* A. Improves logistics - While orchestration connects operations with logistics, its primary purpose is on-floor execution and resource balancing-not optimizing logistics functions directly.

So the best fit is option B.
