Therefore, you have the option to use PMI Agile Certified Practitioner (PMI-ACP) PDF questions anywhere and anytime.

PMI Agile Certified Practitioner Sample Questions (Q309-Q314):

NEW QUESTION # 309

During a team meeting, members who are subject matter experts (SMEs) mention that they are continuously working on repetitive

tasks which has lowered motivation.
What should the agile practitioner do?

- A. Add more resources to the team to help with the tasks
- **B. Have team members work in pairs to learn from each other and develop new skills**
- C. Ask team members to perform a value stream analysis of their activities
- D. Organize a team-building activity to improve team morale

Answer: B

Explanation:

The correct answer is B - Have team members work in pairs to learn from each other and develop new skills.

Pairing encourages collaboration, knowledge sharing, and skill development, which helps reduce dependency on specific individuals and enhances engagement through variety.

From the PMI Agile Practice Guide:

"Pair programming and other collaborative work methods help reduce repetition, promote learning, and improve motivation. These techniques allow for shared ownership and skill diversity." (PMI Agile Practice Guide, Section 4.3 - Continuous Learning and Team Development) Mike Griffiths adds:

"Cross-training and pairing reduce boredom, eliminate knowledge silos, and increase team flexibility. They are effective responses to reduced motivation from repetitive work." (Mike Griffiths, PMI-ACP Exam Prep, Chapter 7 - Continuous Improvement) Incorrect options:

- * A may temporarily help morale but doesn't address the root cause.
- * C is more suitable for analyzing inefficiencies, not directly resolving monotony.
- * D adds cost and doesn't solve the underlying engagement problem.

NEW QUESTION # 310

During the review session, the product owner discovers that the user interface has a response time of 10 seconds. The non-functional requirements state that it should respond in less than two seconds. The team complains that this requirement was not communicated to them.

What should have been done to avoid this?

- A. A team review of the scope of work should have been conducted
- B. Non-functional requirements should have been added to the definition of done
- C. Non-functional requirements should have been added to the acceptance criteria
- **D. A comprehensive user story with all non-functional requirements should have been created.**

Answer: D

NEW QUESTION # 311

How can an agile project manager ensure that all stakeholders have a clear understanding of the release plan by the end of a release planning meeting? (Choose two.)

- A. Timeline of the project
- B. Complete roadmap of the next iterations
- **C. List of the user stories that will be part of the next releases**
- **D. Stated understanding of the release goal**
- E. Complete vision of the end product

Answer: C,D

NEW QUESTION # 312

A project team identifies a number of technical challenges with features in the next sprint.
What should they do?

- **A. Ask the product owner to assign the tasks to the most appropriately skilled resources**
- B. Determine who is best qualified to address the challenges
- C. Request direction from the technical manager
- D. Encourage the product owner to reallocate the features to another sprint
