

# New PAP-001 Test Guide & PAP-001 Valid Test Preparation

What's more, part of that Itexamguide PAP-001 dumps now are free: [https://drive.google.com/open?id=192\\_yxKLQVZpFK75bLQ5G4rC-1NZaB6tj](https://drive.google.com/open?id=192_yxKLQVZpFK75bLQ5G4rC-1NZaB6tj)

Our company conducts our PAP-001 real questions as high quality rather than unprincipled company which just cuts and pastes content into their materials and sells them to exam candidates. We have always been the vanguard of this field over ten years. It means we hold the position of supremacy of PAP-001 practice materials by high quality and high accuracy. Besides, all exam candidates who choose our PAP-001 real questions gain unforeseen success in this exam, and continue buying our PAP-001 practice materials when they have other exam materials' needs. It is our running tenet to offer the most considerate help and services for exam candidates just like you. By virtue of our PAP-001 Study Tool, many customers get comfortable experiences of whole package of services and of course passing the PAP-001 exam successfully. Just hold the supposition that you may fail the exam even by the help of our PAP-001 study tool, we can give full refund back or switch other versions for you to relieve you of any kind of losses. What is more, we offer supplementary content like updates for one year after your purchase.

Our PAP-001 study guide provides free trial services, so that you can learn about some of our topics and how to open the software before purchasing. During the trial period of our PAP-001 study materials, the PDF versions of the sample questions are available for free download, and both the pc version and the online version can be illustrated clearly. You can contact us at any time if you have any difficulties on our PAP-001 Exam Questions in the purchase or trial process. We will provide professional personnel to help you remotely on the PAP-001 training guide.

## PAP-001 Valid Test Preparation, Interactive PAP-001 EBook

The PAP-001 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the PAP-001 exam thesis focus in the development trend, and summarize all kind of difficulties you will face and highlight the user review must master the knowledge content. And as far as possible with extremely concise prominent text of PAP-001 Test Guide is accurate incisive expression of the proposition of this year's forecast trend, and through the simulation of topic design meticulously. Your success is ready with our PAP-001 exam questions.

## Ping Identity PAP-001 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Installation and Initial Configuration: This section of the exam measures skills of System Engineers and reviews installation prerequisites, methods of installing or removing PingAccess, and securing configuration database passwords. It explains the role of run.properties entries and outlines how to set up a basic on-premise PingAccess cluster.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Security:</b> This section of the exam measures skills of Security Administrators and highlights how to manage certificates and certificate groups. It covers the association of certificates with virtual hosts or listeners and the use of administrator roles for authentication management.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>General Maintenance and File System:</b> This section of the exam measures the skills of System Engineers and addresses maintenance tasks such as license management, backups, configuration imports or exports, auditing, and product upgrades. It also includes the purpose of log files and an overview of the PingAccess file system structure with important configuration files.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>General Configuration:</b> This section of the exam measures skills of Security Administrators and introduces the different object types within PingAccess such as applications, virtual hosts, and web sessions. It explains managing application resource properties, creating web sessions, configuring identity mappings, and navigating the administrative console effectively.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Product Overview:</b> This section of the exam measures skills of Security Administrators and focuses on understanding PingAccess features, functionality, and its primary use cases. It also covers how PingAccess integrates with other Ping products to support secure access management solutions.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Policies and Rules:</b> This section of the exam measures the skills of Security Administrators and focuses on how PingAccess evaluates paths for applying policies and resources. It covers the role of different rule types, their configuration, and the implementation of rule sets and rule set groups for consistent policy enforcement.</li> </ul>

## Ping Identity Certified Professional - PingAccess Sample Questions (Q62-Q67):

### NEW QUESTION # 62

What is the purpose of the `engine.ssl.protocols` in the `run.properties` file?

- A. To configure the supported TLS versions
- B. To configure SSL protocols used for clustering
- C. To configure the supported ciphers
- D. To configure the supported HTTPS port

**Answer: A**

Explanation:

The property `engine.ssl.protocols` in `run.properties` specifies the TLS protocol versions that PingAccess engines will support for incoming HTTPS traffic.

Exact Extract:

"The `engine.ssl.protocols` property configures which TLS versions are enabled for HTTPS listeners."

- \* Option A (ciphers) is incorrect - cipher suites are defined separately, not in this property.
- \* Option B (HTTPS port) is incorrect - the port is defined in the engine listener, not here.
- \* Option C (TLS versions) is correct - this property controls TLS version support (e.g., TLSv1.2, TLSv1.3).
- \* Option D (clustering) is incorrect - clustering does not depend on this property.

Reference: PingAccess Administration Guide - `run.properties` settings

### NEW QUESTION # 63

Refer to the following applications:

- \* `hr.company.com`
- \* `finance.company.com`
- \* `customer.order.company.com`

Which action should be taken to allow these applications to share the same web session?

- A. Use Rewrite Cookie Path rule
- B. Set Audience option
- C. Use Rewrite Cookie Domain rule

- **D. Set Cookie Domain option**

**Answer: D**

Explanation:

For multiple subdomains to share the same PingAccess session, the Cookie Domain must be configured so that the session cookie is valid across all listed applications.

Exact Extract:

"Set the Cookie Domain in the web session configuration to a parent domain (for example, .company.com) to enable applications in different subdomains to share the same session."

- \* Option A (Set Audience option) applies to OAuth token validation, not cookie sharing.
- \* Option B (Set Cookie Domain option) is correct - e.g., setting .company.com allows session cookies to be shared.
- \* Option C (Rewrite Cookie Domain rule) modifies upstream cookies for back-end applications, not PingAccess session cookies.
- \* Option D (Rewrite Cookie Path rule) is unrelated; it modifies paths for cookies, not domains.

Reference: PingAccess Administration Guide - Web Session Configuration

#### NEW QUESTION # 64

What is the purpose of PingAccess processing rules?

- A. To override upstream access control decisions
- B. To allow for more detailed auditing
- C. To collect data for offline processing
- **D. To modify web traffic in real time**

**Answer: D**

Explanation:

Processing Rules in PingAccess apply transformations to HTTP traffic (requests or responses) in real time, such as modifying headers, handling CORS, or rewriting cookies.

Exact Extract:

"Processing rules allow PingAccess to modify HTTP requests and responses in real time, such as adding headers or enabling cross-origin requests."

- \* Option A is incorrect - they are not for offline data collection.
- \* Option B is correct - their purpose is real-time modification of web traffic.
- \* Option C is incorrect - access control rules enforce or override authorization, not processing rules.
- \* Option D is incorrect - auditing is handled in log configurations, not processing rules.

Reference: PingAccess Administration Guide - Rules Overview (Processing Rules)

#### NEW QUESTION # 65

A business application must be accessible via two FQDNs. Which PingAccess functionality should an administrator use to meet this requirement?

- A. Sites
- **B. Virtual Hosts**
- C. Applications
- D. Web Sessions

**Answer: B**

Explanation:

Virtual Hosts in PingAccess define the external FQDNs (and ports) through which applications are accessed.

An application can be bound to multiple virtual hosts to allow access via multiple FQDNs.

Exact Extract:

"A virtual host specifies the fully qualified domain name and port number through which an application is accessed."

- \* Option A (Virtual Hosts) is correct - multiple FQDNs can be supported by assigning multiple virtual hosts.
- \* Option B (Applications) define resource protection but do not manage FQDN binding.
- \* Option C (Sites) define back-end targets, not the public-facing FQDN.
- \* Option D (Web Sessions) handle authentication state, unrelated to hostnames.

Reference: PingAccess Administration Guide - Virtual Hosts

### NEW QUESTION # 66

An API is hosted onsite and is using only header-based Identity Mapping. It is exposed to all clients running on the corporate network. How should the administrator prevent a malicious actor from bypassing PingAccess and spoofing the headers to gain unauthorized access to the API?

- A. Require HTTPS
- **B. Use ID Tokens**
- C. Use Target Host Header
- D. Add Site Authenticator

**Answer: B**

Explanation:

When applications depend solely on header-based identity mapping, attackers can attempt to bypass PingAccess by injecting headers directly into requests sent to the backend. To prevent spoofing, PingAccess should be configured to pass cryptographically verifiable tokens (e.g., ID tokens from OIDC) instead of relying on plain headers.

Exact Extract:

"Headers can be spoofed if not protected. Use signed tokens, such as ID tokens or JWTs, to provide strong identity assurance and prevent header injection attacks."

\* Option A (Use ID Tokens) is correct - ID tokens are signed and verifiable, preventing spoofing.

\* Option B (Add Site Authenticator) protects PingAccess-to-site authentication, not client-to-API spoofing.

\* Option C (Require HTTPS) prevents eavesdropping but does not stop header spoofing from inside the network.

\* Option D (Use Target Host Header) ensures host header integrity but not user identity.

Reference: PingAccess Administration Guide - Identity Mapping and Security Considerations

### NEW QUESTION # 67

.....

Now they have become certified Certified Professional - PingAccess Certification Exam experts and pursue a rewarding career in the top world brands. You can also trust top-notch and easy-to-use Ping Identity PAP-001 practice test questions. The Certified Professional - PingAccess (PAP-001) exam questions are checked and verified by experienced and qualified Certified Professional - PingAccess (PAP-001) exam trainers. They have years of experience and knowledge to collect, design, and answer the real Certified Professional - PingAccess (PAP-001) exam questions.
