Microsoft Azure Administrator Sample Questions (Q345-Q350):

NEW QUESTION # 345

This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription named Subscription1 that contains the resources shown in the following table.

VM1 connects to a virtual network named VNET2 by using a network interface named NIC1.

You need to create a new network interface named NIC2 for VM1.

Solution: You create NIC2 in RG1 and Central US.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The virtual machine you attach a network interface to and the virtual network you connect it to must exist in the same location, here West US, also referred to as a region.

NEW QUESTION # 346

Your on-premises network contains an SMB share named Share1.

You have an Azure subscription that contains the following resources:

A web app named webapp1

A virtual network named VNET1

You need to ensure that webapp1 can connect to Share1.

What should you deploy?

- A. an Azure Virtual Network Gateway
- B. an Azure Application Gateway
- C. an Azure Active Directory (Azure AD) Application Proxy

Answer: A

Explanation:

A Site-to-Site VPN gateway connection can be used to connect your on-premises network to an Azure virtual network over an IPsec/IKE (IKEv1 or IKEv2) VPN tunnel.

This type of connection requires a VPN device, a VPN gateway, located on-premises that has an externally facing public IP address assigned to it.

<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-howto-site-to-site-resource-manager-portal>

NEW QUESTION # 347

You have an Azure subscription that contains the resource groups shown in the following table.

RG1 contains the resources shown in the following table.

RG2 contains the resources shown in the following table.

You need to identify which resources you can move from RG1 to RG2, and which resources you can move from RG2 to RG1.

Which resources should you identify? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

NEW QUESTION # 348

You need to implement the planned changes for the storage account content. Which containers and file shares can you use to organize the content?

- A. share1 and share2 only
- B. cont1 and share1 only
- C. cont1, cont2, share1, and share2
- D. share1 only
- E. cont1, share1, and share2 only

Answer: B

- [illegible]
